AI: Artificial Intelligence
  Definition, 8
  Ethics and Artificial Intelligence in Public Health Social Work, 231
  History, 8
  Improving access to sexual health necessities for youth homelessness, 136
  Predicting intimate partner violence (IPV) perpetration, 195
  Why we need AI, 28
ARISEN: Approximating with Random walks to Influence a Socially Explored Network
  Algorithm, 80

CAIS: University of Southern California (USC) Center for Artificial Intelligence in Society
  Motivations, 4

Diabetes Patients Predictive Modeling of Stress
  Aims of the project, 157
  Conclusion, 166
  Data description, 154
  Experimental results and discussion, 162
  Experimental setup, 158
  Introduction and statistics, 153
  Neural networks, 159
  Predictive modeling of stress, 153
  Type 2 diabetes (T2D), 153

DIME: Dynamic Influence Maximization Under Uncertainty
  Defined, 39
  Problem statement, 43
  Solver, 42
DOSIM
  Algorithm for DIME problem, 50
  Have You Heard? algorithm, 16, 16

Ethics and Artificial Intelligence in Public Health Social Work, 231
  Case Study: TND Network for Homeless Youth, 233
  Framework for resolving conflicts, 240
  Introduction, 231
  Moral duties and beneficence program, 236
  Operationalizing the framework, 244
  TND: Towards No Drug Abuse, 233

Foster youth
  Multidisciplinary study on the relationship between foster care attributes and Posttraumatic Stress Disorder Symptoms (PTSD) on foster youth, 169
  PTSD symptoms among youth with homelessness and foster care histories, 170

GOFAI: Good Old-Fashioned AI
  Defined, 9
Grand Challenges of Social Work, 5

More Information

Have You Heard?
  Behavioral intervention, 16
HEALER: Hierarchical Ensembling Based Agent
  Construction, 43
  Design, 41
  Have You Heard? algorithm, 16
  Influence model, 45
  Solution to DIME problem, 39
  Uncertain network, 43
HIV: Human Immunodeficiency Virus
  Prevention for homeless youth, 26
  Prevention via social networks, 27
  Raise awareness via social networks, 38
  Risk in homeless youth, 23
  Young men who have sex with men (YMSM), 24
Homelessness
  Causes of youth homelessness, 19
  Couch surfing, 17
  Extent of youth homelessness, 17
  LGBT youth, 20
  Travelers, 20
  Violence, 21

Improving access to sexual health necessities for youth experiencing homelessness using AI
  Discussion and conclusions, 149
  Greedy approach approximation guarantees, 144
  K-Center problem, 137
  Population estimation, 145
  Proposed approach, 142
  Results, 148
  Smart kiosks, 136
Influence maximization in the field, 57
  Conclusion, limitations, and lessons learned, 74
  Introduction, 57
  Pilot study pipeline, 59
  Pilot study process, 60
  Results, 63
Influence maximization with unknown network structure, 77
  ARISEN: Approximating with Random walks to Influence a Socially Explored Network Algorithm, 80
  Exploratory influence maximization, 78
  Introduction, 77
  Local information, 78
  SBM: Stochastic Block Model, 79
Intimate partner violence (IPV) perpetration predictions using artificial intelligence, 195
  Conclusion, 206
  Conflict Tactics Scale (CTS2), 197
  Data set description, 197
  Introduction and statistics to IPV, 195
  Methodology, 201
  Problem definition, 196
  Results, 203
  Support Vector Machines (SVM), 200

LGBT: Lesbian, Gay, Bisexual, or Transgender
  Homeless youth, 20
LGBTQ: Lesbian, Gay, Bisexual, Transgender, Questioning and Queer
  HIV, 212

Mental health
  Homeless youth, 21
Minimizing violence in homeless youth, 119
  Data collection, 121
  Difficulty in Emotion Regulation (DERS), 131
  Discussion, 129
  Experiments, 126
  Greedy minimization, 124
  Implications from social work perspective, 131
  Introduction, 119
  Multiple waves, 130
  Uncertain Voter Model (UVM), 123
  Voter Model, 123
Multidisciplinary study on the relationship between foster care attributes and Posttraumatic Stress Disorder Symptoms (PTSD) on foster youth, 169
  Data preprocessing for models, 175
  Data samples and procedures, 173
  Discussion and conclusions, 190
  Introduction and statistics, 169
  Machine learning within the social sciences, 171
  Modeling techniques and evaluations, 178
  PTSD symptoms among youth with homelessness and foster care histories, 170

POMDP: Partially Observable Markov Decision Process
Model, 48

RAAM Risk Amplification and Abatement Model
Definition, 25
Findings, 25
RAM Risk Amplification Model
Definition, 25
Findings, 25

SBM: Stochastic Block Model
Influence maximization, 79
Sexual health information on HIV/AIDS, 211
Data gathering, 215
Evaluation metrics, 221
Future work and directions, 226
Motivating social problem, 211
NPCEditor, 216
SHIELD Self-Help in Eliminating Life-Threatening Diseases
Defined, 27
Social networks
Raise HIV awareness, 38
Role in HIV prevention, 27
The importance of, 25
Social work
Definition, 7
Ethics and Artificial Intelligence in Public Health Social Work, 231
Goals, 8
Grand Challenges of, 5
Substance use
Homeless youth, 22

Travelers
Social network, 21
Subpopulation of homelessness, 20

Violence
Artificial intelligence to predict intimate partner violence perpetration, 195
Minimizing violence in homeless youth, 119

YBW: Young Black women
Algorithms for solving the maximum influence problem, 102
Conclusions and future Work, 113
Introduction and HIV statistics, 93
Mathematically modeling information diffusion, 98
Maximizing the spread of sexual health information in a multimodal communication network, 93
Quantitative network survey, 97
Results and discussion, 104
YMSM: Young men who have sex with men
HIV risk, 24
Youth homelessness
AI for improving access to sexual health necessities, 136
Causes, 19
Census, 17
Couch surfing, 17
Depression, 21
Experiences of violence (overview), 21
Extent of, 17
Greedy minimization, 124
Have You Heard?, 16
HIV prevention, 26
HIV risk, 23
Importance of social networks, 25
Minimizing violence in homeless youth, 119
Pregnancy, 23
PTSD: Posttraumatic Stress Disorder in homeless youth, 21
Sexual- and gender-minority, 20
Sexual violence, 21
Substance use/abuse, 22
YMSM: Young men who have sex with men, 24
