INDEX

adjective, 303
position and meaning in French, 10–12
position and meaning in Spanish, 157
age effects on L2 learning, 250
and aptitude for language learning, 265
and proficiency, 254–7
in classroom environments, 267–75
in immersion classrooms, 272–5
in naturalistic environments, 251–66
of Dutch, 251–2
of lexical knowledge in English, 257–8
of morphology and syntax, 258–61
of Russian, 252–3
of the critical period hypothesis, 262
Agree, 99–106, 118, 303
and grammatical gender, 101–5
and the licensing of English count nouns, 105–6
animacy, 35
antonym, 29, 304
Arabic, epenthetic vowels in, 175
articles, English, 304
definite versus specific contrast, 127
possible adjectival use by L2 learners, 135
use of by L2 learners, 131
aspect, 54–5, 304
Aspect Hypothesis, 54, 63
aspiration, see segment (of sound)
Burton, Sir Richard, 1–2
Cantonese lexical tones in, 182
categorisation problem, 6–8, 20, 282
c-command, 114–15
Chinese, see Mandarin
Chinese cognitive reserve, 16, 304
and dementia, 18
conceptual representation, 25
Conrad, Joseph and foreign accent, 161, 164
context problem, 12–15
discourse, 12, 198–214
sociolinguistic variation, 14, 215–16
copula be. See verb
critical period hypothesis. See age effects on L2 learning
dative double object construction, 245
default form, 58, 305
Dekeyser, 6, 260–1
dependency-marking forms, 35–6
discourse, 12, 20, 198, 295, 305
Dutch, 101, 251
object scrambling in, 138
elsewhere form, 57, 305
epenthesis, 174, 305
executive control, 16, 305
and bilingualism, 17
Feature Re-Assembly Hypothesis, 59–61, 64, 66, 283
and cline of difficulty, 64
and learning of Dutch grammatical gender, 103
features, linguistic, 59, 118, 123, 127, 305
and Agree, 100
universal feature hierarchy, 64
unvalued features, 100, 291
focus, 199, 305
and contrastive stress, 199, 207
French, 10, 37, 72, 84, 86, 122, 145, 168, 180, 279
Canadian French, 14
quantifier scope in, 140
Full Access (to UG) Hypothesis, 78
García Mayo, 40, 268, 274
garden-path sentences, 191–2
and plausibility, 194
L2 speakers’ comprehension of, 192–5
gender, grammatical, 306
in Dutch, 101
in German, 104
in Spanish, 104
German, 89, 104, 111, 200, 277
glossary, 303
Hazen, 39, 53, 54, 57, 71
Hopp, 104, 200
hyperpolygots, 3
hyponym, 29, 306
hypotheses about L2 learning, 283
Implexan, artificial language, 8
innate knowledge in a theory of L2 learning, 284
input, 94
and L1 acquisition, 222–3
and the learning of the progressive in English and Japanese, 150
and verb movement in Mandarin Chinese, 94–5
dual-modality input, 233
effects of indirect negative evidence, 236–41
effects of instruction, 226–34
effects of positive evidence, 222–5
explicit correction, 235
Krashen's acquisition–learning distinction, 227
Krashen's Input Hypothesis, 223
negative effects of instruction, 229
processing instruction, 230 recasts, 222, 236–41
input frequency tallying, 4 instruction in L2 learning. See input
interference effect, meaning-based, 27, 45
interrogatives, 82, 91, 120, 158, 306
in English and German, 91–3
in French, 72
in Korean, 69
Ionin, 39, 53, 128, 129
Japanese, 147, 158, 159
Korean, 97, 128, 176
use of relative clauses by L2 learners, 98
Krashen. See input
L1, role of in L2 learning, 41, 88, 292–4
L2 learning, theory of, in diagrammatic form, 287, 296
L2 words, model of their acquisition, 32
L2-L1 form connections, 27
L3 learning, 15, 90
Lardiere, 42, 59–61, 64
study of Patty, 42
Larson-Hall, 172–3, 269
lexicon, mental, 28, 51
fluidity of connections, 43
Lexicon and Vocabulary, 52, 102, 287
organisation in L1 speakers, 28–30
Mandarin Chinese, 59, 94, 100, 121, 128, 143, 153, 158, 210
and discourse-linked movement, 219
and lexical tones, 161, 182
shi ... de construction, 64
use of relative clauses by L2 speakers, 98
meaning-modifying forms, 33–4
memory
long-term, 287
short-term, 287
working, 285
Merge, 73, 118, 307
Minimal Trees Hypothesis, 78
Missing Surface Inflection Hypothesis, 57, 63, 135, 177, 283, 285, 291
and learning of Dutch grammatical gender, 103
morphe, 307
categories, 73, 118
definition of, 50
dependency marking, 52
lexical versus functional, 51
meaning-modifying, 52
Morphological Deficit Hypothesis, 59, 63, 283, 285
and learning of Dutch grammatical gender, 103
Move, 81–4, 118, 307
and L1 influence, 88–93
DP to C, 91–2
local movement, 84
T to C, 82, 89
V to T and T to V, 82, 85
Myles, 71–3
negation, 79, 94, 307
non-linguistic aspects of L2 learning, 282
obligatory contexts, 40, 307
optionality, 38, 41
and the Aspect Hypothesis, 54
and the Feature Re-Assembly Hypothesis, 59
and the Missing Surface Inflection Hypothesis, 56
and the Morphological Deficit Hypothesis, 58
and the Prosodic Transfer Hypothesis, 176–9
apparent but not real, 53
resulting from L1 influence, 42
output, 242
paradigmatic connections, 29, 307
parsing, 191, 286, 307
phone
definition of, 163, 308
phoneme
definition of, 162, 308
learning new phoneme contrasts, 166–73
learning sub-phonemic contrasts, 165
phrase structure, 73, 109, 308
plural
English, acquisition of, 33
in English and Mandarin Chinese, 60
predispositions, linguistic, 73, 77, 100
pronoun reference, 114, 308
and child language acquisition, 116
and topic and focus, 209
monomorphic versus polymorphic forms, 142
non-target reference as a processing problem, 212
reflexives, 121
reflexives in English, 141
reflexives in Mandarin Chinese, 141, 153–5
property versus transition theory of L2 learning, 294
Prosodic Transfer Hypothesis, 177–9, 291
prosody, 161, 179
quantifier scope, 137, 308
questions. See interrogatives
reaction times
and German determiners, 105
to garden-path sentences, 193
to homographs, 45
to relative clauses, 196 recasts. See input
relative clauses, 95–9, 309
effects of instruction on acquisition of, 246
in Korean, 97
in L2 learning, 96
in Mandarin Chinese, 98
parsing of, 195–7
structural versus linear distance, 97
Russian, 40, 128, 252
Saffran, 4–8, 20, 124, 299
satellite-framed languages, 145
segment (of sound), 161
and aspiration, 163, 165
and child language acquisition, 163
child language acquisition, 163
learning English [θ], [ð], 169
learning French /j/, 168
learning of /l/ and /r/ by Japanese speakers, 171
sounds available to the world's languages, 162
voice onset time, 165
