

## Index

- abduction, 57–59
- absence of evidence vs. evidence of absence, 108, 162
- accuracy vs. parsimony, 239, 241
- ad hoc hypotheses, 27, 239–240, 243, 480–482
- Albertus, Michael, 299–325
- Allison, G.T., 584
- analytic narratives, 402
- Argentina, 273–275
- avians
  - Eclectus roratus*, 15
  - Amazonian bellbird, 134
  - cardinal gynandromorph, 15
  - squawkzilla, 591
- background information, 17, 74, 77, 145, 217–218, 276, 277, 280, 325
- Bayes' factor, 77, *see also* likelihood ratios
- Bayes' rule, 18, 44–46, 74, 76, 451
  - log-odds form, 20, 126, 128
  - odds-ratio form, 76
- Bayes' theorem, *see* Bayes' rule
- Bayesian model comparison, 243–255
- Bayesian reasoning
  - explicit Bayesian analysis, 19–21
  - heuristic, 16–19
- Bayesianism
  - logical, 4, 7, 13–14, 39–41
  - subjective, 13, 473
- Beach, Derek, 405
  - and Rasmus Pedersen, 450–454, 512
- Bennett, Andrew, 103, 124, 513, 518
  - Alexander George and, 572
  - and Jeffrey Checkel, 7, 23, 86, 159, 161, 311, 328, 500
- Berger, James, and Donald Berry, 99
- bias, 383, 415, 416, 418, 420, 433
  - cognitive, 13, 27, 105, 300, 472, 478–480, 482, 490–498, 559
  - instrumental, 30, 154, 451, 453, *see also* evidence, testimonial selection, 418, 419
- Boas, Taylor, 571, 580–581
- Boolean logic, 13, 14, 34–39, 385, 404, 408, 410, 445
- Bowers, Jake, et al., 495–496
- Brady, Henry, and David Collier, 581
- causal mechanisms, 80, 159, 270, 311, 388, 401, 405–408, 574–577, 635
- causal narrative, 401
- causal-process observations (CPOs), 391–393
- certainty, 508–509, 516–518
- cherry-picking evidence, 499
- Chile, 143–159, 189–199, 246–255, 277–282
- Christie, Agatha, 3, 241–242
- Collier, David, 511, 512
- comparative analysis, 8, 171, 203, 217–220, 327, 383, 391, 399, *see also* comparative historical analysis
- comparative historical analysis, 171, 402, *see also* Kurtz, Marcus, *see also* Slater, Dan
- conditional probability, 32
- conditionalization, 44, *see also* Bayes' rule
- conditioning information, 32
- confounding variables, 415, 416, 438, 455, 573–574
- congruence method, 400–401
- conjunction rule, *see* product rule
- control variables, 300, 392, 419
- control, experimental, 435–440, 554, 571–573
- counterfactuals, 359–360, 409
- Cox, R. T., 13, 32
- Cox–Jaynes axioms, 14, 39
- cross-case analysis, 387–397
- crucial cases, 29, 564, 581–584, 601
- crucial experiment, 429, 572, 581, 597
- Darwin, Charles, 328, 443
- dataset observations (DSOs), 391, 393
- decibels, 20, 130
- deductive logic, *see* Boolean logic
- deductive reasoning, 27, 57–59, 463
- Dimitrov, Radoslav, 119–120, 625–626
- disjunction rule, 41–43
- Eckstein, Harry, 581, 582, 587, 590
- Egypt, 299–325
- equifinality, 405

- evidence, 101–105  
 accuracy of, 451–454  
 anecdotal, 102  
 circumstantial, 634  
 independent vs. new, 475–478  
 old vs. new, 27, 463–467, 470–474  
 testimonial, 109–111, 143, 151–152, 154–155,  
 158–159, 276, 277, 280–281, 439, 451, 454  
 evidence of absence, 108, 162, 575, 642, *see also*  
 absence of evidence  
 expected information gain, 28, 29, 534–536,  
 564–567, 584, 597, 601  
 experimental research, 412–440  
 experimentum crucis, *see* crucial experiment
- Fairfield, Tasha, 122, 143–161, 246–255, 277–282,  
 529–532, 569, 573, 576  
 false negatives, 514, 542  
 false positives, 514, 515, 542  
 Fashoda crisis, 282–299  
 frequentism, 8–9, 24–25, 27, 335–381, 415, 418,
