

## The Cambridge Handbook of Experimental Syntax

Experimental syntax is an area that is rapidly growing as linguistic research becomes increasingly focused on replicable language data, in both fieldwork and laboratory environments. The first of its kind, this handbook provides an in-depth overview of current issues and trends in this field, with contributions from leading international scholars. It pays special attention to sentence acceptability experiments, outlining current best practices in conducting tests, and pointing out promising new avenues for future research. Separate sections review research results from the past 20 years, covering specific syntactic phenomena and language types. The handbook also outlines other common psycholinguistic and neurolinguistic methods for studying syntax, comparing and contrasting them with acceptability experiments, and giving useful perspectives on the interplay between theoretical and experimental linguistics. Providing an up-to-date reference on this exciting field, it is essential reading for students and researchers in linguistics interested in using experimental methods to conduct syntactic research.

GRANT GOODALL is Professor of Linguistics at University of California, San Diego. He is the author of the influential 1987 book *Parallel Structures in Syntax* and of many important articles on syntactic phenomena in English, Spanish, and other languages. In recent years, he has been at the forefront of using experimental techniques to address longstanding questions in syntactic theory.

# Contents

<i>List of Figures</i>	page vii
<i>List of Tables</i>	viii
<i>List of Contributors</i>	x
Introduction <i>Grant Goodall</i>	1
<b>Part I General Issues in Acceptability Experiments</b>	5
1 Sentence Acceptability Experiments: What, How, and Why <i>Grant Goodall</i>	7
2 Response Methods in Acceptability Experiments <i>Sam Featherston</i>	39
3 Approaching Gradiance in Acceptability with the Tools of Signal Detection Theory <i>Brian Dillon and Matthew W. Wagers</i>	62
4 Variation in Participants and Stimuli in Acceptability Experiments <i>Jana Häussler and Tom S. Julek</i>	97
5 Acceptability, Grammar, and Processing <i>Gisbert Fanselow</i>	118
6 Satiation <i>William Snyder</i>	154
7 Acceptability (and Other) Experiments for Studying Comparative Syntax <i>Dustin A. Chacón</i>	181
<b>Part II Experimental Studies of Specific Phenomena</b>	209
8 Resumptive Pronouns in English <i>Chung-hye Han</i>	211
9 Island Effects <i>Jon Sprouse and Sandra Villata</i>	227
10 The <i>That</i> -Trace Effect <i>Wayne Cowart and Dana McDaniel</i>	258
11 Anaphora: Experimental Methods for Investigating Coreference <i>Elsi Kaiser</i>	278
12 Constituent Order and Acceptability <i>Thomas Weskott</i>	315
13 Acceptability Judgments at the Syntax–Semantics Interface <i>Jesse Harris</i>	341

vi	<i>Contents</i>	
	<b>Part III Experimental Studies of Specific Populations and Language Families</b>	371
14	Acceptability Studies in L2 Populations <i>Tania Ionin</i>	373
15	Judgments of Acceptability, Truth, and Felicity in Child Language <i>Rosalind Thornton</i>	394
16	Acceptability and Truth-Value Judgment Studies in East Asian Languages <i>Shin Fukuda</i>	421
17	Acceptability Experiments in Romance Languages <i>Tania Leal and Timothy Gupton</i>	448
18	Acceptability Studies in (Non-English) Germanic Languages <i>Markus Bader</i>	477
19	Acceptability Studies in Semitic Languages <i>Aya Meltzer-Asscher</i>	505
20	Experimental Syntax and Slavic Languages <i>Arthur Stepanov</i>	534
21	Acceptability Judgments in Sign Linguistics <i>Vadim Kimmelman</i>	561
	<b>Part IV Experimental Syntax beyond Acceptability</b>	585
22	Theories All the Way Down: Remarks on “Theoretical” and “Experimental” Linguistics <i>Colin Phillips, Phoebe Gaston, Nick Huang, and Hanna Muller</i>	587
23	Eye-Tracking and Self-Paced Reading <i>Claudia Felser</i>	617
24	Nothing Entirely New under the Sun: ERP Responses to Manipulations of Syntax <i>Robert Kluender</i>	641
25	Corpus Studies of Syntax <i>Jerid Francom</i>	687
26	Syntax and Speaking <i>Shota Momma</i>	714
27	Neuroimaging <i>William Matchin</i>	741
	<i>Index</i>	770

# Figures

1.1	Effect of dependency length on relative clauses (Keffala 2011)	page 23
1.2	<i>Wh</i> -extraction from three types of subjects	27
3.1	Sprouse et al.'s factorial design and a hypothetical illustration of how scale bias could create a spurious interaction in the difference of differences	67
3.2	The process of rendering a binary or <i>n</i> -point Likert acceptability judgment from the perspective of Signal Detection Theory	72
3.3	Implied equal-variance signal/noise distributions in Bare/ VP Gap conditions	79
3.4	ROCs and zROCs for all comparisons	83
3.5	ROC for VP Gap/ <i>WhP</i> Bare condition illustrating A	85
3.6	Implied unequal-variance signal/noise distributions	87
3.7	Diagnosing bimodality with ROC analysis	91
6.1	Participant instructions in Snyder (2000)	158
7.1	Mean normalized ratings by condition and language for Experiments 1 and 2 (Chacón 2015)	193
9.1	The graphical predictions of the $2 \times 2$ design for <i>whether</i> -islands	232
10.1	<i>That</i> -trace effect	262
10.2	<i>That</i> -trace effect across regions	263
10.3	Test, retest study of <i>that</i> -trace	263
10.4	<i>That</i> -trace effect across verbs	265
10.5	<i>That</i> -trace effect relative to declarative controls	266
10.6	<i>That</i> -trace effects in German (left) compared to English (right)	268
21.1	RSL sign <sub>1CL(ROUND)</sub> -GIVE <sub>a</sub> (first and last frames)	562
27.1	Cortical anatomy relevant to language	748
27.2	Results of Pallier et al. (2011)	754
27.3	An illustration of the model-based approach	756

# Tables

1.1	A factorial design for measuring the <i>that</i> -trace effect	page 11
1.2	A table of components for Condition 1	13
1.3	Counterbalanced lists of experimental stimuli using a Latin square design	14
1.4	Planning table for fillers assuming a factorial design as in Table 1.1, 6 tokens per condition, and a 2:1 filler-experimental ratio	15
1.5	Example fillers for an experiment with a factorial design as in Table 1.1	16
1.6	A factorial design for measuring the island effect with partial <i>wh</i> -movement	30
3.1	Example item set	77
3.2	Binary judgment results	77
3.3	Summary of sensitivity and bias in the equal variance analysis	80
3.4	Confidence ratings in VP:Gap/WhP:Bare conditions	81
3.5	Transforming confidence ratings to an ROC curve	82
3.6	Summary of sensitivity and variance in unequal variance analysis	86
6.1	Satiation experiments on argument/adjunct extraction from <i>whether</i> -islands	164
6.2	Satiation experiments on CNPC violations	165
6.3	Satiation experiments on subject-island violations	166
6.4	Satiation experiments on adjunct-island and LBC violations	167
6.5	Satiation experiments on <i>that</i> -trace and <i>want-for</i> violations	168
8.1	Summary of sentence acceptability studies on English resumption	220
9.1	A (potentially incomplete) summary of the acceptability judgment satiation literature for four island types	243
9.2	A (potentially incomplete) summary of formal experimental studies on island effects	245

---

9.3	A (potentially incomplete) summary of studies on resumptive pronouns using formal acceptability judgment methods	250
15.1	Percentage of non-adult judgments by group	405
15.2	The difference in ratings between ungrammatical intransitive verbs and ungrammatical transitive causative verbs for different frequency verbs by age	407
16.1	Numbers of participants who accepted NEG > $\forall$ scope	432
18.1	Overview of additional syntactic phenomena that have been the subject of acceptability studies but are not discussed in this chapter	499
27.1	Overview of neuroimaging methods	743
27.2	Stimulus design of Pallier et al. (2011)	753
