

INDEX

- Aegean amphoras, 135, 139
 Aegean Bronze Age, 8, 61–62, 82–83, 89–90
 geography and distance, 62–63
 Kalamianos, 79–82, 80–81f
 maritime communities in, 88–89
 multi-scalar framework, 67–72
 multi-scalar network model, 72–73, 74f
 Mycenaean anchorages and harbors, 67–68
 regional/intra-cultural maritime interaction sphere, 75–76
 Saronic Gulf, 73, 76–82, 77f, 78f, 80–81f
 scalar issues, 63–67, 64f
 affiliation networks, 222, 225–227f, 231f, 232, 245
Agamemnon (Aeschylus), 105
 agency, 41, 44, 96, 97, 99, 113, 117
 Agent-Based Models (ABMs), 22–23, 30
 agricultural production, 187
amphora megarica, 229
 amphoras
 Aegean amphoras, 135, 139
 archaeological setting and, 164–167, 166–167f
 basket-handle amphoras, 139, 142
 Byzantine maritime trade, 219–232, 228f, 231f
 co-occurrences of amphoras, 9
 Corinthian A amphoras, 139
 Hellenistic Rhodian amphoras, 181
 location of shipwrecks and, 12
 Massaliot amphoras, 150
 Tan Fabric Southern Ionian amphoras, 146
 Antonine Itineraries, 23
 Aperlae, 118
aphidrumata, 115
aploia, 106
 Apollo, 98, 99, 100f, 102, 116, 117
ariadne model, 30f, 30
 Artemis, 99, 102, 103, 104–105, 109, 112–113, 115, 117
 artifacts, 2, 3, 8, 13, 94, 135. *see also amphoras; tableware distribution in Roman Eastern Mediterranean*
 Athenian Agora, 166
 Athenian cups, 135
 Attic finewares, 135
 Average Weighted Distance, 36
 bipartite network, 223f, 224
 Brainerd-Robinson coefficient
 distribution of, 194–197, 195–196f, 198–199f
 overview of, 190f, 192f, 194, 212
 Braudel, Fernand, 5
 British rule on Cyprus, 11
 Bronze Age. *see also Aegean Bronze Age*
 Early Bronze Age (EBA) Cyclades, 7, 77
 Late Bronze Age (LBA), 7, 39, 103, 118
 Middle Bronze Age, 7, 39, 42, 71
 prehistoric record, 7, 9
 Bronze Age Eastern Mediterranean, 39
 Bronze Age Ugarit, 71
 Bronze and Iron Age Mesopotamia, 39
 Brownian motion, 11, 108
 bulk artifact distributions, 13
 bulky commodities, 3
 Byzantine *kommerkiarioi*, 228
 Byzantine maritime trade, 219–232, 221f, 225–227f, 228f, 231f
 cabotage, 113f, 116
 Cala Sant Vicenç shipwreck, 151
 Christianity, 87, 88
 clustering coefficients, 200, 207–208, 208f
 coast-hugging, 15
 coastscape, 73, 84, 86–87
 common sense knowledge, 107
 connectivity
 cabotage connectivity, 97, 113f, 116
 hyper-connected modern world, 1
 maximum connectivity, 110–111
 past maritime connectivity, 213
 Corinthian Gulf coast, 68
The Corrupting Sea (Horden, Purcell), 5, 72, 94, 101, 118
 cosmopolitanism, 240, 241, 249
 cross-cultural maritime interaction. *see maritime interaction*
 cultic practices, 96, 101–106, 102f, 251
 cultural interaction, 13, 15, 16, 66
 Cycladic longboat, 62
 “Dark Age” world, 119
 Demaratus the Bacchiad, 155

- Demeter Sanctuary, 165
 deterrence function, 26, 45
 Diana Ephesica, 116
 Dionysius of Halicarnassus, 155
 Directed Proximal Point Analysis (Directed PPA),
 44, 50, 51
dirigisme system, 232
 distances in social network analysis, 23–24
 distribution patterns, 211
 Dorian Hexapolis, 138
 Doubly Constrained Gravity Model (DCGM), 28
- Early Bronze Age (EBA) Cyclades, 7, 69, 77
 Early Iron Age, 10, 103
 Early Modern era, 9
 easiest networks, 44–45
 Eastern Sigillata, 187, 200, 206, 209–210,
 214–217, 246
 ecology in Mediterranean prehistory, 1–2
 economic networks. *see religious and economic networks
 in the Greco-Roman Mediterranean*
 economic organization, 84
 edges in social network analysis, 23–24
 effective distance, 42
 ego networks, 145, 147f
 Egyptian New Kingdom, 63
 Eigenvalue centrality, 33
 entropy, 41–42, 46
 environmental constraints of the sea, 3, 4, 12
 epistemic approach of entropy, 46
epiteichismata, 115
 ethnoarchaeology of maritime coastal community
 assumptions and hypotheses, 83–84
 introduction to, 83
 maritime *habitus*, 84–86, 85f
 overview of, 83–88, 85f
 peripheral status and identity formation, 87–88
 summary of, 253
 Euboian Gulf, 102–103, 104–105, 106–107
eupolia, 106
 expert knowledge, 107, 250
 exploratory network analysis, 187, 209–210, 212
 Exponential Random Graph models, 30
- face-to-face basis of ancient societies, 1, 2, 3, 73
 fishermen, 94
 Flotilla Fresco, 63
 ForceAtlas2 graph, 151, 151f, 153–154f
 Foucault, Michel, 137, 249
 fraction of effort, 71
 friendship bias, 178
- Gela shipwreck, 151
 Geographic Information Systems (GIS), 22–23, 186
 Geometric Greece, 39
 Gephi software, 151, 152–153, 223
 global network measures, 112–113, 200, 201t, 202t,
 203t, 204f, 205f, 206f
- globalization, 83, 153, 155, 247
 Goldilocks scenario, 54
 goods to market model, 138
 “grammar” (and stylistic change model), 172
 Grand Ribaud F shipwreck, 151
 gravitational pull, 71, 97
 gravity models, 26–28, 27f
 Greco-Roman Mediterranean. *see religious and eco-
 nomic networks in the Greco-Roman Mediterranean*
 Greek colonization, 12
 Greek myth, 96
 Greek polytheism, 96
- hegemon*, 114
 Hellenistic Delos, 102
 Hellenistic Rhodian amphoras, 181
 Hellenistic world, 10
 Hierarchical Clustering Methods, 33
 Hinduism, 88
 Hittite New Kingdom, 63
 human cargo, 239
 hypothetical “trade network,” 132–133
- ICRATES (Inventory of Crafts and Trade in the
 Roman East), 188, 193, 209
 identity formation, 87–88
 imperfect optimization model, 71–72
 inside-out geography, 5
 interaction distance, 73
 interactions in social network analysis, 23–25
 intermarriage ties, 249
 international spirit, 78
 interregional/intercultural maritime interaction
 sphere, 9, 48, 51, 73, 76, 82, 154
 Intervening Opportunity Model, 45, 50
 intervisibility, 73, 76, 87
 intraregional/intracultural maritime interaction
 sphere, 73, 76, 146, 147, 154, 248
 Ionian cups, 135, 142, 150
Iphigenia in Tauris (Euripides), 103, 109, 111
 Iron Age Mediterranean, 95
- Kalamianos, 79–82, 80–81f
 Kekova Adası shipwreck, 139, 142, 143f
 Kepçe Burnu shipwreck, 139
 Kerala (India) fishing communities, 84–85
 Kolonna, 77–79, 78f
krateriskoi, 104
 Kristiansen, Kristian, 242f, 242, 243
- La Méditerranée et le monde méditerranéen à l'époque de
 Philippe II* (Braudel), 5
 landscape learning, 240
 Language Change model, 172–175, 173f, 174f,
 175f, 177
 Late Bronze Age (LBA), 7, 39, 103, 118. *see also
 Aegean Bronze Age*
 Late Minoan IA (LM IA) period, 48, 55, 56

- Late Minoan IB (LM IB) period, 48, 55
 Latenian Northern Europe, 39
 Liburna project, 231
 linear cost model, 26
 logarithmic cost model, 26
 long distance trips, 27
longue durée, 114
- The Making of the Middle Sea* (Broodbank), 5, 94
 maritime *habitus*, 84–86, 85f, 240
 maritime interaction, 1–2, 6–7, 66
 maritime networks. *see also* *archaeological social networks; networks/network models; religious and economic networks in the Greco-Roman Mediterranean*
 Byzantine maritime trade, 219–232, 228f, 231f
 communication, 9, 15
 creating connections, 1–3
 local-scale maritime networks, 61–62
 Mediterranean maritime interaction, 1–2, 6–7, 9–16
 mobility considerations, 3–9
 multi-scalar framework, 67–73, 74f
 past maritime connectivity, 213
 religious networks, 250–251
 terrestrial networks *vs.*, 239–241
 maritime small world, 73–75
 Massaliot amphoras, 150
 material culture, 83, 222
 material diasporas, 2
 maximum distance network (MDN), 28, 29f
 maximum entropy principle, 26
 Mediterranean maritime interaction, 1–2, 6–7, 9–16
 memory work, 241, 250–251
 Mesoscopic approaches, 22
 micro-ecologies, 5
 microcanonical ensembles, 46
 Middle Bronze Age (MBA), 7, 39, 42, 71
 middle ground, 136–137
 Middle Helladic (MH) period, 78
 mimicry model of amphoras, 168–172, 169f, 171f, 175–177
 miniature continents, 5, 12
 mobility considerations, 1, 3–9
 model discrepancy, 39
 modeling
 archaeological and historical data, 15–16
 cultural interaction, 13
 environmental variables, 3–4, 138
 general approach to, 22–24
 interactions, 24–25
 networks of interaction, 142
 ontic approach, 46
 prehistoric periods, 69
 relational thinking and, 242
 simulation modeling, 244
 social variables, 3–4
 technological parameters, 138
 variability in, 243–244
 modern transport systems, 26
 Monte Carlo approaches, 22, 30
 most likely networks, 41–44, 43f
 movement of goods (*dirigisme*), 229
 multi-scalar framework, 67–73, 74f
 multiethnic middle ground, 137
 Muslims, 88
 mutation-rate settings, 169, 174
 Mycenaean coastal worlds, 67–72
 Mycenaean economy, 88
 Mycenaean Greeks, 63–67
- natural experiments in history, 40
 Neolithic age, 7, 9, 69
 Netlogo Mimicry model, 169f
 network metaphors, 8
 network science, defined, 185f, 186
 networks/network models. *see also* *maritime networks; religious and economic networks in the Greco-Roman Mediterranean; robust social network analysis; social networks*
 affiliation networks, 222, 225–227f, 231f, 232, 245
 Archaic through Hellenistic amphora record, 175–177
 archeological setting and, 164–167, 166–167f
 bipartite network, 223f, 224
 Byzantine maritime trade, 219–232, 228f, 231f
 complete networks, 194
 cost-benefit models, 51
 description in robust social network analysis, 25, 26f
 easiest networks, 44–45
 ego network for analysis, 145, 147f
 exploratory network analysis, 187, 209–210, 212
 global network measures, 112–113, 200, 201f, 202f, 203f, 204f, 205f, 206f
 hypothetical “trade network,” 132–133
 introduction to, 163–164
 Language Change model, 172, 173f, 174f, 175f, 177
 local-scale maritime networks, 61–62
 mimicry model, 168–172, 169f, 171f, 175–177
 one-mode networks, 152, 222, 246
 pre-eruption networks, 48–54, 49f, 52f
 preferential attachment model, 110–111, 169, 170, 174, 177–181, 178–179f, 180f
 Retail Gravity Model, 43, 50, 51
 summary of, 181–182
 node rankings, 200, 207–208, 208f
nomima, 114
- Odyssey* (Homer), 76
 one-mode networks, 152, 222, 246
 onward distribution patterns, 165
- Pabuç Burnu shipwreck, 139, 140f, 147, 149
Pactio Sicardi, 230
 paleocoastal reconstruction, 79

- Pearson correlation coefficients, 33
 Peloponnesian War, 109, 111
 peripheral status of maritime coastal community, 87–88
 personal possessions from shipwrecks, 13
 Pointe Lequin 1A shipwreck, 133, 142, 151
 political power, 84, 239
 ports and harbors
 guardian of harbors, 104
 Mycenaean anchorages and harbors, 67–68
 pottery, 12, 79, 94
 Eastern Sigillata, 187, 200, 206, 209–210, 214–217, 246
 Mycenaean-style, 79
 preferential attachment model, 110–111, 169, 170, 174, 177–181, 178–179*f*, 180*f*
 premodern sea travel, 62
 presence/absence technique, 191
 Principal Component Analysis (PCA), 33, 36
 Principle of Insufficient Reason, 41, 45
 Principle of Maximum Ignorance, 41
 progradational (advancing seaward) shorelines, 67
 proletarians at sea, 109
proteleia, defined, 105–106
 Proximal Point Analysis (PPA), 8, 28, 29*f*, 44, 69, 70, 238
pyrrhichai, 104

 Radiation Model, 45, 50, 52*f*, 55, 56
 recessive (eroding landward) shorelines, 67
 refugee plight, 5
 regional capital, 25
 regional/intra-cultural maritime interaction sphere, 75–76
 religious and economic networks in the Greco-Roman Mediterranean, 250–251
 cabotage connectivity, 97, 113*f*, 116
 cultic practices, 96, 101–106, 102*f*, 251
 cults and cabotage, 101–106, 102*f*
 global networkedness, 112–113
 introduction to, 5, 93–98
 maritime knowledge, 106–107
 maximum connectivity, 110–111
 qualitative approach, 98–101, 100*f*
 weak ties, 108–110
 Rihll and Wilson Gravity Models (RWGMs), 25, 35*f*, 36
 Roman Empire, 10
 Roman Mediterranean, 7
 Royal Tombs at Salamis, 155

 Saronic Gulf, 73, 76–82, 77*f*, 78*f*, 80–81*f*, 84
 Saronic Harbors Archaeological Research Project (SHARP), 79, 83
 Scandinavian archaeology, 6
 seaborne routes, 7, 9
 sensitivity analysis, 194

 Shaft Grave period, 71, 79
 shipwrecks. *see also individually named shipwrecks*
 amphoras and, 12
 analysis of, 245, 246
 introduction to, 6, 132–136, 134*f*
 middle grounds, 136–137
 as mobile nodes, 12
 social network graphing, 145–149, 147*f*, 148*f*
 social relationships and, 154–157, 156*f*
 visualization of, 149–154, 151*f*, 153–154*f*
 zones of interaction, 138, 140*f*, 141*f*, 143*f*, 144*f*, 155, 156*f*
 similarity networks for tableware, 192–193
 Simple Gravity Model (SGM), 27, 51, 55
 small coastal settlements, 77
A Small Greek World (Malkin), 97
 small world model, 73–75, 247
 smallest-scale entities, 22
 social bonds, 3
 social integration, 109
 Social Network Analysis (SNA)
 analysis of, 242*f*, 247
 comparison of networks, 31–36, 32*t*, 33*t*, 34*f*, 35*f*
 culture, heterogeneity and, 248–249
 distances, 23–24
 edges, 23–24
 graphing of shipwrecks, 145–149, 147*f*, 148*f*
 gravity models, 26–28, 27*f*
 growth of, 96
 interactions, 23–25
 introduction to, 8, 22–24, 238–239
 maritime *vs.* terrestrial networks, 239–241
 maximum distance network, 28, 29*f*
 memory work, 241, 250–251
 modeling scales, 22–23
 network description, 25, 26*f*
 proximal point analysis, 28, 29*f*
 religion and, 250–251
 site-centric social network analysis, 23
 statistical measurements, 226
 stochastic model, 28–31, 30*f*
 summary of, 36, 252–253
 technological innovation, 247–248
 vertex-centric social network analysis, 23
 social organization, 84
 social potential, 45
 social relationships and shipwrecks, 154–157, 156*f*
 social thermodynamics, 46
 socioeconomic considerations, 12
 spatial distribution of artifacts, 8
 spatial network analysis, 238
 state-supplied food, 228
 stochastic model, 28–31, 30*f*
 strength of weak ties, 108–110
 structuring logic to coastal life, 83–84
 symbolic artifacts, 2

- tableware distribution in Roman Eastern Mediterranean
 Brainerd–Robinson coefficient, 190*f*, 192*f*, 194, 212
 Brainerd–Robinson coefficient, distribution of, 194–197, 195–196*f*, 198–199*t*
 clustering coefficients, 200, 207–208, 208*f*
 data, 188–189, 189*f*, 189*t*
 exploratory network analysis, 187, 209–210, 212
