<i>Preface to the Second Edition</i>	<i>page xi</i>
<i>Acknowledgments</i>	<i>xiii</i>
Part I Introduction and Fundamental Concepts	1
1 Desert Dune Systems	3
1.1 Dunes as Complex Systems	3
1.2 Dune Systems	5
1.3 The Concept of Sediment State	7
1.4 The Quaternary Legacy	10
1.5 Development of Modern Dune Studies	10
Part II Dune Morphology and Sediments	13
2 Dune Morphology	15
2.1 Introduction	15
2.1.1 Aeolian Bedform Hierarchies	15
2.2 Dune Classifications	18
2.3 Major Dune Morphological Types	21
2.3.1 Crescentic Dunes	21
2.3.2 Linear Dunes	30
2.3.3 Star Dunes	36
2.3.4 Dome Dunes	41
2.3.5 Parabolic Dunes	41
2.3.6 Nebkhas	44
2.3.7 Sand Sheets and Zibars	44
2.3.8 Topographically Controlled Dunes	46
2.3.9 Source-Bordering Dunes	47

vi	<i>Contents</i>	
3	Dune Sediments	49
	3.1 Mineral Composition	49
	3.2 Grain Size and Sorting	51
	3.2.1 Conceptual Models for Grain Size and Sorting	52
	3.2.2 Grain Size and Sorting Characteristics of Different Dune Types	54
	3.3 Grain Shape	61
	3.4 Sand Color	63
	3.4.1 Spatial Variations in Dune Color	65
	3.5 Dune Sedimentary Structures	66
	3.5.1 Sedimentary Structures of Major Dune Types	69
	Part III Dune Processes and Dynamics	85
4	Sand Transport by Wind	87
	4.1 Introduction	87
	4.2 The Surface Wind	88
	4.3 The Sand Transport System	90
	4.3.1 Entrainment of Sand by the Wind	91
	4.3.2 Saltation Trajectories	92
	4.3.3 Modification of the Wind Profile by Saltating Grains	94
	4.3.4 Mass Flux of Sand	96
	4.3.5 Controls on Mass Flux	98
	4.3.6 Spatial and Temporal Changes in Sand Transport Rates	101
	4.4 Wind Ripples	101
5	Airflow and Sand Transport on Dunes	107
	5.1 Introduction	107
	5.2 Airflow over Dunes	109
	5.2.1 The Stoss or Windward Slope	110
	5.2.2 The Lee Side	113
	5.2.3 Lee Airflow on Linear Dunes	116
	5.2.4 Airflow over Star Dunes	121
6	Dune Dynamics	122
	6.1 Erosion and Deposition Patterns on Dunes	122
	6.1.1 Stoss (Windward) Slopes	122
	6.1.2 Lee Face Deposition	124
	6.2 Erosion and Deposition Patterns on Different Dune Types	128
	6.2.1 Crescentic Dunes	128
	6.2.2 Linear Dunes	129
	6.2.3 Star Dunes	134

<i>Contents</i>		vii
6.3	Annual to Decadal Timescales of Dune Change	137
6.3.1	Rates and Temporal Patterns of Dune Migration and Extension	138
6.4	Long-Term Dune Dynamics	142
6.4.1	Numerical Modeling of Dune Dynamics	143
6.4.2	Dune Initiation	145
6.4.3	Dune Growth	148
Part IV Boundary Conditions for Dune Formation and Development		151
7	Controls of Dune Morphology	153
7.1	Introduction	153
7.2	Factors That Determine Dune Morphology	153
7.2.1	Wind Regime	154
7.2.2	Sand Supply	157
7.2.3	Influence of Vegetation	158
7.2.4	Sediment Characteristics	161
8	Controls of Dune Orientation	163
8.1	Gross Bedform-Normal Rule	163
8.2	Bed Instability and Fingering Modes of Dune Type and Orientation	165
8.3	Superimposed Dunes and Complex Patterns	169
8.4	Influence of Sediment Characteristics	174
9	Controls of Dune Size and Spacing	175
9.1	Dune Height and Spacing Relationships	175
9.2	Grain Size Effects	176
9.3	Airflow Effects	178
9.4	Controls of Dune Size	179
9.5	Dune Spacing as a Product of Self-Organization and Pattern Coarsening	180
9.6	Influence of Sediment Source and Dune Field Geometry	182
10	Response of Dune Systems to Changing Boundary Conditions	186
10.1	Dune Activity	186
10.2	Empirical Studies of Responses to Changing Boundary Conditions	188
10.2.1	Late Holocene and Historical Record of Dune Activity	188
10.2.2	Decadal Scale Changes	191
10.3	Climatic Indices of Dune Activity	195

10.4	Eco-geomorphic and Landscape-Scale Approaches	196
10.5	Reorientation of Dunes in Response to Changing Wind Regime	200
Part V Sand Seas and Dune Fields		203
11	Characteristics and Distribution of Sand Seas and Dune Fields	205
11.1	Introduction	205
11.2	Global and Regional Distribution of Sand Seas and Dune Fields	205
11.3	Boundary Conditions for Sand Seas and Dune Fields	212
11.3.1	Relations to Topography	212
11.3.2	Wind Regimes	216
11.3.3	Relations to Tectonics	218
11.4	Sediments of Sand Seas	220
11.4.1	Sources of Sand	221
11.4.2	Sand Thickness and Volume	221
12	Dune Patterns in Sand Seas and Dune Fields	226
12.1	Patterns of Dune Morphologic Types	226
12.2	Analysis of Dune Patterns	231
12.3	Controls of Dune Patterns	235
12.4	Dune Pattern Development	236
13	Formation of Sand Seas and Dune Fields	240
13.1	Conceptual Framework	240
13.2	Models for the Development of Sand Seas	241
13.3	Timescales for Sand Sea and Dune Field Development	247
Part VI Dune Systems in Time and Space		251
14	Ancient Dune Systems: The Rock Record	253
14.1	The Stratigraphic Record of Aeolian Deposits	253
14.2	Examples of Ancient Aeolian Sandstones	257
14.3	Reconstruction of Ancient Dunes and Their Wind Regimes	259
14.4	Preservation Potential of Modern Sand Seas and Dune Fields	260
15	Quaternary Paleodune Systems	263
15.1	Occurrence of Paleodune Systems	263
15.2	Chronology of Paleodune Systems	266
15.3	Interpretation of Luminescence Datasets	272
15.4	Paleoclimatic Inferences from Paleodune Systems	272

<i>Contents</i>		ix
16	Planetary Dune Systems	281
16.1	Mars	281
16.1.1	Active Dunes and Sand Fluxes	284
16.1.2	Martian Dune History	285
16.2	Venus	285
16.3	Titan	286
16.4	Pluto	287
Part VII Conclusions		289
17	Review and Prospects	291
17.1	The Current State of Desert Dune Knowledge	291
17.2	Future Prospects	293
	<i>References</i>	296
	<i>Index</i>	331

Color plates can be found between pages 106 and 107.
