

Index

- abelian group 2
- adjoint 34
- adjoint representation 98
- alternating group 14
- angular momentum algebra 93–94
 - addition of angular momentum 116, 119
- antisymmetric subspace 51

- baryons 116
- bilateral axis 23

- Cartan
 - matrix 113
 - subalgebra 107
- Cauchy–Schwartz inequality 33
- Cayley’s Theorem 10
- character
 - of the group element 38
 - table 41
- circle group $U(1)$ 87
- Clebsch–Gordan coefficient 124
- commutator 91
- compact groups 95
- conformal group 117, 143
- conjugacy class 5
- conjugate subgroup 5
- coset 4
- cyclic group 2

- degenerate states 60
- dihedral group 6
- direct product 14
- double cover 101
- doubly connected space 95
- dynamical symmetry 117, 144
- Dynkin diagrams 109

- eigenfrequencies 73
- eigenvalue equation 32
- electric dipole moment 66, 68
- exceptional Lie algebra 110

- factor group 5
- Frobenius reciprocity theorem 57
- fundamental weights 113

- generating set 2
- generators 2, 89
 - constants of motion 117
- gerade 41
- Gram–Schmidt Orthogonalisation 33

- Group 1
 - continuous 88
 - direct product of groups 14
 - order of the group 2
 - properties of the group 1
 - representations 21
 - highest weight vector 108
 - homomorphism 8
 - kernel of homomorphism 8
 - hydrogen atom 117, 144
 - Runge–Lenz vector 117, 144
 - hypercharge 134
 - induced representation 54
 - inner product space 33
 - invariant subalgebra 102
 - irreducible representation 38
 - of direct product groups 52
 - irreducible tensor 124
 - isomorphic groups 9
 - isospin 116, 131
 - Jacobi identity 92
 - Killing form 101
 - degenerate Killing form 101
 - nondegenerate Killing form 102
 - Klein-4 group 3
 - Lagrange theorem 4
 - Lagrangian 72
 - Euler–Lagrange equation 72
 - level splitting 62
 - Lie algebra 92
 - Cartan subalgebra 107
 - complex 92
 - real 92
 - semi-simple Lie algebra 101
 - simple Lie algebra 103
 - compact simple Lie algebra 107
 - structure constants 92
 - Lie groups
 - general Linear groups 106
 - orthogonal groups 106
 - generalized orthogonal group 106
 - Lorentz group 116
 - symplectic group 106
 - unitary group 107
 - special linear groups 106
 - special orthogonal group 106
 - special unitary groups 107
 - linear operator 31, 96
 - linearly independent set 30
 - linear span of 30
 - Lorentz transformation 139
 - mesons 116
 - Mulliken symbols 41
 - negative roots 109
 - Noether theorem 117
 - non-abelian 3
 - norm 32
 - normal mode 73
 - normal subgroup 5
 - one-parameter group 88
 - orthogonal 33
 - particle physics 130
 - antiquarks 136
 - force carriers 130
 - gluons 130
 - photons 130
 - vector bosons 130
 - hadrons 130
 - baryons 130
 - mesons 130, 137
 - leptons 130
 - quarks 132
- permutation cycles 11
 - two-cycle, transposition 11
- permutation groups 10

- Poincare algebra 117
- Poincare group 117, 143
- point groups 9, 21
- Poisson bracket 92
- positive roots 112
- projection operator 47

- quadrupole moment 66, 68
- quark model 116, 130, 132
- quaternion group 6

- rank 107
- reducible representation 38
 - completely reducible 39
 - multiplicity of irreducible components 45–46
- regular representation 44–45
- root vectors 107
- rotational symmetry 118
 - angular momentum conservation 118

- scalar multiplication 30
- scaling transformation 32
- Schoenflies notation 23
- secular equation 73
 - secular determinant 73
- selection rules 64, 116
- self-adjoint operator 34, 60
- semi-direct product 15
- semi-simple Lie algebras 100
- similarity transformation 32
- simple group 5
- simple Lie algebras 103
- simple roots 109
- simply connected 101
- special unitary group 101
- stereographic projections 23
- structure constant 92, 105
- subalgebra 95
 - invariant subalgebra 95
