PATENTS ON LIFE

This volume brings a unique collection of legal, religious, ethical, and political perspectives to bear on debates concerning biotechnology patents, or ‘patents on life’. The ever-increasing importance of biotechnologies has generated continual questions about how intellectual property law should treat such technologies, especially those raising ethical or social-justice concerns. Even after many years and court decisions, important contested issues remain concerning ownership of and rewards from biotechnology – from human genetic material to genetically engineered plants – and regarding the scope of moral or social-justice limitations on patents or licensing practices. This book explores a range of related issues, including questions concerning morality and patentability, biotechnology and human dignity, and what constitutes fair rewards from genetic resources. It features high-level international, interfaith, and cross-disciplinary contributions from experts in law, religion, and ethics, including academics and practitioners, placing religious and secular perspectives into dialogue to examine the full implications of patenting life.

Thomas C. Berg is James L. Oberstar Professor of Law and Public Policy at the University of St. Thomas School of Law. He is a leading scholar of Church–State relations and a leader in exploring the intersection of intellectual property, religion, and social ethics.

Roman Cholij is Research Associate at the Von Hügel Institute for Critical Catholic Inquiry, St Edmund’s College, University of Cambridge and a Chartered Trade Mark Attorney. He has written two books, several book chapters, and numerous articles on various aspects of law and of theology.

Simon Ravenscroft is the Arts Outreach Fellow at Magdalene College, and a Research Associate of the Von Hügel Institute for Critical Catholic Inquiry at St Edmund’s College, University of Cambridge. He has published on a range of topics across the fields of theology, philosophy, and social theory.

Prefatory Note and Acknowledgements

The information in this book is generally current through early 2019, except for short discussions of selected subsequent developments at the conclusions of Chapter 1 and Chapter 16.

* * *

The editors collectively wish to thank the institutions that sponsored or funded this book project and the Patents on Life conference (Cambridge, November 2015) that gave birth to it:

- The Von Hügel Institute for Critical Catholic Inquiry (VHI), at St Edmund's College, Cambridge, and especially John Loughlin, Philip McCosker, Lidia Ripamonti, and Alban McCoy, for hosting the conference and supporting the project in numerous other ways.
- The Terrence J. Murphy Institute for Catholic Thought, Law, and Public Policy at the University of St. Thomas, and especially Elizabeth Schiltz, Seanne Harris, and William Junker, for generous financial and logistical support.
- Porticus UK, with special thanks to Jane Leek, who made Porticus's funding possible.

Thomas Berg adds his thanks to Roman and Simon; to his St. Thomas Law colleagues Megan McNevin, research librarian, and Henry Bishop, administrative assistant, for manuscript preparation; to Deans Robert Vischer and Joel Nichols for institutional support; to Audrey Chapman, Ruth Okediji, David Opderbeck, and Frank Pasquale, who provided inspiration for several of the ideas in the project; to St. Thomas law students Gina Bugliosi, Nick Davis, and Thomas Wheeler, for research assistance; and to his wife, Maureen Kane Berg, for her many varieties of support.

Roman Cholij would like to thank in particular Professor John Loughlin, former director of the VHI, for his support, encouragement, and good judgement that led to the success of the Patents on Life conference. To the speakers and contributors of the conference and, of course, to all the authors of this work, a special debt is owed for sharing the fruits of their research, knowledge, and wisdom. Special thanks also to

his colleague Simon Ravenscroft, for his excellent professionalism and dedication to the VHI Patents on Life project from its earliest days; and finally, but not least, to his wife, Louise, for her contributions to the patents conference and constant support throughout the project.

For their vision and good humour, Simon Ravenscroft would like to thank Tom and Roman; for the Murphy Research Fellowship that funded his involvement in a good chunk of this project, personal thanks to the Terrence J. Murphy Institute; and for conviviality, collegiality, and other more profound forms of support during the period in which this book was compiled, he is grateful to James Pearson; Christian Coppa; Ragnar Misje Bergem; Deborah, Massimo, Luca, and Isabella Di Martino; his parents, Tim and Karen Ravenscroft; and above all to Ruth Jackson.

Roman and Simon would like to offer special thanks to Tom for his considerable efforts in compiling the manuscript, but also for his exceptional dedication, professionalism, and heroic patience in many matters besides that have led to this book seeing the light of day.
