- argument from choice, 4, 156, 160, 183–186
- argument from coherence, 4, 153–155, 156, 212, 214
- argument from simplicity, 3, 35–38, 156, 211, 213
- astrology, 215, 217, 224
- Barnes, Eric  
 on ad hocness, 120, 122  
 on prediction in periodic table, 78, 86–87, 91  
 on simplicity, 18
- base rate fallacy, 49–51
- basic predicate, 222
- Bayesianism, 50, 58, 64, 76, 77, 79–81  
 Bayes's theorem, 50 note 13, 56–57  
 simplicity, and. *See* simplicity
- BBT. *See* Big Bang theory
- Big Bang theory, 142, 145–148, 149, 150–152, 154
- Bohr–Sommerfeld model of the atom, 8–9, 95–96,  
 103–116, 117–118, 152–153, 194–195, 202  
 electron spin, 104, 112, 113–115, 194  
 fine structure of hydrogen, 41, 104, 107, 110, 113  
 Pickering–Fowler series, 106  
 Stark effect, 104, 106–107, 112
- Brush, Stephen  
 on Einstein's light-bending prediction,  
 81–83, 163  
 on periodic table, 86–88, 90, 116–117
- Callender, Craig, 48, 52, 55, 58, 63–65,  
 68, 211
- Carnap, Rudolf, 205–209
- Cartwright, Nancy, 56
- CCAH. *See* coherentist conception of ad hocness
- CCH. *See* continual matter creation hypothesis
- CCV theory of helical x-ray diffraction, 166–168
- Chang, Hasok, 204 note 10
- chemical elements, 70, 86–87, 91–93, 105, 130, 158,  
 168–169
- coherence. *See* coherentist conception of ad  
 hocness
- coherentist conception of ad hocness, 132–142,  
 150–154,  
 comparative novel success. *See* novel success
- concept clarification, 189, 204–209
- conflict thesis, 54–55
- consistency/inconsistency, 5, 7, 14, 20, 31–32, 36,  
 44, 53, 57, 59, 76–77, 96–97, 103, 110, 114,  
 126–127, 133–134, 146, 151, 152, 158, 162, 172,  
 177, 179, 198, 202–203, 218  
 external, 7–11, 31, 52, 62–63, 156–157, 168,  
 173, 182
- continual matter creation hypothesis,  
 146–148, 151
- contradictions, 87–91
- convergence arguments  
 fake convergence, 177  
 involving witnesses, 56–57
- Copernicus, Nicolaus  
 Copernican system of astronomy, 10, 13, 53,  
 132–137, 154, 158, 202–203, 214
- correspondence theory of truth. *See* truth

 on theory pursuit vs. theory acceptance, 156–158
- Vickers, Peter  
 on consistency/inconsistency, 9–11  
 on PMI, 41–43, 46–47
- Vine–Matthews–Morely hypothesis, 158, 171–173
- virtue convergence, 52, 65–67
- virtuous arguments for realism  
 First. *See* argument from simplicity  
 Second and central. *See* no-virtue-coincidence argument  
 Third. *See* argument from coherence
- Fourth. *See* argument from choice
- Votsis, Ioannis, 44, 45
- Watson, James, 164–168, 183
- Weinberg, Steven, 14, 16, 83–84, 124, 173–183
- Wittgenstein, Ludwig, 220–222
- Woit, Peter, 218
- Worrall, John  
 on coin-flipping examples, 78–79  
 on methodology, 192  
 on periodic table, 86–88, 90  
 on use-novel success, 19, 69–74, 79, 81, 90, 92–93, 97, 122–123, 130, 200  
 on wave theory/white-spot prediction, 76, 128  
 structural realism, 42
- x-ray diffraction, 165–166, 183
- zebra pattern of magnetic anomalies, 172, 184
