

Index

- Ablowitz–Ladik lattice, 31
 Ablowitz–Segur solution, 83
 affine root system, 12
 Airy function, 85, 103, 117, 118, 131, 135, 145
 alternate discrete Painlevé II, 59
 alternative d - P_1 , 105
 Askey polynomials, 77
 Askey table, 79
 Askey–Wilson operator, 80
 Askey–Wilson polynomials, 79
 asymmetric Painlevé IV, 64, 67
 asymptotic behavior, 16
 asymptotic zero distribution, 115, 119
 average operator, 80
 Bäcklund transformations, 103, 106, 108, 110, 113
 backward difference, 34
 backward difference operator, 60
 Bessel function J_ν , 116, 118
 Bessel functions, 106
 bi-lattice, 69
 bi-orthogonal polynomials, 74
 Boutroux’ tronquée solution, 83
 bulk of the spectrum, 118
 butterfly effect, 17, 47
 Charlier polynomials, 35, 42, 61, 69
 Christoffel–Darboux formula, 54
 Christoffel–Darboux kernel, 117
 compatibility, 4, 6, 52, 61, 62, 75, 81, 132, 140, 144
 compatibility relations, 78
 confluent hypergeometric function, 67, 69, 99, 110
 continuum limit, 11
 critical points, 118
 cross, 24
 \mathbb{D} -integral, 81
 \mathbb{D} -structure relation, 81
 Desnanot–Jacobi identity, 164
 difference operator, 79
 discrete orthogonal polynomials, 34, 37
 discrete Painlevé D_4^c , 42, 155
 discrete Painlevé equations, 9, 66
 discrete Painlevé for $A_3^{(1)}$, 79
 discrete Painlevé I, 14, 119
 discrete Painlevé II, 30, 42, 47, 149
 discrete Painlevé III, 71
 discrete Painlevé V, 76
 divided difference operator, 79, 80
 divided q -difference operator, 79
 elliptic functions, 11
 equilibrium measure, 145
 equilibrium problem, 116
 exceptional Hermite polynomials, 97
 exceptional Jacobi polynomials, 103
 exceptional Laguerre polynomials, 98, 101
 exceptional orthogonal polynomials, 97
 Favard theorem, 2
 Fisher–Hartwig singularity, 141
 fixed point theorem, 49
 forward difference, 34
 forward difference operator, 60
 Freud conjecture, 17
 Freud equations, 13
 Freud weight, 13, 109, 119, 129
 functions of the second kind, 81
 Gauss hypergeometric function, 112
 Gaussian unitary ensemble, 117
 generalized Charlier polynomials, 36, 46, 61
 generalized Charlier weight, 107

- generalized Hermite polynomials, 91
 generalized Jacobi weight, 74
 generalized Meixner polynomials, 61, 67
 generalized Meixner weight, 112
 generalized Okamoto polynomials, 95
 generalized Umemura polynomials, 99, 100
 generating function, 84, 89, 96, 100, 161, 162
 global parametrix, 95, 125, 131, 145
 Hankel determinant, 2, 86, 93, 105, 108, 111
 hard edge, 115, 118, 142
 harmonic oscillator, 50
 Hastings–McLeod solution, 83, 133
 Heaviside function, 113
 Hermite polynomials, 4, 6, 50, 91, 97, 119
 hierarchy of P_I , 128
 hierarchy of P_{III} , 137
 Hilb's formula, 117
 hypergeometric equation, 113
 hypergeometric function, 103
 Jacobi matrix, 3
 Jacobi polynomials, 5, 65, 103
 Kac–van Moerbeke equation, 22
 Kummer function M , 111, 112
 Kummer function U , 111
 Kummer functions, 110
 ladder operators, 4, 50, 60, 61, 75
 Laguerre polynomials, 4, 7, 58, 89, 98, 99,
 115, 137, 147, 162
 Langmuir lattice, 22
 Lax pair, 61, 139, 143
 Legendre's duplication formula, 42
 Lewis Carroll formula, 164
 little q -Laguerre polynomials, 70, 72
 local parametrix, 125, 127, 131, 139, 145
 logarithmic energy, 116, 123
 logarithmic potential theory, 116
 Marchenko–Pastur distribution, 115
 Meixner polynomials, 67
 modified Bessel function I_ν , 28, 30, 38, 107,
 108
 modified Bessel function K_ν , 59, 85, 107
 modified Bessel functions, 106
 modified Bessel polynomials, 28
 modified Hermite weight, 135
 modified Jacobi weight, 111, 113
 modified Laguerre weight, 109
 movable singularities, 8
 multiple orthogonal polynomials, 85, 105
 negative binomial, 67
 Okamoto polynomials, 95
 OPUC, 27, 46, 64, 74, 129, 141
 Painlevé equations, 8
 Painlevé I, 83, 103, 121, 125, 126, 149
 Painlevé II, 83, 103, 105, 129, 135, 149
 Painlevé III, 34, 46, 59, 88, 106, 136
 Painlevé IV, 23, 65, 91, 108, 137, 153
 Painlevé property, 8
 Painlevé transcendents, 8, 118, 138
 Painlevé V, 33, 46, 66, 68, 98, 109, 141, 144,
 154, 165
 Painlevé VI, 76, 102, 112
 Painlevé XXXIV, 135
 Painlevé, Paul, 8
 parabolic cylinder function, 25, 108, 137
 Parseval's identity, 152
 partition, 96, 99
 Pascal distribution, 67
 Pearson equation, 4, 5, 13, 28, 35, 37, 57, 60,
 62, 74, 77, 79, 81, 147, 149
 perturbed Hermite weight, 136
 perturbed Laguerre weight, 136
 Plancherel–Rotach formula, 117
 Pochhammer symbol, 36
 Poisson distribution, 35, 42
 Pollaczek–Jacobi weight, 111
 potential, 51, 60, 61
 q -difference operator, 62, 70, 79
 q -discrete Hermite polynomials, 73
 q -discrete Painlevé V, 72–74
 q -discrete Painlevé equations, 63
 q -gamma weight, 77
 q -integral, 63, 72
 q -ladder operators, 72, 78
 q -Laguerre polynomials, 62, 70, 71
 q -lattice, 62
 q -orthogonal polynomials, 64
 q -Painlevé for $E_7^{(1)}$, 82
 q -Painlevé equation, 64
 q -Pochhammer symbol, 70, 77
 q -Racah polynomials, 79
 random matrix theory, 8, 117, 135, 142
 rational solutions
 Painlevé II, 83
 Painlevé III, 88
 Painlevé IV, 91
 Painlevé V, 98
 Painlevé VI, 102
 reflection coefficients, 28, 76
 reversed polynomial, 27

- Riccati equation, 8, 66, 103, 106, 108, 110, 112, 164
- Riemann–Hilbert analysis, 94
- Riemann–Hilbert problem, 51, 53, 92, 118, 121, 135, 138
 for Painlevé I, 125
 for Painlevé II, 132
 for Painlevé IV, 139
 for Painlevé V, 144
- Riemann–Hilbert problems, 130
- Rogers–Szegő polynomials, 77
- root systems, 11
- Schur functions, 96, 99
- semi-circle density, 119
- semi-classical orthogonal polynomials, 5, 64
- semi-classical weight, 74, 78, 81
- shifted lattice, 68
- σ -form of Painlevé V, 142
- singularity confinement, 9, 26
- soft edge, 115, 118, 119, 131, 142
- Sokhotsky–Plemelj formula, 54, 157
- space of initial values, 12
- special function solutions, 103
 Painlevé II, 103
 Painlevé III, 106
 Painlevé IV, 108
 Painlevé V, 99, 109
 Painlevé VI, 103, 112
- special functions, 103, 115
 nonlinear, 118
- special nonuniform lattice, 79
- spectral theorem, 2
- steepest descent method, 118, 123, 131, 145
- Stieltjes–Wigert polynomials, 62, 70
- Stokes multipliers, 126, 140
- structure relation, 5, 29, 35, 37, 147, 149, 159
- surface type, 12
- symmetry type, 12
- Szegő curve, 137
- Szegő recurrence, 27, 75
- three term recurrence relation, 81
- Toda evolution, 64
- Toda lattice, 43, 65
- Toeplitz determinant, 27, 142
- Umehura polynomials, 88, 98, 99
- unique solution, 17, 24
- unitary random matrix, 28
- universality, 118
- Verblunsky coefficients, 27, 78
- Weierstrass elliptic function, 8
- Wronskian, 89, 97, 104, 109–111, 113
- Yablonskii–Vorobiev polynomials, 84
