- Arriaga, Ximena, 222, 224–235
 Attachment theory and relational ambivalence, 83
- Biological systems, 170–172
 Biomedical model, 43, 51, 52, 53, 292, 293
 Bodily defense responses, 215–218
 Bodily doubt, 201
 Body alienation, 205
 Body as disconnected from psychoemotional, 210
 Body as objectively measured, 209
- Caughlin, John, 89, 113
 Changing expectations, 112
 Close relationship processes, 64–66
 Co-constructing communication, 277–282
 Co-generativity through reflection, 294–296
 Communication
 Communication accommodation and health disparities, 188
 Communication influence processes, 95–107
 Communication privacy management theory, 236–245
 Communication processes and close relationships, 87–92
 Communicative process and everyday conversation, 150
 Compassionate love, 142–145. *See also* Love
 Competing demands in close relationships, 107
 Complexities in definitions as emergent, 309–318
 Complexity theory, 272
 Conceptualizing close relationships and health and illness, 59
 Constitutive communication, 274–277
 Constitutive communication in close relationships, 282
 Coping, 130
 Cultural context of health and illness, 39–42
- Dark side of close relationships, 97
 Dilemmas of intimacy. *See* Emergence in dilemmas of intimacy
 Disability, 278–282
 Disability communication, 277–282
 Disability salience in close relationships, 187
 Disclosure. *See* Communication privacy management theory
 Disease, 21
 Disparities, overall 10, 8, 30, 34, 36, 167, 312, 318, 319
 Disparities in health and illness, 176–187
 Duality between biological and lived body, 208
 Duggan, Ashley, 55–58, 97–107
 Dyadic theories, 222
- Embodiment conceptualized, 197
 Emergence, theoretical conceptualization
 Emergence co-generativity in theory, 323
 Emergence and language, 285
 Emergence in close relationships, 287–289
 Emergence in dilemmas of intimacy, 301–304
 Emergence through reflection, 294–296
- Emotional bonds, 75–81
 Emotional suppression, 80
 Emotions and illness challenges, 124
 Engaged theorizing, 263
 Expression-based authenticity doubts model, 92–95
- Fehr, Beverly, 79, 80, 142, 143, 144,

- Finkel, Eli, 62, 63, 70, 71, 73
- Gaines, Stanley, 81–83
- Health and illness
 Context for relationship research, 58
 Initial definition, 20–30
- Health promotion, 27
- Human development, 66
- Identity and illness progression, 119
- Illness
 As lived experience, 198–202
 Sensations in the body, 202
- Illness identity, 123, 190
- Inconsistent nurturing as control theory, 98–107
- Individual differences, 81
- Inequalities, 8, 29, 30, 31, 37, 177, 273, *See also* Disparities
- Interaction design, 289
- Interdependence theory, 224–235
- Interdisciplinary, 308
- Inter-group
 Communication and disability, 186
 Racial orientation, 183
 Perspective identified, 188
- Knobloch, Leanne
 Depression, 137
 Relational turbulence, 246–259
 Uncertainty, 115–117
- Labyrinth, 268
- Language and body alienation, 211
- Language limitations and construction of meaning, 290
- Lemay, Edward, 92, 93, 94, 95
