The Cambridge Handbook of the Intellectual History of Psychology

We cannot understand contemporary psychology without first researching its history. Unlike other books on the history of psychology, which are chronologically ordered, this Handbook is organized topically. It covers the history of ideas in multiple areas of the field and reviews the intellectual history behind the major topics of investigation. The evolution of psychological ideas is described alongside an analysis of their surrounding context. Readers learn how eminent psychologists draw on the context of their time and place for ideas and practices and shows how innovation in psychology is an ongoing dialogue between past, present, and anticipated future.

Robert J. Sternberg is Professor of Human Development at Cornell University, New York and Honorary Professor of Psychology at Heidelberg University, Germany. He has also won the William James Award and the James McKeen Cattell Award from Association for Political Science (APS) and the Grawemeyer Award in Psychology. He is past-president of the American Psychological Association.

Wade E. Pickren is Director of the Center for Faculty Excellence at Ithaca College, New York. He was the founding director of the American Psychological Association (APA) Archives and served as its first historian. He also served as editor of History of Psychology from 2010 to 2015.
