

Index

- climate change, 11, 17, 169, 171
 - adaptation, 27, 28, 31
 - flooding, 24
 - impacts, 20
 - mitigation, 27
- climate variations, 20
- complexity, 12
- EVOLPRO, 95
- evolutionary optimization, 89
- flood, 7
 - climate change, 24
 - damage, 8, 13
 - definitions, 13
 - disaster, 7
 - hazard, 13
 - inundation, 13
 - physical characteristics, 17
 - return period, 76
 - risk, 13
- flood risk, 13, 17
 - calculation, 54
- flood risk management, 7, 12, 14, 31, 44, 169, 171
 - adaptation, 37
 - adaptive management, 170
 - emergency response, 14, 107
 - fuzzy set approach, 117
 - integrated flood management, 14
 - preparedness, 14
 - prevention, 14
 - principles, 15–16
 - probabilistic approach, 69
 - process, 32
 - recovery, 14
 - six-step procedure, 33
- fuzzy compromise programming, 152
- fuzzy linear programming, 141
- fuzzy multi-objective analysis, 149
- fuzzy risk, 129
- fuzzy set, 119
 - acceptability, 124
 - compatibility, 131
 - complement, 122
 - flood membership function, 126
 - fuzzy compromise programming, 152
 - fuzzy linear programming, 141
 - intersection, 122
 - membership function, 121
 - multi-objective analysis, 149
 - necessity, 124
 - possibility, 124
 - reliability–vulnerability, 132
 - resiliency, 133
 - robustness, 133
 - union, 122
- fuzzy simulation, 134
- FUZZYCOMPRO, 153, 157
- GIS, 111
- global change, 10
- global warming, 17
 - temperature, 17, 21
- hazard, 72
- inference, 125
- integrated disaster management, 33, 170
- Intergovernmental Panel on Climate Change, 11, 21, 169
- LINPRO, 106, 145, 146
- multi-objective analysis
 - fuzzy compromise programming, 152
 - goal programming, 102
 - probabilistic, 102
- municipal infrastructure, 41, 139
- neural networks, 125
- optimization, 110
 - fuzzy linear programming, 141
 - genetic algorithm, 125
- partial failure, 129
- population, 11
 - density, 11
 - growth, 12
 - urban, 11, 20
- rainfall, 17, 23
- risk, 13
 - communication, 169, 171
 - control, 36
 - estimation, 35
 - evaluation, 36
 - fuzzy set approach, 39
 - fuzzy sets, 117
 - load, 71
 - objective, 75
 - probabilistic modeling, 76
 - probability, 39
 - resilience, 31
 - resistance, 71
 - return period, 76
 - subjective, 75
 - vulnerability, 31
- risk management, 32
 - fuzzy sets, 117
 - procedure, 33

sea level rise, 11	fuzzy simulation, 134
simulation, 79	multi-objective analysis, 102
Monte Carlo, 79	optimization, 89
snowmelt, 18	risk management, 33
sustainable development, 12	simulation, 79
systems approach, 12	systems view, 14, 16
adaptation, 28	theory, 12
fuzzy compromise programming, 152	
fuzzy linear programming, 141	weather generator, 47
fuzzy multi-objective analysis, 149	World Meteorological Organization, 14
