

INDEX

- actor-partner interdependence model, 58, 93, 97, 232
- alcoholism, 291, 293, 304
- Alzheimer's disease, 139, 142, 146, 171, 178, 315, 319, 327–328
- analytic coding, 206
- attachment dimensions, 300, 302
- attachment theory, 294
- attitudes, 16
- autonomy, 42

- Babrow, Austin, 164, 175
- burnout, 322–324, 327

- cancer, 13, 19, 75
 - breast, 188
 - colorectal, 13, 16
 - screening, 16, 20, 23
- caregiving, 139, 153, 161, 176, 294, 315, 322
 - burden, 140, 143, 178, 208, 319, 327
 - support, 153
- children of alcoholics, 291, 293
- closeness, 96, 99, 103, 105, 107
- college students, 94, 110
- commitment, 50
- common-sense model, 269
- communication, 7
 - challenges, 271
 - directness, 125, 130
 - effectiveness, 101, 103, 106–107, 350
 - engagement, 20
 - openness, 85, 87, 195, 307
 - patient-practitioner, 3, 266
 - sexual, 336–337, 341, 348
 - sibling, 160, 164, 173
 - skills training, 268, 270
 - strategies, 343, 348–349
- communication privacy management theory, 106
- community, 257
- Comskil training, 271–272, 276
- conflict, 160–161, 175, 317
- constant comparative technique, 118
- coping strategies, 254, 259
- criticism, 254, 259

- death, 207
- decision-making, 15, 144
- dementia, 171, 178, 327
- depression, 188, 224, 231, 238, 296, 300, 334–335, 338, 349
- diet, 13, 49, 59, 66, 117, 130
- disclosure. *See* self-disclosure
- disclosure decision-making model, 93, 95
- dual control model, 349
- dyadic coping, 223, 225, 231, 237–238

- elder care, 160
- empathy, 223, 271, 277
- end-of-life conversations, 271
- end-of-life decisions, 144, 162
- exercise, 13, 49, 53, 59, 66, 117, 130

- family communication, 19, 116, 129, 162, 206, 277, 293
- family communication patterns theory, 291, 304
 - conformity orientation, 291–292, 299
 - conversation orientation, 291, 293, 299
- family history, 13
- financial burden, 84
- first-degree relative, 13, 16, 19
- friends, 93–94, 105, 107

- genetic counseling, 17, 21, 24
- goals, plans, and action theory, 268
- Goffman, Erving, 32
- Goldsmith, Daena, 337

- grief, 200–201, 203, 209
grounded theory, 18, 77
- health behavior, barriers to, 127
health campaigns, 2
health disparities, 3
health information, sources of, 122
health interference, 186–188, 191, 194
health risk, 17
health care provider, 31, 40, 44, 66, 88
heart disease, 184
hegemonic masculinity, 41, 44
heteronormative passing behaviors, 36, 41
humor, 343
- impression management, 32
 passing, 33
influence, 2, 4, 14–15, 49, 66, 116, 185
 control, 14, 22
 facilitation, 141, 186
 family, 19
 interference, 141, 186
 modeling, 131
 romantic partner, 42, 50
 spousal, 15, 18–21
information management, 5, 95, 165, 176
information seeking, 116, 124, 130
interdependence, 4, 23, 50, 53, 142, 185, 223
intervention, 53, 115, 131, 176, 261, 268, 292, 350
intimacy, 346
involvement, 41
- Kirkpatrick model, 273
- Memorial Sloan Kettering, 270, 272
mental illness, 93–94, 97, 105
minority stress theory, 223
model of disclosure decision making in a single
 episode, 95
modeling, 14
mortality, 209
multilevel model, 58, 233
- normative approach, 337, 349
nurses, 266–267, 272, 282
- obesity, 115
oncology, 267, 270, 272
- parent–child relationship, 115
parenthood, 246, 260
partner burden, 185, 189, 191, 194
partner interference, 141, 144, 152, 185, 188, 191
patient-centered care, 267
physiological model of stress, 315
- postpartum depression, 246–247, 249, 260
privacy management, 5, 82, 87, 208, 210, 214
problematic integration theory, 164, 170
- reciprocity, 96, 99, 104, 108, 142
relational turbulence, 186
relational turbulence theory, 140, 152, 185, 193, 261
relationship maintenance, 53, 55, 63–64, 66, 293
relationship satisfaction, 50, 54, 57, 59, 232
relationship talk, 51
resilience, 296, 300
revelation risk model, 93, 95
risk-reducing behaviors, 20–21
risk-taking, 14
- same-sex romantic relationships, 30
secrets, 167, 175
self-disclosure, 5, 31, 94, 153, 165, 261
 perceived risk, 96
 recipient response, 96, 99, 105
self-efficacy, 15, 277, 279, 293
self-esteem, 297, 300, 340, 350
self-harm, 212
sensitization, 316–317
sexual assault, 95
sexual dysfunction, 335
sexual intimacy, 84, 334, 349
 initiation, 342
sexual orientation, 223
 coming out, 224
 health disparity, 38, 43
 heteronormative passing behaviors, 30
 LGBTQ, 30, 32
 relevance to healthcare, 39
 self-disclosure, 30, 36
sexual satisfaction, 335
siblings, 160–161, 176
social control, 17, 49, 52, 55, 63–64, 66, 130
social isolation, 144, 341
social networks, 14
sociolinguistic theory, 269
stigma, 30–32, 36–37, 86, 97, 261
stress, 162, 170, 184, 200, 207, 223, 238, 248, 259, 316,
 321, 323
 desensitization, 318, 328
 gender differences, 226, 240
 sensitization, 317, 328
 sexual minority, 225–226
stress sensitization hypothesis, 322
structural equation model, 192, 302
support, 14, 18, 74, 86, 88, 96, 99, 103, 107, 109, 203,
 226, 255, 259–260, 327
 diet and exercise, 57, 64
 family, 203
 informational, 211

invisible, 15, 22	uncertainty, 5, 83, 86, 162–163, 175, 200, 207
lack of, 83	illness, 185–188, 190, 194
peer, 211	intolerance of, 201
support matching hypothesis, 215	relational, 141–142, 152, 186, 188
systemic transactional model of stress and	uncertainty management theory, 202, 213
coping, 225	uncertainty reduction theory, 164
topic avoidance, 73, 78, 85, 96, 101, 104–105, 108,	verbal aggression, 316, 319, 322–323
166, 174, 185, 187, 189, 191, 194, 212, 346, 348	vulnerability–stress–adaptation model, 228
traits of health, 118	
type 2 diabetes, 73, 85, 88	weight, 13, 49, 53, 117, 188
symptoms and complications of, 81	worry, 18–19, 21, 23, 74
