ΛCDM model, 8, 234, 253, 254, 260–262, 265, *see also* standard model of cosmology

abduction, 9, 306, 307, *see also* inference to the best explanation
accelerated expansion of the universe, 369
accuracy, 306, *see also* theoretical virtues
ad-hoc hypothesis, 90
AdS/CFT correspondence, 3, 344, 359, 377, 380, 424, 428
aesthetic criteria, 24, 125, 408
alternative theories, 9, 36, 128, 129, 131, 138, 146, 148, 150, 157, 158, 266, 276, 317, 325, 326, 368
  active search for, 157, 158
  unconceived, 324
analogue black hole experiments, 8, 198, *see also* Bose-Einstein condensate analogue black hole
analogue experiments, 7, 8, 68, 76, 79, 82, 185, 186, 189, 198
analogue gravity, 3, 186
analogue model, 76, 78, 79, 203, 219
anarchism, 55
anomaly, 133
anthropic argument, 3, 287, 290, 402, 413, 418, 421
anthropic principle, 301, 308
area theorem, 206–208
argument of unexpected explanatory interconnections, 114, 116, 117, *see also* unexpected explanatory coherence argument
arguments by analogy, 185, 187, 189
asymmetry of time, 206
atomism, 5
auxiliary hypotheses, 89, 90, 275

B-mode polarization, 227, 234, 241
Bacon, Francis, 5
baryogenesis, 408
baryonic acoustic oscillations, 233, 234, 242
basic principles of scientific reasoning, 9
Bayes' Theorem, 71
Bayesian confirmation theory, 7, 37, 68, 70–72, 74, 79–82, 104–108, 120, 121, 123, 155, 186, 189, 276, 317
Bayesian inference, 307, 309
Bayesian Network, 72, 73, 75, 78–80, 82
Bayesianism, 71
beauty, 31, 52, 109, 176, 184, 303, 310, 316, *see also* theoretical virtues
Bekenstein's argument for the entropy of black holes, 203, 205, 206, 208, 210, 211, 218–220
Bekenstein-Hawking formula, 3, 8, 202, 203, 209, 219, 346, 428
Bianchi-identity, 255, 256, 258
black hole entropy, 169, 203, 208–210, 217, 218, 220, 381, 428
black hole firewall, 361
black hole thermodynamics, 3, 203, 204, 371, 402
Bohr, Niels, 5
Boltzmann, Ludwig, 5
Bose-Einstein condensate, 76–78, 186–188, 190, 193, 195, 196, 203
Bose-Einstein condensate analogue black hole, 186, 194–196, 198, *see also* analogue black hole experiments
Bose-Einstein condensate Hawking effect, 192–194, 198
Bose-Einstein condensate Hawking radiation, 195, 196
BSM physics, 156, 380, 406, 408, 409, 420, 424, 425, 428, 431

coherence, 36, 46, 54, 174, 176
compactification, 380
compatibility, 316
competing theories, 15, 129, 136, 145, 151, 158, 159, 325, 326, 329, *see also* rival theories
computer simulation, 184, 185
conditionalization, 71

confirmation, 104, 121, 309
  conclusive, 103, 105, 108, 118, 121
  conclusive empirical, 103
  degree of, 70, 186, 198, 315
  empirical, 1, 4, 9, 67, 73, 99, 100, 107, 120, 122, 173, 174
  indirect, 68, 70, 73, 82, 315
  non-empirical, 6, 101, 122
  significant, 108, 113, 116, 118
consilience, 36, 46, 54, *see also* theoretical virtues
consistency, 2, 176, 289, 306, 307, *see also* theoretical virtues
context of discovery, 41, 56, 132, 166
context of justification, 41, 132, 133
continuous spin representations, 413, 414
convergence argument, 174, 182
Copernican principle, 258, 259, 261
cosmic censorship hypothesis, 207
cosmic inflation, 1, 3, 4, 100, 154, 244, 261, 268, 310, 402
  discovery of, 230
cosmic microwave background, 230, 245, 253, 260, 261, 263, 267, 400, 408, 420, 422, 424
cosmic microwave background fluctuations, 232
cosmic microwave background radiation, 229, 281, 330, 379
cosmological constant, 22, 231, 235, 242, 259–262, 287–289, 291, 297, 302, 308, 310, 311, 343, 347–349, 356–360, 362, 378, 379, 387, 401, 420–422
cosmological multiverse, 300, *see also* multiverse
cosmological origin of lithium, 229
cosmophysics, 21, 22
credibility, 318, *see also* theoretical virtues
crisis of empirical testing, 5

dangerous irrelevance, 366
dark energy, 9, 227, 231, 233, 242, 401, 408
  dynamical, 304, 305
dark energy density, 259
dark matter, 230, 232–234, 236, 238, 243, 245, 261, 267, 268, 270, 300, 408
  cold, 231, 236, 239
  hot, 231, 236
  Neutrino, 231
  nonbaryonic, 230
  warm, 236, 239
definiteness, 303, *see also* theoretical virtues
demarcation problem, 7, 14, 17, 85, 89–91, 302, 303, *see also* falsicationism
Descartes, Rene, 5
distance-minimization methods, 71
distinct predictions, 68
dual resonance model, 177–181
dual theory of strong interactions, 176
duality in quantum phyiscs, 345
duality principle, 177
duality relations, 2, 3
dumb hole, 192
Dutch Book arguments, 71

early string theory, 174, 176, 177, 182
early universe cosmology, 367, 371, 373
effective field theory, 133, 365, 367, 373, 404, 406, 408
Einstein, Albert, 5, 342
elegance, 109, 174, 176, 316, *see also* theoretical virtues
eliminative program, 321, 325, 326, 328, 329
empirical adequacy, 70, 75, 77, 113, *see also* theoretical virtues
energy-momentum conservation, 257
entanglement entropy, 220
environmental theory, 356, 358, 360
epistemic shift, 14, 15
epistemic status of scientific results, 5
epistemic utility theory, 71
equivalence principle, 254
eternal inflation, 3, 9, 315, 331, 332
  false-vacuum, 305
evidence, 7, 67, 184
  conclusive empirical, 4, 99, 103, 106
  empirical, 4, 7, 81, 122, 166
  from authority, 48–50, 53, 54
  indirect, 68, 72, 81, 312, 401
  meta-inductive, 47–50, 53, 54
  non-empirical, 99, 111, 121
expanding universe, 227
explanatory connection, 49–54
explanatory power, 5, 17, 137, 138, 176, 291, 414, 428, *see also* theoretical virtues
extra dimensions, 2, 3, 164, 165, 182, 372, 410, 415
  discovery of, 174, 176, 178

fallibilism, 135
falsifiability, 14, 35, 84, 85, 89, 92, 291, 301–307, 396
falsification, 87, 89–91, 246, 301
falsificationism, 36, 68–70, 72, 81, 85, 90, 123, 127, 149, 155, 301, 302, 307, *see also* demarcation problem
family resemblance, 91
fertility, 109, 112, 176
Feyerabend, Paul, 36, 54, 56, 130
fine-tuning, 3, 287, 347
fluid mechanical experiments, 184
fruitfulness, 306, 307, 318, *see also* theoretical virtues
functional RG approaches, 3
fundamental physics, 1, 2, 4–6, 15, 20, 27, 92, 93, 99–101, 103, 106, 125, 133, 154, 156, 217, 254, 268, 354
fundamentality, 21, 59, 60, 142, 344, 348, *see also* theoretical virtues

theory comparison, 142, 151, 325
theory dependence, 134, 320, 329
theory development, 17, 142, 144, 146, 149, 165, 166, 169
theory justification, 128, 132
theory proliferation, 54, 127
theory selection, 127, 132
theory space, 75, 82, 130, 154, 157, 159, 162, 166, 167, 325, 328, 329, 367
reliability of the assessment of, 162
assessment of, 162, 164, 166, 168, 169
inductive justification of, 166
exploration of, 157–159, 170
necessary constraints of, 160
theory-mediated measurements, 319, 320, 322, 324, 325, 327, 328, 331
thought experiments, 16, 371
truth, 105, 113, 127, 306, *see also* theoretical virtues

underdetermination, 9, 75, 114, 130, 131, 154, 293, 316, 318, 321–323, 329
transient, 316
unlimited, 115
unexpected explanatory coherence argument, 136–138, 174, 294, 317, 328, 397, *see also* argument of unexpected explanatory interconnections
unification, 23, 32, 47, 61, 62, 160, 182, 350, 409, 418
uniformity, 300
uniqueness, 17, 160, 257, 262, 269, 276, 409
unitarity, 177
unitarization programme, 179
UV completion, 366, 367, 421, 428
of gravity, 368

verification, 24, 32, 89, 429
verificationism, 135
viability of a theory, 99, 102–104, 106, 108, 109, 113, 134, 140, 142, 145, 168, *see also* theoretical virtues
view of science, 126
violation of the null energy condition, 207
von Neumann entropy, 221
vortex theory of atoms, 13, 23–26

WIMP miracle, 238
