BRIEF CONTENTS

Preface xix

Part I Understanding Research
1 Psychology, Science, and Life 1
2 Ethics in Research 38
3 Planning Research: Generating a Research Question 67
4 Practical Issues in Planning Your Research 103
5 Measurement and Sampling 127

Part II Experimental Approaches
6 Conducting An Experiment: General Principles 160
7 Experiments with One Independent Variable 181
8 Experiments with Multiple Independent Variables 208
9 Expanding on Experimental Designs: Repeated Measures and Quasi-experiments 229

Part III Correlational and Nonexperimental Designs
10 Principles of Survey Research 258
11 Correlational Research 287
12 Studying Patterns in The Natural World: Observational Approaches 311
13 Research in Depth: Longitudinal and Single-case Studies 333

Part IV Culture and Research
14 People are Different: Considering Cultural and Individual Differences in Research 361

Appendix A – Writing a Research Report 395
Appendix B – Statistics Review 415
Appendix C – Statistical Tables 441
References 451
Index 495

Why are Research Methods Important Tools for Life? 3

- Why Learning About Research is Important 5
- Answering Important Questions 6

Why We Do Research 7

- Description 8
- Prediction 9
- Explanation 10
- Control 12

Research Applied to Life: Suicide 12

What Should You Believe? 13

Characteristics of Science 14

- Science is Objective 15
- Science is Data-driven 18
- Scientific Methods are Replicable and Results are Verifiable 19
- Science is Public 20

Culture and Research 21

The Interaction of Science and Society 22

- The Government’s Role in Science 23
- Societal Values and Science 24

Scientific Literacy 25

- What Would it Take to Change Your Mind? 26
- Science and Pseudoscience 27
- Warning Signs of Bogus Science 28
- Junk Science 30

Controversy: The Myth of Vaccination and Autism Continues 30

- What Can You Do About This? 31

Chapter Summary 32

Chapter Review Questions 33

- Multiple Choice Questions 33
- Essay Questions 36

Answers to Chapter Review Questions 36

- Answers to Multiple Choice Questions 36
- Answers to Essay Questions 36
2 Ethics in Research  38
   Learning Objectives  38
   Key Terms  39
   Chapter Preview  39
   Unethical Research Practices: Past and Present  41
      Ethical Problems in the Early Years of the Twentieth Century  41
      Ethics and Plagiarism  43
      Current Examples of Ethical Lapses  43
      The Impact of Ethical Lapses  46
   Ethical Guidelines Created by the American Psychological Association  46
      Aspirational Goals and Enforceable Rules  47
      Ethical Standards as They Affect You  48
   Legal Requirements and Ethics in Research  50
      Institutional Review Boards  50
   The Importance of Social Context in Deciding on Ethics in Research  51
      Stanley Milgram’s Research Project on Obedience  52
      The Ethical Issues  52
   What You Need to do if Your Research Involves Deception  53
      Some Research May Require Deception  54
      The Effects of Debriefing on Research  55
   The Controversy About Deception  56
   Ethical Issues in Special Circumstances  57
      Ethics in Cross-cultural Research  57
      Ethics in Internet Research  59
      Ethics in Research with Nonhuman Animals  60
   Chapter Summary  61
   Chapter Review Questions  62
      Multiple Choice Questions  62
      Essay Questions  65
   Answers to Chapter Review Questions  66
      Answers to Multiple Choice Questions  66
      Answers to Essay Questions  66

3 Planning Research: Generating a Research Question  67
   Learning Outcomes  67
   Key Terms  67
   Chapter Preview  67
   Where Research Ideas Begin: Everyday Observations and Systematic Research  69
      Informal and Formal Sources of Ideas  70
      The Effect of Theory  71
   How Can You Develop Research Ideas?  74
      Culture and Research  77
   The Virtual Laboratory: Research on the Internet  78
      Internet Research  80
      Factors that can Make a Difference  82
      Advantages to Internet Research  85
Potential Problems with Internet Research 86
Checking on Research: The Role of Replication 87
Don’t Reinvent the Wheel: Reviewing the Literature 89
  What is a Literature Review? 90
  The Effect of Peer Review on the Research Literature 90
How to Conduct a Literature Review 91
  Electronic Databases 91
  Starting Your Search 91
  Different Sources of Information 93
How to Read a Journal Article 94
  Understanding the Format of a Research Paper 94
Summary 98
Chapter Review Questions 99
  Multiple Choice Questions 99
  Essay Questions 101
Answers to Chapter Review Questions 101
  Answers to Multiple Choice Questions 101
  Answers to Essay Questions 102

4 Practical Issues in Planning Your Research 103
Key Terms 103
Chapter Preview 103
  How Can You Develop a Research Idea? 104
Practical Questions in Planning Research 106
Understanding Your Research 106
  Carrying Out a Literature Search 107
Conducting Your Study 107
  Descriptive Research 108
  Survey Research 108
  Experimental Research 108
Determining the Research Setting 110
Choosing Your Methodology 111
  Approaches to Psychological Research 111
  Selecting Research Materials and Procedures 113
  Why Methodology is Important 115
Choosing Your Participants or Subjects 116
  The Nature of Your Participants 117
  Deciding How Many Participants to Include 118
Research Applied to Life: Can Animal Research Help Us Understand Human Stress? 119
Differing Approaches in Different Areas of Psychology 120
  Different Approaches in Different Journals 120
  Different Types of Participants in Different Journals 121
  Making Choices in Your Research Design 121
Summary 123
Chapter Review Questions 124
Contents

Multiple Choice Questions 124
Essay Questions 125
Answers to Chapter Review Questions 126
Answers to Multiple Choice Questions 126
Answers to Essay Questions 126

5 Measurement and Sampling 127
Key Terms 127
Chapter Preview 127
Psychological Concepts 129
Measuring Complex Concepts 129
Operational Definitions 129
Defining and Measuring Variables 131
The Importance of Culture and Context in Defining Variables 135
Multiple Possible Operational Definitions 136
Probability Sampling 136
Simple Random Sampling 137
Systematic Sampling 138
Stratified Random Sampling 138
Cluster Sampling 138
Nonprobability Sampling 140
Convenience Sampling 141
Quota Sampling 142
Purposive (Judgmental) Sampling 142
Chain-referral Sampling 143
Making Useful Measurements 143
Reliability 144
Validity 145
Considering Validity in Research 145
Construct Validity 145
Internal and External Validity 147
Statistical Conclusion Validity 151
Convergent and Divergent Validity 152
Research Applied to Life: The Head Start Program 152
Scales of Measurement 153
Nominal Scales 153
Ordinal Scales 154
Ratio and Interval Scales 154
Summary 155
Chapter Review Questions 156
Multiple Choice Questions 156
Essay Questions 158
Answers to Chapter Review Questions 158
Answers to Multiple Choice Questions 158
Answers to Essay Questions 158
Part II  Experimental Approaches

6  Conducting An Experiment: General Principles  160

Key Terms  160
Chapter Preview  160

Choosing a Methodology: The Practicalities of Research  162
Determining the Causes of Behavior  162
  Trying to Determine Causation in Research  163
  Requirements for Cause–Effect Relationships  163
The Logic of Experimental Manipulation  164
Research Applied to Life: Withholding Treatment in Research  166
Experimental Control – Or What Can Go Wrong  167
Lack of Control in Experimental Research: Extraneous Variables and Confounds  167
  Do Women Show Fear of Success?  169
  Experimenter and Participant Effects  171
Minimizing the Likelihood of Experimenter and Participant Effects  172
  The Hawthorne Effect  173
Research Applied to Life: Drug-sniffing Dogs  175
Realism in Research  176
Summary  177

Chapter Review Questions  177
  Multiple Choice Questions  177
  Essay Questions  180
Answers to Chapter Review Questions  180
  Answers to Multiple Choice Questions  180
  Answers to Essay Questions  180

7  Experiments with One Independent Variable  181

Key Terms  181
Chapter Preview  181

Determining Variables of Interest  183
  Investigating Psychology and Criminal Justice  183
  Variety of Research Variables  184
Independent and Dependent Variables  186
Using Experiments to Determine Causation  189
Is it Ethical to Induce Depression in Research?  190
Types of Independent and Dependent Variables  191
  Qualitative and Quantitative Independent Variables  192
Research Applied to Life: What We Believe  194
  Independent Variables Created by Different Types of Manipulations  195
  Types of Dependent Variables  197
Research Applied to Life: Race and Pain  197
Understanding Your Results  198
  Comparing Two Groups  198
  Generalizing Research Results  200
Comparing Multiple Groups  201
Data Analysis  202
Experiments with Two Groups  202
Experiments with Multiple Groups  203
Summary  204
Chapter Review Questions  204
  Multiple Choice Questions  204
  Essay Questions  207
Answers to Chapter Review Questions  207
  Answers to Multiple Choice Questions  207
  Answers to Essay Questions  207

8 Experiments with Multiple Independent Variables  208
  Key Terms  208
  Chapter Preview  208
  Research with Multiple Independent Variables  209
    Main Effects  209
    Interactions between Variables  211
  Not Much Power in the Pose: Illustration of a 2 × 3 Design with an Interaction  212
  A 2 × 2 Factorial Design with Repeated Measures  214
  Research with More Than Two IVs  216
  Practical Complexities in Research  217
  Research Applied to Life: Racial Prejudice  219
  Data Analysis  224
  Summary  225
  Chapter Review Questions  226
    Multiple Choice Questions  226
    Essay Questions  228
  Answers to Chapter Review Questions  228
    Multiple Choice Questions  228
    Answers to Essay Questions  228

9 Expanding on Experimental Designs: Repeated Measures and Quasi-experiments  229
  Key Terms  229
  Chapter Preview  229
  Repeated-Measures Designs  231
    Advantages of Repeated-Measures Designs  231
      Increasing Efficiency in Data Collection  231
      Increasing Validity of Data  232
      Finding Enough Participants  232
      Reducing Error in Measurement  235
    Limitations to Repeated-Measures Designs  235
      Possible, but Unlikely, Repeated-Measures Designs  235
      Subject (Participant) Variables  236
    Research Applied to Life: Cell Phones, Alcohol, and Driving  236
Illustration of a One-variable Design with Repeated Measures 236
Order and Sequence Effects 237
Data Analysis with Repeated-Measures Designs 238
Quasi-experimental Designs 239
Causation and Quasi-experimental Designs 240
Combining Experimental and Quasi-experimental Designs 240
Threats to Internal Validity 242
Threats Associated with Participants 242
Threat Associated with Measurement 243
Types of Quasi-experimental Designs 245
One-group Pretest–Postest Design 246
Static-group Comparison Designs 247
Nonequivalent Control Group Designs 247
Interrupted Time-series Designs 249
Replicated Interrupted Time-series Designs 250
Research Applied to Life: Laws and Behavior 252
Summary 254
Chapter Review Questions 255
Multiple Choice Questions 255
Essay Questions 256
Answers to Chapter Review Questions 257
Multiple Choice Questions 257
Answers to Essay Questions 257

Part III  Correlational and Nonexperimental Designs

10 Principles of Survey Research 258
Key Terms 258
Chapter Preview 258
Surveys: Answering Diverse Questions 260
Census versus Sample 260
Accuracy of Survey Results 261
Ethics in Survey Research 262
Selecting Your Methodology 262
Online Data Collection 264
Question Types 265
Question Content 267
Research Applied to Life: How Many Adolescents Smoke? 272
Response Bias 272
Social Desirability 273
Acquiescence 275
Satisficing versus Optimizing 275
Culture and Response Styles 276
Acquiescent Response Style 277
Extreme and Moderate Response Style 277

Contents

Studying Sensitive Issues 278
  Are Telephone Surveys Appropriate for Sensitive Issues? 279
Crowdsourcing in Research 279
Sampling Issues 280
  Finding Hidden Populations 280
Summary 282
Chapter Review Questions 283
  Multiple Choice Questions 283
  Essay Questions 285
Answers to Chapter Review Questions 285
  Answers to Multiple Choice Questions 285
  Answers to Essay Questions 285

11 Correlational Research 287
Key Terms 287
Chapter Preview 287
Correlational Studies 289
  Finding Relationships 289
  Making Predictions 292
  Research in Life: The Media and Violence 293
Using the Correlational Approach 294
  Correlational Studies 295
  Correlational Analysis 295
  Positive and Negative Correlations 295
  Strength of Association 296
  Factors Affecting the Size of a Correlation Coefficient 298
Traditional Correlational Tests 303
  The Pearson Product-Moment Correlation 303
  Alternate Bivariate Correlations 303
  Linear Regression 304
Correlations with Multiple Variables 305
  Multiple Regression 306
  Research Applied to Life: The Mental Health of College Students 306
Summary 308
Chapter Review Questions 308
  Multiple Choice Questions 308
  Essay Questions 310
Answers to Chapter Review Questions 310
  Multiple Choice Questions 310
  Answers to Essay Questions 310

12 Studying Patterns in the Natural World: Observational Approaches 311
Key Terms 311
Chapter Preview 311
Observational Approaches 313
Scientific versus Casual Observation 313
Table of Contents

Studying Natural Behaviors 314
  Studying Complex Human Behavior 315
Ethology 316
  Describing the Behavior of Nonhuman Animals 317
Approaches to Observational Research 318
  Five Practical Steps in Observational Research 318
  Structured and Unstructured Observations 319
Sampling Issues in Observational Research 321
  Number of Sampling Blocks 321
  Methods of Sampling Events During Observation 322
  Estimating the Frequency and Duration of Behaviors 324
Ethological Observations in Clinical Research 325
The Human Side of Observational Research 325
  Ethics 325
  Participant–Observer Interactions 326
  Subject Reactivity 326
  Observer Effects 328
  Data Analysis in Observational Research 329
Summary 329

Chapter Review Questions 330
  Multiple Choice Questions 330
  Essay Questions 331
Answers to Chapter Review Questions 332
  Multiple Choice Questions 332
  Answers to Essay Questions 332

13 Research in Depth: Longitudinal and Single-case Studies 333
  Key Terms 333
  Chapter Preview 333
  Longitudinal Research 335
    Common Themes in Longitudinal Research 335
    Cross-sectional versus Longitudinal Research 336
  Varieties of Longitudinal Research 337
    Trend Studies 338
    Cohort Studies 340
    Cohort-sequential Studies 340
    Panel Studies 342
  Research Applied to Life: Student Achievement 344
    Issues in Longitudinal Designs 345
      Retrospective and Prospective Studies 345
      Attrition 346
    Single-subject Experimentation 350
      Experimental Analysis of Behavior 350
      Methods of Single-case Designs 351
      Withdrawal Designs 351
      Single-subject Randomized Clinical Trials 352
Contents

Strengths of Single-participant Designs 352
Weaknesses of Single-participant Designs 353
Misunderstandings about Single-case Research 353
Case Studies 354
A Case Study with Experimental Manipulations: Tasting Pointed Chickens and Seeing Colored Numbers 356
Summary 357
Chapter Review Questions 357
   Multiple Choice Questions 357
   Essay Questions 359
Answers to Chapter Review Questions 359
   Multiple Choice Questions 359
   Answers to Essay Questions 359

Part IV  Culture and Research

14 People are Different: Considering Cultural and Individual Differences in Research 361
Key Terms 361
Chapter Preview 361
Different Cultural Perspectives 363
   What is Culture? 364
Defining an Individual’s Culture, Ethnicity, and Race 366
   Criteria for Inclusion in a Group 368
   Social Issues and Cultural Research 369
Cross-cultural Concepts in Psychology 370
   Are Psychological Constructs Universal? 370
   Issues in Cross-cultural Research 372
Is There a Biological Basis for Race? 373
   The Criteria for Race 373
   Biological Insights Regarding Race 374
   Are There Really Different Races? 375
Practical Issues in Cultural Research 376
   Lack of Appropriate Training among Researchers 376
Why the Concepts of Culture and Ethnicity are Essential in Research 377
   Studying Differences Due to Language and Thought Processes 377
   Studying Differences in Simple and Complex Behaviors 378
Is Culture-free Theory Really Free of Culture? 379
   Similarities and Differences within the Same Culture 380
Cultural Factors in Mental Health Research 381
   Content Validity 381
   Translation Problems 382
   Cross-cultural Norms 382
   Cross-cultural Diagnoses 384
Sex and Gender: Do Men and Women Come From Different Cultures? 386
   Stereotypes and Gender-related Performance 386

© in this web service Cambridge University Press & Assessment  www.cambridge.org
Research Applied to Life: Are Men better than Women at Mathematics? 387
