Index

α-helical wing domain (HWD), 88
3D acquisition, 39
5′ UTR region, 137
5-methyl-cytosine (5mC), 53

A2 domain, 104
AAA+ ATPases, 83
AAA+ family of proteases, 75
AAA+ proteases, 11, 76
abnormal DNA methylation, 53
acquisition loop, 39
activator/reporter dyes, 29
active power stroke mechanism, 84
active power stroke model, 81
adenylate kinase, 68–9
Adk, 70
AdoMetdependent MTase M.TaqI, 51
AdoYnTAMRA, 54, 55
AFM, 102
AFM-based force spectroscopy, 116
AFM-based single-molecule force spectroscopy, 115
AFM cantilever, 114
AFM force mapping, 120
AFM piezoelectric actuator, 97
AFM pulling, 103
AFM single-molecule force data, 98
AFM single-molecule force measurements, 105
AFM tip motion for approach, 117
AlexaFluor, 129
antibodies, 129
antigen stimulation, 30
A-protein interactions, 102
Ashkin, Arthur, 4, 67, 83
artifact correction, 33
atomic force microscope (AFM), 97
atomic force microscopy, 4, 112
atomic sorce spectroscopy, 114
ATP hydrolysis, 70, 85
ATP regulation, 72
ATPase cycle, 85
ATP-dependent binding of client proteins, 71
ATP-regulated chaperones, 71, 73
automatic fluorescence microscopy, 38
auxiliary protein, 80
Avogadro number, 112

BAC sequence, 58
backtracking, 115
bacterial resistance, 127
bacteriophage, 130
barcode, 49–50, 58
Bayesian approach, 26
B-cell lymphocyte experiments, 30
Bennett acceptance ratio method, 101
Binnig, Gred, 4
biochemical assays, 77
biological marker, 111
biomarkers, 138
biomedical imaging, 21
biomedicine, 9
biomolecule behavior, 105
biomolecules, 97–8, 117
biopolymers, 97
BiP (BiP) chaperone, 84–5
BiP dynamics, 85
BiP-MJ0366 complex, 86
bisulfite sequencing, 53
Boltzman constant, 99
Brownian motion, 84

CAM server, 45
cancer development, 127
cantilever, 116
capture-DNA probe, 118
cardiovascular diseases, 111
Cas9 nuclease, 39
CBC, 32
CBC analysis, 31
cell death, 57
cell population, 131
CellProfiler, 39
cellular architecture, 25
channels, 81
chaperone response, 71
charge-coupled device (CCD) camera, 83
charged linker, 73
chromatic aberration corrections, 29
chromatin assembly dynamics, 7
chromatin remodeler proteins, 134
chromatin remodeling, 132
Chu, Steven, 4
Clus-DoC, 31
cluster algorithm, 26
cluster analysis, 25
clustered regularly interspaced short palindromic repeats (CRISPR), 10, 38
clustering and colocalization methods, 33
c-Myc, 133
coarse-grained model, 84
complementary metal–oxide–semiconductor (sCMOS) camera, 42
