

CONTRACT LAW

CASES AND MATERIALS

Contract Law: Cases and Materials presents a selection of well-chosen cases and illuminating commentary ideal for introducing students to the study of contract law in Australia. Developed to accompany Stewart, Swain and Fairweather's *Contract Law: Principles and Context* ('Principles text'), this casebook maintains the accessibility of the *Principles* text while providing the depth and analysis of topics required to learn contract law.

Following the structure of the *Principles* text, this text explores areas not traditionally covered in other casebooks, such as resolving disputes, preparing to make a contract, preliminary agreements and interpreting contracts. Each chapter also briefly explores contracts in international contexts.

The hallmark features of this casebook are its:

- coverage and choice of cases, with succinct summaries and clear and concise extracts
- considered and relevant analysis and commentary
- coverage of international law
- extensive internal pedagogy including flowcharts and numerous review questions.

Contract Law: Cases and Materials takes a practical approach to student learning and integrates rich pedagogy to build critical thinking and analysis skills, making it an invaluable resource for contract law students.
