List of Figures *page* xiii
List of Tables xviii
Preface xxi
Acknowledgments xxvii

1 Introduction 1
1.1 Resource Endowments 2
1.2 Institutions 4
1.3 Culture/Identity 7
1.4 Plan of the Book 10

PART I **The Fundamentals**

2 Theories and Their Conditional Implications 15
2.1 How Do I Know When My Theory Posits a Conditional Relationship? 15
2.2 The Difference between Moderation and Mediation 18
2.3 How Does a Multiplicative Term Capture Conditionality? 21
2.4 Moving beyond the Interaction Effect 28
2.5 The Symmetry of Interaction and Its Implications for Theory Testing 36
2.6 Five Key Predictions 44
2.7 Exercises 50

3 Interaction Model Specification 53
3.1 Include All Constitutive Terms 54
3.2 Why Is It Important to Include All of the Constitutive Terms? 56
3.2.1 Multicollinearity 60
3.3 An Alternative Model Specification When *One* of the Modifying Variables Is Discrete 64
3.3.1 Can I Just Split My Sample? 72
3.4 A Different Alternative Model Specification when *Both* Modifying Variables Are Discrete 78

3.5 Exercises 89

4 Interpreting Quantities of Interest 98
4.1 Think about Effects in terms of Derivatives and Differences 99
4.2 Calculate Appropriate Measures of Uncertainty 105
4.2.1 Effects and Measures of Uncertainty 105
4.2.2 Predicted Values and Measures of Uncertainty 111
4.2.3 Substantive Significance 114
4.3 Key Quantities of Interest and Some Prototypical Results 115
4.4 Exercises 123

5 Three Substantive Applications 126
5.1 When $X$ and $Z$ Are Both Discrete: Gender, Race, and Support for the Republican Party 126
5.2 When $X$ Is Continuous and $Z$ Is Discrete: Ideology, Race, and Support for Barack Obama 146
5.3 When $X$ and $Z$ Are Both Continuous: Demand and Supply Effects on Women's Legislative Representation 175
5.4 Exercises 191

PART II More Complex Forms of Conditionality

6 When We Have More Than One Modifying Variable 195
6.1 When the Modifying Effects of $Z$ and $W$ Are Independent 196
6.1.1 Substantive Application: Gender, Education, Age, and Support for Feminism 213
6.2 When the Modifying Effects of $Z$ and $W$ Are Dependent 225
6.2.1 An Alternative Interaction Model When the Modifying Variables Are All Discrete 249
6.2.2 Substantive Application: The Impact of Demand, Supply, and Regime Type on Women's Legislative Representation 254
6.3 Exercises 269

7 When an Independent Variable Interacts with Itself 273
7.1 Polynomial Regression Models 274
7.1.1 Substantive Application: The Impact of Party Ideology on Campaign Sentiment 288
7.1.2 Using Polynomial Regression to Model Non-linear Interaction Effects 293
7.2 Possible Threshold Effects 301

Table of Contents
More Information

7.2.1 Piecewise Linear Regression Models 301
7.2.2 Switching Regression Models 306
7.3 Exercises 309

PART III **Interactions and Limited Dependent Variables**

8 Interactions and Dichotomous Dependent Variables 315
8.1 The Linear Probability Model 315
8.2 The Basis for Logit and Probit Models 317
8.2.1 The Pure Probability Approach 317
8.2.2 The Latent Variable Approach 320
8.2.3 The Random Utility Approach 321
8.3 Interpretation and Interaction Effects in "Additive" Logit and Probit Models 323
8.3.1 Coefficients 323
8.3.2 Marginal Effects on Probabilities 325
8.3.3 Predicted Probabilities 329
8.3.4 Differences in Predicted Probabilities 331
8.3.5 Odds Ratios 334
8.3.6 Interaction Effects 335
8.4 Interpretation and Interaction Effects in "Interactive" Logit and Probit Models 347
8.4.1 Coefficients 350
8.4.2 Marginal Effects on Probabilities 351
8.4.3 Predicted Probabilities 355
8.4.4 Differences in Predicted Probabilities 356
8.4.5 Odds Ratios 359
8.4.6 Interaction Effects 361
8.5 Measures of Uncertainty 371
8.5.1 The Method of Simulated Coefficients 372
8.5.2 The Bootstrap Method 377
8.5.3 The Delta Method 377
8.6 Substantive Application: Determinants of Pre-electoral Coalition Formation 379
8.7 Exercises 397

9 Interactions and Ordered Dependent Variables 401
9.1 A Latent Variable Approach 402
9.2 Interpretation 405
9.2.1 Coefficients 405
9.2.2 Marginal Effects on Probabilities 408
9.2.3 Differences in Predicted Probabilities 411

More Information

9.2.4 Odds Ratios 412
9.2.5 Interaction Effects 414
9.3 Substantive Application: Ideology, Race, and Presidential Approval of Barack Obama 418
9.4 Exercises 429

10 Interactions and Unordered Dependent Variables 433
10.1 A Random Utility Approach 434
10.2 Data Structure and Interactions 437
10.3 Interpretation 444
10.3.1 Coefficients 445
10.3.2 Marginal Effects on Probabilities 447
10.3.3 Differences in Predicted Probabilities 452
10.3.4 Odds Ratios 453
10.3.5 Interaction Effects 458
10.4 Substantive Application: Policy Preferences, Gender, and Party Support 462
10.5 Exercises 489

Appendix A. Basic Properties of Variances 493

Appendix B. Marginal Effects and Variances for Various Linear-Interactive Models 495

Appendix C. Calculating the Smallest Standard Error for the Marginal Effect of $X$ on $Y$ 498

Appendix D. Calculating the Values of the Modifying Variable $Z$ at which the Bounds of the Confidence Interval for the Marginal Effect of $X$ Equal 0 500
D.1 Substantive Example: Marginal Effect Plot for *Demand* 502
