Preface	<i>page</i> xi
To the instructor	xiv
From gambling to an essential ingredient of modern science and society	xvi
Chapter 1 Experiments with random outcomes	1
1.1 Sample spaces and probabilities	1
1.2 Random sampling	4
1.3 Infinitely many outcomes	11
1.4 Consequences of the rules of probability	14
1.5 Random variables: a first look	21
1.6 Finer points ♣	26
Exercises	29
Chapter 2 Conditional probability and independence	43
2.1 Conditional probability	43
2.2 Bayes' formula	48
2.3 Independence	51
2.4 Independent trials	58
2.5 Further topics on sampling and independence	62
2.6 Finer points ♣	71
Exercises	72
Chapter 3 Random variables	89
3.1 Probability distributions of random variables	89
3.2 Cumulative distribution function	95
3.3 Expectation	103
3.4 Variance	113
3.5 Gaussian distribution	119
3.6 Finer points ♣	123
Exercises	126

Chapter 4	Approximations of the binomial distribution	141
4.1	Normal approximation	142
4.2	Law of large numbers	148
4.3	Applications of the normal approximation	149
4.4	Poisson approximation	155
4.5	Exponential distribution	161
4.6	Poisson process ♦	165
4.7	Finer points ♣	169
	Exercises	171
Chapter 5	Transforms and transformations	181
5.1	Moment generating function	181
5.2	Distribution of a function of a random variable	188
5.3	Finer points ♣	196
	Exercises	197
Chapter 6	Joint distribution of random variables	205
6.1	Joint distribution of discrete random variables	205
6.2	Jointly continuous random variables	212
6.3	Joint distributions and independence	219
6.4	Further multivariate topics ♦	227
6.5	Finer points ♣	235
	Exercises	236
Chapter 7	Sums and symmetry	247
7.1	Sums of independent random variables	247
7.2	Exchangeable random variables	255
7.3	Poisson process revisited ♦	261
	Exercises	265
Chapter 8	Expectation and variance in the multivariate setting	271
8.1	Linearity of expectation	271
8.2	Expectation and independence	276
8.3	Sums and moment generating functions	282
8.4	Covariance and correlation	284
8.5	The bivariate normal distribution ♦	294
8.6	Finer points ♣	296
	Exercises	297

Contents

ix

Chapter 9	Tail bounds and limit theorems	309
9.1	Estimating tail probabilities	309
9.2	Law of large numbers	313
9.3	Central limit theorem	315
9.4	Monte Carlo method ♦	318
9.5	Finer points ♣	320
	Exercises	322
Chapter 10	Conditional distribution	329
10.1	Conditional distribution of a discrete random variable	329
10.2	Conditional distribution for jointly continuous random variables	338
10.3	Conditional expectation	346
10.4	Further conditioning topics ♦	354
10.5	Finer points ♣	365
	Exercises	366
Appendix A	Things to know from calculus	379
Appendix B	Set notation and operations	380
Appendix C	Counting	385
Appendix D	Sums, products and series	399
Appendix E	Table of values for $\Phi(x)$	407
Appendix F	Table of common probability distributions	408
	Answers to selected exercises	411
	Bibliography	424
	Index	425
