THE CAMBRIDGE HISTORY OF  
NATIONHOOD AND NATIONALISM

This major new reference work with contributions from an international team of scholars provides a comprehensive account of ideas and practices of nationhood and nationalism from antiquity to the present. It considers both continuities and discontinuities, engaging critically and analytically with the scholarly literature in the field. Volume 1 starts with a series of case studies of classical civilizations. It then explores a wide range of pivotal moments and turning points in the history of identity politics during the age of globalization, from 1500 through to the twentieth century. This overview is truly global, covering countries in East and South Asia as well as Europe and the Americas.

CATHIE CARMICHAEL is Professor of European History at the University of East Anglia. She has authored and edited several previous books including *Language and Nationalism in Europe*, co-edited with the late Stephen Barbour (2000) and *Genocide before the Holocaust* (2009).

MATTHEW D'AURIA is Associate Professor of Modern European History at the University of East Anglia. He is the author of *The Shaping of French National Identity: Narrating the Nation's Past, 1715–1830* (2020).

THE CAMBRIDGE HISTORY OF  
NATIONHOOD AND NATIONALISM

*Edited by*

CATHIE CARMICHAEL, MATTHEW D'AURIA, AND AVIEL ROSHWALD

The origins and nature of nationhood and nationalism continue to be topics of heated scholarly debate. This major new reference work with contributions from an international team of scholars provides a comprehensive account of ideas and practices of nationhood and nationalism from antiquity to the present. It considers both continuities and discontinuities, engaging critically and analytically with the scholarly literature in the field. The *History* also explores nationhood and nationalism's relationships with a wide variety of cultural practices and social institutions, in addition to the phenomenon's crucial political dimensions. Its wide range of regional case studies brings a truly global, comparative perspective to a field long constrained by Eurocentric assumptions. Volume I tracks turning points in the history of nationhood and nationalism from ancient times to the twentieth century. Volume II theorizes the connections between nationhood/nationalism and ideology, religion and culture. Together, they enable readers to understand the roots of and how nationhood and nationalism function in the present day.
