measures of affectionate communication (cont.)
  psychometric adequacy, 52
  scale development, 51
  verbal affection questionnaire, 56, 58, 60
mental health, 217
  alcohol abuse, 168, 170
  alexithymia, 52, 166–167, 208
  anxiety, 152, 159, 161, 164–165
  Asperger syndrome, 166, 168
  autism spectrum disorders, 166, 168
  depression, 152, 161, 164–165, 170, 208
  general subjective wellness, 158
  loneliness, 152, 166, 170, 208
  mental stress, 163, 206, 208
  self-esteem, 165
  suicide/suicide ideation, 151–152, 165, 171
nationality, 81, 83
  nature vs. nurture, 92
parental relationships, 6, 78, 86–87, 132, 142, 160, 163, 215
  father–son relationships, 25, 89, 133, 135, 142
physical health, 217
  blood glucose, 188
  blood lipids, 186
  blood pressure, 177, 181
  heart rate, 176, 181
immunocompetence, 2, 32–33, 185, 218
  allergic response, 185, 193, 218
  Epstein-Barr virus antibodies, 184, 194
  immunoglobulins, 184
  natural killer cell cytotoxicity, 184
  infection susceptibility, 190, 193, 218
  neurological effects, 70
  pain, 191, 208
  stress, 32–33, 178, 180–181, 183, 186
range of optimal tolerance, 35
  maximum threshold, 33, 35
  minimum threshold, 33, 35
reciprocal altruism, 196
relationship distinctions
  genetic vs. nongenetic, 15, 25, 129–130, 133–134
  romantic vs. platonic, 128–129
relationship qualities
  closeness, 45, 129, 146, 149, 205
  commitment, 2, 45, 129, 140, 146, 149, 205, 208
communication satisfaction, 143, 148
  formation, 143
life satisfaction, 143, 148
liking, 146, 148
love, 1–2, 4, 29, 45, 146, 148–149, 188
maintenance, 140, 145, 205
negativity, 148
relationship boundary ambiguity, 199
relationship satisfaction, 142, 148, 205, 208
sexual interaction/satisfaction, 148–149
responses to affectionate behavior, 126
  behavioral responses, 126
  compensation, 118, 120, 124
  failure to respond, 119, 126
  reciprocity, 118, 120, 123, 125
  cognitive responses, 103
  attributions, 117
  evaluations, 108
  interpretations, 112
risks of affectionate behavior
  disease transmission, 201
  misinterpretation, 39, 199
  nonreciprocity, 198
  social censure, 200
self-serving bias of attribution-making, 117
  extended self-serving bias, 117
sexual orientation, 133, 135
sibling relationships, 49, 63, 78, 90, 108, 131, 136, 145–146
socio-cultural paradigm, 15, 25, 130
solitary confinement, 151
specific affection behaviors
  cuddling, 148, 170
  eye contact (gaze), 99, 110, 122
  hand-holding, 40, 140, 162–163, 175, 181
  hugging, 41, 107, 148, 157, 163, 170, 175, 181, 189, 196, 201, 203
  idiomatic expressions, 45
  kissing, 40, 43, 135, 140, 148, 162, 174, 181, 185, 189, 193, 196, 201, 203, 212
  pillowtalk, 148
  smiling, 97, 99, 110, 122, 203
  touch, 106, 110, 157–158, 180
vocalic behaviors
  "I love you", 113
vocalic behaviors, 99
  baby talk, 41, 135
  pitch (fundamental frequency), 42, 97–98, 110
