

Index

- Adiabatic Floquet waves, 234
- Anomalous refraction, 412
- Bessel–Gaussian beams, 364, 365, 369
- Bi-anisotropy, 36, 40, 46, 51, 124, 125, 127, 133
- Birefringent, 131, 453
- Cloaking
 - cloaking design, 329, 339, 445
 - cloaking devices, 325, 326, 328
 - mantle cloaking, 325, 327, 330, 333
 - parity-time cloaking, 325, 327, 330, 335
 - plasmonic cloaking, 325, 327, 330, 331
- Cone-shaped radiation pattern, 372, 376, 379, 381
- Corporate feed network, 216, 221, 222
- Electric Field Integral Equation (EFIE), 181
- Electromagnetic (EM) surfaces, 30
 - application of EM surfaces, 450–452
 - EM surface designs, 446, 448, 449
 - periodic electromagnetic (EM) surfaces, 5, 7
 - properties of EM surfaces, 443
 - quasi-periodic electromagnetic (EM) surfaces, 9
 - theories of EM surfaces, 442
 - uniform electromagnetic (EM) surfaces, 3
- Element phase correction, 174, 175, 178, 193
- Empirical interpolation method (EIM), 168, 185
 - EIM for Green’s function, 185, 187
- Field programmable gate array (FPGA), 308, 309
- Finite difference frequency domain (FDFD), 134, 136
- Finite difference time domain (FDTD), 136
- Floquet theory, 166, 168, 448
- Gap waveguide, 198, 209, 215, 219, 221, 222, 224–226
 - accurate analysis of the groove transmission line, 208
 - cutoff frequency used in PCB packaging, 211
 - design of stop band, 209, 210
 - evaluation of losses, 213, 214
 - gap waveguide antenna, 214, 216, 220, 223
 - gap waveguide planar antenna, 215, 216, 223
- Generalized Sheet Transition Condition (GSTC)
 - applications of GSTC, 99
 - GSTC as impedance-type boundary conditions, 114
 - GSTC for metafilms, 39, 78
 - GSTC for metagratings, 80
 - GSTC for metascreens, 79
 - introduction of GSTC, 78, 127, 442
- Generalized Snell’s law, 412, 418
- Global reference phase
 - adjustment, 167, 175, 443
 - optimization of reflectarray, 178, 193
- Green’s function
 - EFIE formulation for quasi-periodic arrays, 181
 - EIM for Green’s function, 185, 186
 - fast matrix assembling, 188
- Homogenization, 37, 38, 42, 43, 46
- Imaging metasurface, 307, 315, 317, 451
- Impedance modulation, 231
- Laguerre–Gaussian beams, 364–366, 381
- Metafilm
 - controllable reflections and transmissions, 110
 - GSTC for metafilms, 78, 442
 - reflection and transmission coefficients, 81
 - retrieval expressions for metafilms, 93
- Metagratings
 - Controllable Reflections and Transmissions, 110
 - GSTC for metagratings, 80, 442
 - Reflection and Transmission Coefficients, 90
 - Retrieval Expressions for Metagratings, 98
- Metallens, 444
 - achromatic metallens, 419
 - Babinet-inverted metallens, 419
 - metallens design, 420, 421
 - optical metallens, 420

- Metamaterials, 7, 18–20, 46, 66, 67, 147, 439
 - application of metamaterials, 301
 - cloaking metamaterials, 325, 328
 - disadvantages of metamaterials, 301
 - plasmonic metamaterials, 328
- Metascreen
 - controllable reflections and transmissions, 110
 - GSTC for metascreens, 79, 442
 - reflection and transmission coefficients, 87
 - retrieval expressions for metafilms, 95
- Metasurface antenna
 - metasurface antenna analysis, 245
 - metasurface antenna bandwidth, 255
 - metasurface antenna design
 - analysis of modulated metasurface antennas, 245
 - efficiency and bandwidth of modulated metasurface antennas, 250
 - modulated metasurface antennas, 26, 231
 - multibeam modulated metasurface antennas, 259
 - metasurface antenna efficiency, 252
- Metasurfaces, 18, 30, 33, 302, 314
 - anisotropic metasurfaces, 46, 303
 - bi-anisotropic metasurfaces, 40, 124, 127, 133
 - birefringent metasurfaces, 131
 - cloaking metasurfaces, 325, 328
 - coding metasurface, 18, 26
 - 1-bit coding metasurface, 304, 305, 307
 - 2-bit coding metasurface, 307, 310, 311
 - anisotropic coding metasurface, 303
 - information coding metasurface, 303
 - dielectric metasurfaces, 158
 - dispersive metasurfaces, 124, 141
 - general terminology, 18
 - Huygens' metasurface, 302, 452
 - impenetrable metasurfaces, 46
 - isotropic metasurfaces, 111
 - metal-backed metasurfaces, 42
 - metasurface based, 32, 37
 - metasurface homogenization, 38
 - metasurface with nonreciprocal uniaxial artificial moving inclusions, 53
 - metasurface with nonreciprocal uniaxial Tellegen inclusions, 53
 - metasurface with reciprocal uniaxial chiral inclusions, 53
 - metasurface with reciprocal uniaxial omega inclusions, 53
 - mono-anisotropic metasurfaces, 132
 - multilayer metasurface, 302, 315
 - negative refraction metasurfaces, 144
 - nongyrotropic nonreciprocal metasurfaces, 145
 - nonlinear metasurfaces, 448
 - nonlinear THz metasurface, 406, 417
 - nonuniform metasurfaces, 32
 - optical metasurface, 439
 - applications of optical metasurface, 418
 - optical cloak, 423
 - optical holography, 422
 - planar metasurface devices, 32
 - programmable metasurface, 18, 26
 - 1-D programmable metasurface, 309
 - 2-D programmable metasurface, 310
 - reciprocal metasurfaces, 55
 - RF/microwave metasurface, 393
 - scattering control metasurfaces, 26
 - single-layer metasurface, 302
 - THz metasurface, 403
 - time-varying metasurfaces, 124
 - tunable metasurfaces, 26, 303, 308, 351
 - uniaxial metasurfaces, 52
 - uniform metasurfaces, 41
 - zero-thickness metasurfaces, 128, 134
- Multibeam antennas, 234
- Nanoantenna, 420, 421, 423, 439
- Nonlinear, 142, 406, 417, 444, 445
- Nonradiating sources, 339, 357
- Orbital angular momentum (OAM) beams
 - far field OAM, 368, 369
 - near field OAM, 366
 - OAM beam generation, 372
 - OAM concept, 363
 - OAM number, 364, 365
- Parallel-plate waveguide
 - an example using gap-waveguide technology, 201
 - approximation method of analysis, 203
 - origin of gap-waveguide technology, 198
- PEC/PMC strips, 198, 199
- Plasmonics, 328, 354, 439, 447
- Quasi-periodic effects, 443
- Rao–Wilton–Glisson (RWG) basis functions, 167
- RCS reduction
 - broadband RCS reduction, 308
 - function of RCS reduction, 307
- Reciprocity, 160
- Reflectarray
 - adjustment of the global reference phase, 176–178
 - azimuthal multi-beam reflectarray, 383
 - cone-shaped reflectarray, 376, 381
 - CP reflectarray, 374
 - design workflow, 171, 179, 448
 - element phase correction, 175
 - multibeam reflectarray, 383, 384

- Reflectarray (cont.)
 - OAM reflectarray, 372
 - optimization, 178, 181, 194
 - pencil beam reflectarray, 383
 - phase adjustment, 168, 174
 - quasi periodic effect, 193
 - reflectarray antenna, 173, 386
 - reflection phase analysis, 169, 173
- Refraction, 144, 452
- Satellite communication, 363, 369, 386
- Stop band, 199, 202, 208, 445
- Surface electromagnetics (SEM), 438
 - development of surface electromagnetics, 3, 5, 12
 - importance of surface electromagnetics, 12, 13, 16, 19
 - research frontiers of surface electromagnetics, 20–22
 - SEM book contents, 23, 24, 26, 27
 - what is surface electromagnetics, 1, 3
- Surface susceptibility, 78, 82, 125, 442
- Surface wave
 - propagating wave to surface wave conversion, 252, 302, 310, 445
- Surfaces
 - frequency-selective surfaces (FSS), 35
 - high-impedance surfaces (HIS), 35, 439
 - Huygens’ surfaces, 31
 - multichannel surfaces, 32
 - mushroom-type surfaces, 36
 - nonuniform surfaces, 32
 - periodic/periodical surfaces, 33, 35, 448
 - PMC surface, 198
 - soft/hard surface, 198, 441
 - tunable surfaces, 37
- Terahertz, 301, 303, 319, 447
- Transmission surfaces, 272, 276, 283, 287, 293
 - application, 273
 - design of transmitarray antennas, 297
 - different approaches to design transmission surface, 287, 297
 - introduction, 272
 - phase limits of transmission surfaces, 274, 277, 279
 - reconfigurable transmission surface designs, 287
- Transmitarray, 446
 - multilayer
 - discussion on nonidentical layers, 279
 - phase limit of a multilayer transmission surface, 274, 276
 - reconfigurable
 - an example of beam-scanning reconfigurable transmitarray, 297
 - different technique in reconfigurable transmission surface designs, 287
 - FSS type reconfigurable design, 288, 290
 - single layer
 - phase limit of a single-layer transmission surface, 274
 - transmission magnitude and phase, 275–277
 - transmission surface using cross-polarized field, 284
- vias
 - phase limit study, 274
 - transmission surface design, 283
- Wave-front reconstruction, 316
