

ADVANCED RESEARCH METHODS FOR THE SOCIAL AND BEHAVIORAL SCIENCES

Written by an interdisciplinary team of global experts covering diverse research methods – including research design, research tools, and statistical techniques – this volume focuses on advanced research methods for anyone working in the social and behavioral sciences. The information needed to perform research in the laboratory, the field, or online is mapped out to provide specific applications and tools in applying each method. The issues surrounding reliability, validity, and obtaining consent are explained alongside detailed descriptions of the impact of preknowledge on participant behavior, the ways researchers unintentionally influence participants, and tips for administering suspicion probes and debriefings. The book then lays out biophysiological measures, eyetracking methods and technologies, the construction of questionnaires, and reaction time methodologies without assuming too much prior knowledge. The basics of Bayesian analysis, item response analysis, social network analysis, and meta-analysis are also summarized as the editors combine innovative methods and statistics to showcase how to perform quality research.

JOHN E. EDLUND is Associate Professor of Psychology at the Rochester Institute of Technology, USA, and serves as the Research Director of Psi Chi: The International Honor Society in Psychology. He has won numerous awards related to teaching and is passionate about the dissemination of psychological knowledge to the world.

AUSTIN LEE NICHOLS is the Director of Research for the Connection Lab in San Francisco, USA. Prior to this, he worked in various faculty positions around the world in both psychology and management. He has won awards for his teaching, research, and service from various international organizations.

Dedication

I dedicate this book to my awesome wife and children. Without you, all that I have and do would not be possible.

John E. Edlund

First, I would like to dedicate this book to the person who provided the greatest support for me through the editorial process, my wife. I would also like to thank the countless people who provided input or feedback along the way as well as my coeditor, John Edlund, for his persistence and patience throughout the process.

Contents

List of Figures page ix

List of Tables xi

List of Contributors xii

Chapter 1 A Brief Orientation to Research Methods and Statistics
for the Social and Behavioral Sciences 1

John E. Edlund and Austin Lee Nichols

Part One: Performing Good Research 19

Chapter 2 Reliability and Validity of Measurement in the
Social and Behavioral Sciences 21

Michael F. Wagner and John J. Skowronski

Chapter 3 Performing Research in the Laboratory 38

Austin Lee Nichols and John E. Edlund

Chapter 4 Field Research 53

Sinikka Elliott

Chapter 5 Using the Internet for Research 68

Rosanna E. Guadagno

**Part Two: Understanding Issues Present Throughout
the Research Process** 83

Chapter 6 Issues in Informed Consent 85

David S. Festinger, Karen L. Dugosh, Esther Choi, and Chloe Sierka

Chapter 7 Participant Preknowledge and Attitudes in Research 103

Elena C. Papanastasiou

Chapter 8 Experimenter Effects 115

David B. Strohmets

Chapter 9 Suspicion Probes and Debriefing in the Social
and Behavioral Sciences 129

Ginette C. Blackhart and Travis D. Clark

Contents

- Part Three: The Social and Behavioral Scientist's Toolkit** 145
- Chapter 10** Physiological Measures 147
Eric J. Vanman and Michael C. Philipp
- Chapter 11** Eyetracking Research 168
Jeff B. Pelz
- Chapter 12** Questionnaire Design 191
Heather M. Stassen and Heather J. Carmack
- Chapter 13** Reaction Time Measures in the Social and Behavioral Sciences: Speed Matters 209
Jeremy D. Heider and Jason T. Reed
- Part Four: Emerging Issues in Social and Behavioral Science Research** 227
- Chapter 14** Replications and the Social and Behavioral Sciences 229
Courtney K. Soderberg and Timothy M. Errington
- Chapter 15** Research Ethics for the Social and Behavioral Sciences 244
Ignacio Ferrero and Javier Pinto
- Chapter 16** Interdisciplinary Research 258
Rachel Adams Goertel, James P. Goertel, and Mary G. Carey
- Chapter 17** Cross-Cultural Research 274
Fons J. R. van de Vijver
- Part Five: New Statistical Trends in the Social and Behavioral Sciences** 287
- Chapter 18** A Gentle Introduction to Bayesian Statistics 289
Milica Miočević and Rens van de Schoot
- Chapter 19** Development and Applications of Item Response Theory 309
Clifford E. Hauenstein and Susan E. Embretson
- Chapter 20** Social Network Analysis 328
Sebastian Leon Schorch and Eric Quintane
- Chapter 21** Meta-Analysis: An Introduction 346
Gregory D. Webster
- Appendix A Metafor Package R Code for Meta-Analysis Examples 365
- Index 368

List of Figures

- 1.1** The normal curve 7
- 1.2** Positive and negative skew 8
- 1.3** Types of kurtosis 8
- 1.4** Type 1 and type 2 errors 9
- 10.1** Components of the skin conductance response (SCR) 151
- 10.2** An example of a facial EMG recording setup 154
- 10.3** A typical EEG waveform showing several ERP components 159
- 10.4** From stimulus to the BOLD response, as recorded by fMRI 161
- 11.1** Extraocular muscles 169
- 11.2** Directions of eye movements 170
- 11.3** Horizontal and vertical eye position as a function of time 171
- 11.4** Smooth pursuit eye movement with “catch-up” saccades 173
- 11.5** Vestibular-ocular response (VOR) eye movements 174
- 11.6** Five-second gaze orientation record 176
- 11.7** Remote eyetracker mounted below computer monitor (Tobii Pro Spectrum) 177
- 11.8** Remote eyetracker mounted below computer display (LC Technologies EyeGaze Edge EYEFOLLOWER) 177
- 11.9** Tower eyetracker (EyeLink 1000 Tower) 178
- 11.10** Wearable eyetracker (Positive Science) 179
- 11.11** Wearable eyetracker (Tobii) 179
- 11.12** Wearable eyetracker (Pupil Labs) 180
- 11.13** Frame of output video from wearable eyetracker (Positive Science) 180
- 11.14** Oculus Rift with integrated eyetracker (Pupil Labs) 181
- 11.15** Frame from virtual environment 181
- 11.16** View from scene camera 182
- 11.17** Average gaze location with 0° (left) and 2° (right) inaccuracy 183
- 11.18** Gaze locations with 0° average inaccuracy and high (left) and low (right) precision 183
- 11.19** Accuracy and precision in eyetracker data 184
- 11.20** Temporal order effects on precision measures 184
- 18.1** Proposed mediation model for predicting the delay in PhD completion 291
- 18.2** Diffuse normal prior assigned to intercepts and regression coefficients 294
- 18.3** Trace plots for parameters in the single mediator model 296
- 18.4** Posterior for the mediated effect with point summaries (mean and median), and interval summaries (equal-tail and highest posterior density credibility intervals) 297

List of Figures

- | | | | |
|-------------|---|-------------|---|
| 18.5 | Plots of weakly informative and informative priors for the regression coefficients a , b , and c' 301 | 19.5 | Example item characteristic curves derived from the 3PL model 316 |
| 18.6 | Posteriors for the coefficient c' with different prior precisions tested in the sensitivity analysis 304 | 19.6 | Example category response curves derived from the GRM 318 |
| 19.1 | Example item characteristic curves derived from the Rasch model 312 | 19.7 | Example category response curves derived from the PCM model 319 |
| 19.2 | Item information function for a Rasch item plotted alongside the item characteristic curve 313 | 19.8 | Log-likelihood function (with respect to θ) 321 |
| 19.3 | Test information function and standard error of measure 313 | 20.1 | Social network research map 329 |
| 19.4 | Example item characteristic curves derived from the 2PL model 315 | 20.2 | Network data in matrix format 334 |
| | | 20.3 | A network graph 335 |
| | | 20.4 | Triad isomorphism classes 338 |
| | | 21.1 | Proportion of meta-analysis articles published in <i>Psychological Bulletin</i> (top) and <i>JAMA</i> (bottom), 1980–2017 347 |

List of Tables

- | | | | | | |
|-------------|---|-----|-------------|---|-----|
| 2.1 | Example of a multitrait-multimethod correlation matrix from Mount | 31 | 18.4 | Abbreviated form of the WAMBS checklist by Depaoli and Van de Schoot (2017): <u>When to Worry</u> and how to <u>Avoid the Misuse of Bayesian Statistics</u> | 305 |
| 18.1 | Summaries of marginal posteriors from the analysis with uninformative priors | 298 | 19.1 | Comparisons of measurement properties between CTT and IRT | 310 |
| 18.2 | Summaries of marginal posteriors from analyses with weakly informative and informative priors | 302 | 21.1 | Self-esteem instability correlations, alphas, corrected correlations, and moderators | 355 |
| 18.3 | Results of the sensitivity analysis | 304 | | | |
