

## NAME INDEX

- Abbe, Ernst, 240  
 Abraham, Karl, 327  
 Ach, Narziss, 180  
 Adams, Donald, 209, 212  
 Adams, John Quincy, 69  
 Addyman, C., 255  
 Adler, Alfred, 326  
 Adler, Saul, 226  
 Adrian, Edgar, 88, 116  
 Agassiz, Louis, 259–260  
 Agnew, Spiro T., 441  
 Albert B. (Little Albert), 411–414  
 Alcock, J. E., 152  
 Alfonso, V. C., 255  
 Allen, G. W., 258, 260, 261, 262, 265, 270  
 Allen, N. J., 63  
 Allport, Gordon, 262, 442  
 Alvarado, C. S., 153  
 Alwood, C. M., 18  
 Anderson, P. A., 280, 281  
 Angell, Frank, 108, 120–121, 294, 299  
 Angell, James Burrill, 294  
 Angell, James Rowland, 294–296, 375, 401, 403, 404, 405, 408, 436  
 Anger, L. W., 451  
 Anna O. (Bertha Pappenheim), 317–318  
 Anokhin, P. K., 389  
 Appiganesi, L., 328  
 Araujo, S. de F., 96, 97, 110  
 Aristotle, 2, 47, 284  
 Arnett, J. J., 277  
 Aronson, E., 473  
 Arps, George, 108  
 Arvidson, R. M., 109  
 Aserinsky, Eugene, 86  
 Ash, M. G., 186, 212  
 Asimov, I., 94  
 Asratyan, E. A., 386, 393  
 Atkinson, Richard, 465–467  
 Auburtin, Ernest, 76–77  
 Austin, J., 451  
 Avenarius, Richard, 177  
 Ayllon, T., 341  
 Azrin, N., 341  
 Baars, B. J., 458, 463  
 Baartman, Sarah (Saartjie), 234  
 Babinski, Joseph, 115, 351  
 Babkin, B. P., 388, 389, 393  
 Bagehot, Walter, 46, 47  
 Bahrack, Harry, 162, 166  
 Bahrack, P. O., 166  
 Bailey, R. E., 446  
 Bain, Alexander, 49–50  
 Baird, John Wallace, 127, 129  
 Bakan, D., 67, 479  
 Baker, D. B., 336, 338, 342, 344  
 Balance, W. D. G., 93  
 Baldwin, James Mark, 257, 273, 275, 405–406  
 Banaji, M. R., 105  
 Bandura, A., 419  
 Banta, M., 206  
 Barbee, A. H., 371  
 Barker, Roger, 207, 212  
 Barks, A., 370  
 Barlow, D. H., 328  
 Barlow, Nora, 220, 226, 227  
 Barnes, B. A., 63  
 Barrett, L. F., 230  
 Bartholow, Roberts, 81–84  
 Bartlett, Frederic, 456–457, 464, 470–471  
 Barzun, J., 263, 270  
 Bayton, J. A., 13  
 Bazar, J., 255  
 Beauvais, C., 367  
 Beck, Aaron, 341–342, 474–475  
 Beck, H. P., 413–414  
 Beck, Samuel, 337–338  
 Beenfeldt, C., 182  
 Bekhterev, Vladimir M., 107, 115  
 Bell, Alexander Graham, 257, 361  
 Bell, Charles, 58–59  
 Bellack, A. S., 451  
 Bellarmine, Robert, 24  
 Bem, Daryl, 480  
 Benjamin, L. T., 338  
 Benjamin, L. T. Jr., 17, 115, 116, 132, 133, 136, 138, 139, 152, 162, 198, 283, 285, 360, 416, 449

## 550 NAME INDEX

- Bennett, A. H., 80  
 Bennett, E. L., 207  
 Bentham, Jeremy, 49  
 Bentley, Madison, 131, 134  
 Berger, Hans, 86, 115  
 Bergman, Gustav, 421–422  
 Berkeley, George, 38–42, 272  
 Berker, A. H., 77  
 Berker, E. A., 77  
 Berliner, Anna, 113  
 Berman, M. G., 477  
 Bernays, Martha, 318, 320  
 Bernfeld, S., 318  
 Bernheim, Hyppolyte, 352, 353  
 Bernston, G. G., 63, 85  
 Berry, J. W., 18  
 Bertin, C., 328  
 Bertrand, G., 84  
 Bessel, Friedrich, 103  
 Best, L. A., 241  
 Bettany, Paul, 220  
 Biagioli, M., 24

   contribution of G. Stanley Hall, 275  
   current membership and organization, 484  
   Division 26 (History of Psychology), 5  
   founding of, 275–276  
   Hall's second presidency, 282  
   history of, 275–276  
   political advocacy, 478–479  
   presidency of Angell, 295  
   Society for the Psychological Study of Culture, Ethnicity, and Race, 14  
   Titchener's dissatisfaction with, 132  
   woman presidents, 122  
 American Society for Psychical Research, 264, 294  
 analogy tests  
   introduction by Ebbinghaus, 168  
 animal studies  
   abilities of the horse Clever Hans, 173–175  
   antivivisection movement response to Watson's rat studies, 404–405  
   behaviorist approach of Harvey A. Carr, 296–297  
   Gestalt completion test in chimpanzees, 191  
   insight learning, 197–204  
   learning in chickens, 304  
   maze-learning in rats, 403–404  
   nervous system development in rats, 401–402  
   noddy and sooty terns, 405  
   range of Watson's behaviorist studies, 408–410  
   search for evidence of animal intelligence, 173–175  
   Thorndike's learning experiments, 304–307  
   Titchener's criticism of, 128  
   Watson's studies of rat behavior, 403–404  
   Witmer's work with Peter the chimpanzee, 336  
   work of Margaret Floy Washburn, 122  
   See also behaviorism; conditioning.  
 anthropometric testing  
   problems with Cattell's early tests, 253–254  
 anti-Semitism, 204, 315, 316, 473  
   forced exile of Freud from Nazi-occupied Europe, 329–330  
   work of the Commission on Community Interrelations (CCI), 215–216  
 antivivisection movement  
   response to Watson's rat studies, 404–405  
 apperception, 105, **486**  
 applied psychology, 107  
   influence of cognitive psychology, 474–476  
   Münsterberg's approach, 138–139  
   Titchener's criticism of, 128  
   view of Alexander Bain, 50  
   work of Skinner, 447–450  
   work of Thorndike, 311–312  
 apprehension, 179, **486**

## 564 SUBJECT INDEX

- aptitude testing, 342  
 work of Clark Hull, 434
- archives of the history of psychology, 5–6
- Army Testing Project (United States)  
 Alpha and Beta Tests, 373–376, **486**  
 reaction to the report on, 376–378
- artificial intelligence (AI)  
 Chinese Room argument, 469  
 ELIZA computer program, 460  
 Logic Theorist computer program, 460  
 Turing Test, 459–460
- Association for Psychological Science (APS),  
 484
- Association of Black Psychologists, 14
- associationism, 100, **486**  
 Alexander Bain, 49–50  
 associations of ideas, 47  
 James Mill, 43–45  
 John Stuart Mill, 43–49  
 view of memory, 238
- associations, 178  
 paired-associate method, 284  
 studies at Wundt's Leipzig laboratory,  
 106  
 tests developed by Galton, 238  
 work of Mary Whiton Calkins, 284
- attention  
 apperception and, 105  
 impaired attention theory of schizophrenia,  
 105  
 Titchener's definition of, 128  
 Wundt's definition of, 105
- autokinetic effects, 296
- automatic writing, 140, 264
- availability heuristic, 468
- behavior modification  
 application to mental illness and behavioral  
 problems, 450–451  
 industrial applications, 451  
 shaping of behavior, 445–446  
 Skinner's Utopian novel, 446–447  
 Skinner's work on, 450–451
- behavior theory  
 behavior system of Clark Hull, 436–437  
 evaluation of Hull's behavior system,  
 438–440  
 Hull's learning theory, 437–438  
 search for a comprehensive theory of  
 behavior, 431  
 Tolman's classes of variables, 430–431
- behavior therapy, 341–342
- behavioral economics, 468
- behaviorism, 1–2, 53, 134, 183, 188, 231, 282,  
 297, **486**  
 antivivisection movement response to  
 Watson's rat studies, 404–405  
 application in advertising, 416–417  
 challenges from linguistics, 458–459  
 conditioned reflexes, 409–410  
 environmentalist position of Watson, 419–420  
 fear conditioning in children (Little Albert),  
 411–413  
 Lashley's challenge to the associative chain  
 hypothesis, 461–462  
 legacy of John B. Watson, 421–422  
 maze-learning in rats, 403–404  
 neobehaviorism, 424, 452  
 overcoming fears in children (Peter B.),  
 418–419  
 perspective on child care, 420–421  
 perspective on instincts, 419–420  
 radical behaviorism of B. F. Skinner,  
 440–441  
 range of Watson's animal studies, 408–410  
 reactions to Watson's manifesto, 408  
 Skinner's work on operant conditioning,  
 443–444  
 Titchener's criticism of, 129  
 Watson's behaviorist manifesto, 406–407  
 Watson's field studies of animal behavior, 405  
 Watson's research with children, 410–414  
 Watson's studies of rat behavior, 403–404  
 work of John B. Watson, 398
- Bell-Magendie law, 58, **486**
- bell-shaped curve. *See* normal distribution.
- Binet-Simon scales, **486**  
 development of, 354–357  
 introduction into the United States, 357–358  
 Terman's (Stanford) revision, 367–368
- Boulder model of clinical training, 339
- brain  
 animal brain studies (Flourens), 70–72  
 areas associated with reward and motivation,  
 85  
 brain stimulation studies, 78–85  
 Circle of Willis, 65  
 deep-brain stimulation, 85  
 early investigations, 63–65  
 effects of brain damage in Phineas Gage,  
 72–75  
 electrical stimulation studies, 79–85  
 emotions elicited during deep-brain  
 stimulation, 85  
 epilepsy treatment by brain surgery, 84  
 epileptic seizure process, 80–81

- functions of different brain structures  
   (Flourens), 70–72  
 hierarchical model of cerebral organization,  
   80–81  
 how the brain processes information, 86–88  
 human brain stimulation studies, 81–85  
 localization of function, 70–89  
 memory elicitation during brain stimulation,  
   84  
 neuron and reticular theories of brain  
   structure, 86–88  
 number of neurons in, 63  
 Papez circuit, 85  
 plasticity in response to trauma, 72  
 pseudo-science of phrenology, 65–70  
 recording brain rhythms using the  
   electroencephalograph (EEG), 86  
 recording the brain's activity, 85–86  
 rhythms during sleep, 86  
 synaptic transmission, 88–89  
 unity of function (Flourens), 71–72  
 work of Willis on brain structure and  
   function, 64–65  
 X-ray imaging, 85–86  
*Brown v. Board of Education* (1954), 14  
  
 catharsis, 317, 486  
   case of Bertha Pappenheim (Anna O.), 321–322  
 cell assembly, 486  
 child behavior  
   behavioral perspective in child care, 420–421  
   conflict situations, 210–211  
   eating habits of children, 211–212  
   effects of different leadership styles, 213  
   effects of frustration, 212–213  
   Watson's behaviorist research, 410–414  
   work of Darwin, 231  
   work of Kurt Lewin, 208–211  
 Chinese Room argument, 469  
 choice reaction times, 104, 486  
 chunking of information, 463  
 Circle of Willis, 65  
 circulatory system  
   discovery by Harvey, 29–30  
 Clark University, 273–274, 278, 283, 366  
   Clark Conference of 1909 organized by Hall,  
   278–281  
 classical conditioning, 341  
 clinical psychology, 332  
 cognitive-behavior therapy (CBT), 341–342, 486  
 cognitive behaviorism, 426–428  
 cognitive developmental psychology, 231  
 cognitive dissonance, 472–473, 487  
 cognitive maps, 426, 428, 429  
 cognitive psychology, 2, 178, 183  
   applications for reaction-time studies, 105  
   Bartlett's work on remembering, 456–457  
   bias in human reasoning, 468–469  
   defining work of Ulric Neisser, 464–465  
   dissonance theory, 472–473  
   early work on reaction times, 104  
   evidence for short- and long-term memory,  
   465–467  
   influence of advances outside psychology,  
   457–462  
   influence of developments in computer  
   science, 459–461  
   influence of developments in linguistics,  
   458–459  
   influence of developments in neuroscience,  
   461–462  
   influence on applied psychology, 474–476  
   influence on developmental psychology,  
   470–471  
   influence on personality psychology,  
   473–474  
   influence on social psychology, 471–473  
   limitations of the computer metaphor for the  
   mind, 467–469  
   limitations on short-term memory processing,  
   463  
   mental imagery, 467  
   moral reasoning, 471  
   physiological basis of learning, 462  
   rebirth of, 455–469  
   reconstructed memory, 457, 468  
   schemas, 457, 470–471  
   TOTE (Test-Operate-Test-Exit) unit, 464  
   use of behavioral data, 465–467  
   use of heuristics, 468–469  
   work of George Miller, 462–464  
 cognitive revolution, 182, 455, 487  
   rebirth of cognitive psychology, 455–469  
 cognitive science, 457–458, 487  
 cognitive therapy, 474–475  
 completion tests, 487  
   introduction by Ebbinghaus, 168  
 computer metaphor for the mind, 459  
   Chinese Room argument, 469  
   limitations of, 467–469  
 computer science  
   influence on cognitive psychology,  
   459–461  
 conditioned reflexes, 409–410, 487  
 conscious attitudes, 487  
   role in making judgments, 178

- consciousness  
 adaptive nature of, 266  
 behaviorist focus away from, 407  
 contrasting theories of Münsterberg and Wundt, 135  
 elements of, 127–129  
 functionalist view, 295–296  
 immediate experience of (Wundt), 99  
 role of meaning, 181  
 sensations as components of, 47  
 threshold of (Leibniz), 42–43  
 view of William James, 266
- correlation coefficient, 236  
 Hull's machine for computing, 434
- counseling psychology, 336  
 approach of Carl Rogers, 343–344  
 career guidance, 342–343  
 clear identity for the discipline, 344  
 identity issues of clients, 344–345  
 nondirective, humanistic approach, 343–344
- countertransference, 322
- creative synthesis, 100, 487
- Cummings Center for the History of Psychology, 5, 6
- cybernetics, 463, 487
- depth perception, 297  
 nativist versus empiricist explanation, 170–171
- developmental psychology, 49, 172, 231, 270, 278  
 Binet's studies of cognition in children, 353–354  
 evolutionary perspective, 277  
 fear conditioning in children (Little Albert), 411–413  
 influence of cognitive psychology, 470–471  
 intelligence testing for young children, 255  
 lack of recognition for Piaget's research collaborators, 395  
 language development in young children, 290  
 language learning in children, 311–312  
 overcoming fears in children (Peter B.), 418–419  
 recapitulation theory, 277  
 study of aging, 277–278  
 work of G. Stanley Hall, 276–278
- dissonance theory, 472–473
- diversity  
 issues in the history of psychology, 11–18  
 progress in psychology, 484
- doctrine of specific nerve energies, 58–59, 487
- dreams  
 Freud's interpretation of, 324
- drives, 301
- dualism, 56, 487  
 view of Descartes, 32–35
- ecological validity, 307, 465, 488  
 criticism of memory research, 166  
 memory research examples, 166
- education  
 arrangement of the school day, 167–168  
 Dewey's approach to education reform, 292–293  
 doctrine of formal discipline, 299  
 drive for universal education, 47  
 empiricist view of John Locke, 36–37  
 Gestalt approach to teaching children, 195–197  
 need for reform of the traditional teaching style, 289  
 opportunities provided by the Morrill Act (1862), 251  
 programmed learning and teaching machines, 448–450  
 quality of early childhood education, 255  
 role in democracy, 291–292  
 school psychology, 345–348  
 Skinner's teaching machine, 448–450  
 Thorndike's approach to teaching, 307–308  
 view of John Dewey, 291–293  
*See also* school psychology.
- ego (Freud), 325–326, 488
- Electra complex, 325
- electricity  
 role in the nervous system, 60–62
- electroencephalograph (EEG)  
 development of, 86
- elementism, 186, 291
- ELIZA computer program, 460
- emotions  
 cognitive-evaluative theory (Stumpf), 172  
 developing some control over, 267  
 elicited during deep-brain stimulation, 85  
 fear reaction to an unfamiliar stimulus, 203  
 James-Lange theory, 267, 282  
 work of Darwin, 230–231
- empiricism, 2, 47, 265, 310, 488  
 criticism of Immanuel Kant, 51  
 explanation of depth perception, 170–171  
 John Locke, 35–38  
 Newton and the color spectrum, 26  
 subjective idealism of George Berkeley, 38–42

- epistemology, 470
- eugenics, 12, 245–247, 309, 310, **488**  
 controversial study of the Kallikak family, 358–360  
 courses at colleges and universities in the United States, 361  
 forced sterilization in the United States, 360–361  
 influence in Nazi Germany, 247  
 intelligence testing used to promote, 376–378  
 positive eugenicists, 254–255  
 promotion by Galton, 245–246  
 used as justification for discrimination and atrocities, 247  
 view of G. Stanley Hall, 278
- evolutionary perspective, 219  
 continuity of species, 229  
 Darwin's theory of evolution, 224–232  
 Darwin's voyage on the *Beagle*, 221–222  
 human development, 277  
 implications of Darwin's work for psychology, 230–231  
 influence of evolutionary theory, 232  
 influence on functionalism, 296  
 opposition to, 272  
 Oxford debate on evolution (1860), 227–229  
 recapitulation theory, 277  
 underlying mechanism for evolutionary change, 229  
 view of John Dewey, 291–292
- experimental aesthetics, 333
- Experimental Psychology* (Titchener), 124, 127, 131
- Experimental Psychology* (Woodworth, 1938), 301
- externalism, 8–9, **488**
- Fechner's Law, 159, **488**
- feelings  
 creative synthesis with sensations, 100  
 element of consciousness, 127–128  
 paired-comparisons method, 106  
 three-dimensional theory of feeling, 105–106
- field theory, 208
- forensic psychology  
 beginning of, 141–143  
 case of *Frye v. United States* (1923), 145  
 eyewitness testimony, 142–143  
 false confessions, 141–142, 146  
 jury system, 146  
 lie detection, 143–145  
 polygraphs, 144–145
- free association, 178, 279, **488**  
 use in cases of hysteria, 321
- free will, 48–49
- Freudian slips (parapraxes), 279, 324–325, **490**
- Frye v. United States* (1923), 145
- functional magnetic resonance imaging (fMRI), 477–478
- functionalism, 124–126, 134, 139, 183, 231, 266, 282, 285, 301, 310  
 adaptive acts, 297  
 beginning with the work of John Dewey, 290–291  
 evolutionary perspective, 296  
 influence on contemporary psychology, 297  
 origin in the University of Chicago, 288  
 Watson's rejection of, 407  
 work of Angell, 295–296
- Galton whistle, 236–237
- gastric reflex, 388
- generalization, **488**  
 of a conditioned reflex, 390
- genetic psychology, 277, 278
- genius  
 Terman's study of, 368–371
- Gestalt psychology, 48, 183, **488**  
 applied research approach of Lewin, 204–216  
 approach to teaching children, 195–197  
 conceptual foundations, 185–186  
 definition of Gestalt, 185  
 fate of Gestalt psychology in Nazi Germany, 193–195  
 founding of, 185  
 generality of Gestalt principles, 190–191  
 Gestalt completion test in chimpanzees, 191  
 illusions, 193  
 insight learning, 197–204  
 legacy of, 216–217  
 phi phenomenon, 188  
 physical and perceptual environments, 193  
 principles of perception, 188–190  
 reaction to structuralism, 188  
 spontaneous productive thinking, 197  
 transposition experiment, 202–203  
 Wertheimer's investigations into apparent movement, 186–188  
 work of Tamara Dembo, 206–208  
 Zeigarnik effect, 190–191
- habit strength, 437, **488**
- habits, 231  
 formation of, 267–269  
 learning and, 50

- Halstead-Reitan Neuropsychological Battery, 476  
 hedonism, 49, 488  
 heredity  
     Galton's view of inheritance of individual differences, 239–240  
     Lamarckian hypothesis of inheritance, 152–153  
 heuristics, 468–469, 488  
 hierarchical model of cerebral organization, 80–81  
 hierarchy of needs (Maslow), 473–474  
 historicism, 6–8, 488  
 history of psychology, 5  
     approach of the present book, 18–20  
     approach to controversial issues, 11–12  
     approaches to, 6–10  
     approaches to documenting, 4–6  
     archival collections, 5–6  
     aspects that have not been included, 18  
     attempts to “cure” homosexuality, 11  
     claims that stigmatized or disparaged certain groups, 11  
     contrasting representations of Titchener and Münsterberg, 153–154  
     different personal motivations, 20  
     diversity and inclusion issues, 11–18  
     early histories of psychology, 4–6  
     erroneous views about female IQ, 11  
     exclusion of people of color, 11  
     exclusion of women, 11  
     externalist approach, 8–9  
     historicist approach, 6–8  
     influence of chance events, 19–20  
     influence of the zeitgeist, 9–10  
     internalist approach, 8–9  
     naturalistic approach, 9–10  
     nature-versus-nurture debate, 2  
     neglected African-American psychologists, 12–14  
     neglected contributions by women, 15–18  
     new history of psychology approach, 6–10  
     old history of psychology approach, 6–10  
     online resources, 6  
     personalistic approach, 9–10  
     possibility of a science of the mind, 1–2  
     prejudice against certain ethnic groups, 11  
     presentist approach, 6–8  
     question of the mind–body relationship, 2  
     reasons for studying, 3–4  
     recurrent questions, 1–2  
     status of women in psychologist couples, 16–18  
     Whig history of psychology, 7–8
- History of Psychology* (journal), 5  
 humanistic psychology, 343–344, 473–474

- challenges to the validity and interpretation of results, 378–380
- completion tests, 168
- controversy caused by *The Bell Curve* (1994), 381–383
- development of the Binet-Simon scales, 354–357
- early work of Ebbinghaus, 167–168
- erroneous views about female IQ, 11
- eugenic sterilization related to intelligence assessment, 360–361
- introduction into the United States, 357–358
- longitudinal study of gifted children, 368–371
- mental age, 356
- ongoing controversies over, 380–382
- point scale developed by Yerkes, 372–373
- profile analysis, 475–476
- programs for gifted children, 364
- reaction to the results of the Army Testing Project, 376–378
- social bias in the UK eleven-plus examination, 381
- Stanford-Binet scale, 367–368, 492
- Terman's revision of the Binet-Simon scales, 367–368
- Terman's study of genius, 368–371
- used to promote eugenic and anti-democratic views, 376–378
- used to restrict immigration, 361–363
- Wechsler Adult Intelligence Scale (WAIS), 475–476
- young children, 255
- internalism, 8–9, 489
- introspection, 282, 489
  - approach of William James, 266
  - criticism of the introspective method, 128–129
  - imageless thought, 181
  - making judgments, 178–179
  - method of Titchener, 126–127
  - rejection by behaviorists, 407
  - Wundt's experimental process, 100–101
- James-Lange theory, 267, 282, 489
- Jordan curves, 208, 489
- just-noticeable difference (jnd), 158, 489
- Lamarckian hypothesis of inheritance, 152–153
- latent learning, 428
- law of effect, 305, 312, 443, 489
- learning
  - cats in puzzle boxes, 305–307
  - effect of familiarity, 163
  - effects of interference, 176
  - habits and, 50
  - influence of Alexander Bain, 50
  - insight learning, 197–204, 428–429
  - instincts and, 50
  - latent learning, 428
  - meaningful versus meaningless material, 165
  - physiological basis, 462
  - place versus response learning, 429–430
  - spaced practice versus massed practice, 165
  - Thorndike's animal studies, 304–307
  - trial-and-error learning, 50, 203
- limen, 157
- linguistics
  - language acquisition, 458–459
- Logic Theorist computer program, 460, 463
- massed practice, 489
  - effects on learning and remembering, 165
- memory
  - associationist view, 238
  - Bartlett's work on remembering, 456–457
  - ecological validity of psychological research, 166
  - effect of familiarity, 163
  - effect of overlearning, 164
  - effect of the passage of time, 164–165, 176
  - evidence for short- and long-term memory, 465–467
  - false memories, 468
  - insights from reaction-time studies, 104–105
  - John Dean's testimony to the Watergate investigation (case study), 465
  - length of the forgetting curve, 166
  - limitations on short-term memory processing, 463
  - long-term memory organization and reaction times, 105
  - meaningful versus meaningless material, 165
  - mnemonics, 238
  - modal model of Atkinson and Shiffrin, 465–467
  - nonsense syllable experiments of Ebbinghaus, 163–166
  - original research of Ebbinghaus, 161–166
  - primacy effect, 466–467
  - recency effect, 466–467
  - reconstructed memory, 457, 468
  - schemas, 457
  - serial position effect (serial position curve), 466–467

570 SUBJECT INDEX

- memory (cont.)
  - spaced practice versus massed practice, 165
  - unreliability of, 238
  - view of William James, 269
- mental age, 356, **489**
- mental set effects, 180, **489**
- mental testing
  - work of James McKeen Cattell, 253
- mind, 50, 104, 231, 253, 273
  - associations of ideas, 47
  - computer metaphor for, 459
  - mental chemistry view of John Stuart Mill, 48
  - mental mechanics view of James Mill, 47–48
  - sensations as components of, 47
- mind–body relationship, 2
  - dualist view of Descartes, 32–35
  - Fechner’s approach, 157
  - nativism of Leibniz, 42–43
- mind-cures
  - investigations by James, 264
- mind-reading experiments, 303–304
- molar behaviorism, 426–428, **490**
- monads (Leibniz), 42–43
- motivation
  - hierarchy of needs (Maslow), 473–474
- motivational psychology, 301–302
  
- National Academy of Sciences, 258, 293, 312, 432, 440
  - woman members, 122
- nativism, 2, 53, **490**
  - explanation of depth perception, 170–171
  - Gottfried Wilhelm von Leibniz, 42–43
  - Immanuel Kant, 50–52
- natural selection, 225–226, **490**
- naturalistic history, 9–10, **490**
- nature versus nurture
  - debate in psychology, 2
  - environmentalist position of Watson, 419–420
  - Galton’s twin-study method, 243
  - Galton’s view on the predominance of nature, 241–242
  - nature as genetic inheritance, 242–243
  - studies of twins raised apart or together, 243–245
- neobehaviorism, 424, 452, **490**
  - synaptic transmission, 88–89
- nervous system development
  - Watson’s work with rats, 401–402
- neurology
  - work of Charcot, 319–320
- neuropsychological testing, 476
  
- neuroscience, 2
  - brain areas associated with reward and motivation, 85
  - influence on cognitive psychology, 461–462
- neuroscience foundations
  - animal brain studies (Flourens), 70–72
  - brain rhythms during sleep, 86
  - brain stimulation studies, 78–85
  - deep-brain stimulation, 85
  - description of spinal reflexes, 57
  - development of the electroencephalograph (EEG), 86
  - discovery of neurotransmitters, 88–89
  - doctrine of specific nerve energies, 58–59
  - early investigations of the brain, 63–65
  - effects of brain damage in Phineas Gage, 72–75
  - electrical stimulation of the brain, 79–85
  - electricity and the nervous system, 60–62
  - emotions elicited during deep-brain stimulation, 85
  - epilepsy treatment by brain surgery, 84
  - epileptic seizure process, 80–81
  - evidence of the importance of the brain, 56–57
  - function of the cerebellum (Flourens), 71
  - function of the cerebral lobes (Flourens), 71
  - function of the medulla oblongata (Flourens), 71
  - function of the thalamus (Fournie), 78–79
  - functions of different brain structures (Flourens), 70–72
  - functions specificity of spinal cord roots, 57–58
  - Galvani’s work on muscle contraction, 60–61
  - hierarchical model of cerebral organization, 80–81
  - historical awareness of the importance of the brain, 55–56
  - historical questions about the nervous system, 55
  - how the brain processes information, 86–88
  - human brain stimulation studies, 81–85
  - investigations of spinal cord functions, 57–58
  - localization of function in the brain, 70–89
  - localization of motor functions in the brain, 79–80
  - localization of sensory functions in the brain, 80
  - localization of speech and language in the brain, 75–78

- measurement of electrical activity in nerves (Du Bois-Reymond), 61  
 measurement of the speed of nerve impulses (Helmholtz), 62  
 memory elicitation during brain stimulation, 84  
 neuron and reticular theories of brain structure, 86–88  
 number of neurons in the brain, 63  
 origins of neuroscience, 64–65  
 phrenology, 65–70  
 physiological optics work of Hermann von Helmholtz, 59–60  
 plasticity of the brain in response to trauma, 72  
 recording the brain's activity, 85–86  
 role of the brain in consciousness, 56–57  
 sensory physiology, 58–62  
 synaptic transmission, 88–89  
 trepanation of skulls in prehistoric times, 55  
 unity of function of the brain (Flourens), 71–72  
 work of Willis on brain structure and function, 64–65  
 Young-Helmholtz Trichromatic Theory of color vision, 60
- new history of psychology approach, 6–10  
 nonsense syllables, 425, 456, **490**  
   memory research paradigm, 163–166  
   work of G. E. Müller, 176  
 normal distribution, **490**  
   traits in human populations, 239–240
- Oedipus complex, 325, **490**  
 old history of psychology approach, 6–10  
*On the Origin of Species* (Darwin, 1859), 226–227, 386  
 operant conditioning, 341, **490**  
   extinction, 443  
   industrial applications, 451  
   schedules of reinforcement, 444–445  
   shaping of behavior, 445–446  
   Skinner's Utopian novel, 446–447  
   work of Skinner, 443–444
- paired-associate method, 284, **490**  
 Papez circuit, 85  
 parapraes (Freudian slips), 279, 324–325, **490**  
 parapsychical research, 152  
 parapsychology, 265  
 people of color  
   historical exclusion in psychology, 11  
   personalistic history, 9–10, **490**  
   personality development  
     Freud's psychosexual theory of, 325–326  
   personality psychology  
     influence of cognitive psychology, 473–474  
   personality testing, 337–338  
   personality theory  
     id, ego, and superego (Freud), 325–326  
     *Perspectives on Behavior Science*, 440  
 phi phenomenon, 188, **490**  
 philosophical foundations, 22  
   associationism, 43–50  
   empiricism of John Locke, 35–38  
   importance of the Renaissance and post-Renaissance eras, 52–53  
   nativism of Immanuel Kant, 50–52  
   nativism of Leibniz, 42–43  
   subjective idealism of George Berkeley, 38–42  
   utilitarianism, 49  
*Philosophische Studien* (Philosophical Studies), 101–102  
 phobias, 341  
 phrenology, 65–70, 144, 173, 234, 271, 366, **490**  
 positive transfer, **491**  
   role in problem solving, 201  
 positivism, 177–178, **491**  
 pragmatic philosophy, 265  
 presentism, 6–8, **491**  
*Principles of Psychology* (James, 1890), 258–264, 266–269, 298, 303, 425  
 projective tests, 338, **491**  
 psychic causality, 177  
 psychic phenomena, 480  
   perceived association with psychological laboratories, 141  
 psychic research, 273  
 psychical phenomena, 434  
   investigations by James, 264–265  
 psychical reflexes (Pavlov), 388, 389–390  
 psychoanalysis, 140, 279–280  
   banned by the Nazis, 329–330  
   countertransference, 322  
   Freud's first use of the term, 321  
   legacy of, 331–332  
   Skinner's criticism of, 450  
   transference, 322  
 psychoanalytic techniques  
   catharsis, 321–322  
   free association, 321  
   patient–therapist relationship, 321–322  
   talking cure, 321–322  
   treatment of hysteria, 321–322

## 572 SUBJECT INDEX

- psychological laboratories
  - establishment in the United States, 108–109, 118, 120–121
  - founding in France, 107
  - Münsterberg at Harvard, 136–138
  - Münsterberg's laboratory at the University of Freiburg, 136
  - perceived association with psychic phenomena, 141
  - roles of experimenter and participant, 106–107
  - Titchener's model at Cornell, 124
- psychophysics, 156–161, 176, 272, 282
- psychosexual theory of personality development (Freud), 325–326
- racial differences
  - psychological testing and, 300
- rationalism, 31, 265, 491
- reaction potential, 437, 491
- reaction-time studies, 101, 102
  - acts of will, 179
  - choice reaction times, 104
  - individual differences in astronomical observers, 102–103
  - insights into long-term memory organization, 105
  - insights into memory processes, 104–105
  - measurements using the Hipp chronoscope, 103–104
  - mental set effects, 180
  - simple reaction times, 104
  - speed of mental processes, 104
  - task fractionation, 179–180
- recapitulation theory, 277, 491
- recent trends in psychology, 476–477
- reflex arc concept in psychology, 290–291
- replication crisis
  - in psychology, 480
  - in social psychology, 10
- Rorschach Inkblot test, 337–338, 491
- schemas, 457, 470–471, 491
- school psychology, 336
- scientific management
  - worker productivity and, 205–206
- scientist-practitioner model, 339, 491
- seduction theory, 322–324, 491
- self-actualization, 474
- self-psychology
  - work of Mary Whiton Calkins, 285
- sensations, 491
  - as components of the mind, 47
  - characteristics of, 99
  - creative synthesis with feelings, 100
  - element of consciousness, 127–128
- sensory mapping, 170
- sensory physiology, 167
  - early investigations, 58–62
- sexism in psychology, 132–133
- simple reaction times, 104, 492
- simulations of work situations, 147
- Skinner box, 443
- slavery, 231
  - abolitionist movement, 47
- social advocacy
  - psychology and, 478–479
- social psychology, 95, 152
  - influence of cognitive psychology, 471–473
  - replication crisis, 10
- Society for the Psychological Study of Social Issues, 215, 432
- Society of Experimental Psychologists, 122, 432, 440, 452
- Society of Experimental Psychology (SEP), 132
- spaced practice, 492
  - effects on learning and remembering, 165
- sport psychology
  - psychological testing of Babe Ruth, 312
- Stanford-Binet scale, 367–368
- Stanford University, 366–367, 368
- statistical reforms, 479–480
- statistics, 108
  - average man concept, 240
  - correlation coefficient, 236
  - historical milestones, 240–241
  - normal distribution of traits in human populations, 239–240
  - origin of various statistical terms, 240–241
  - relevance of Galton's work for psychology, 240
  - social physics criticism, 240
- stereotypes, 151
- stimulus error, 126
- stimulus perception
  - just-noticeable difference (jnd), 158
  - relationship to stimulus intensity, 158–159
- Strong Interest Inventory, 342
- Strong Vocational Interest Test, 256
- structuralism, 100–101, 118, 124–127, 133, 188, 266, 282, 285, 291, 492
  - criticism of the introspective method, 128–129

- criticisms of Angell, 295
- introspective method, 126–127
- Watson's rejection of, 407
- subjective idealism, 38–42, 492
- superego (Freud), 325–326, 492
- systematic desensitization, 341, 492
- systematic experimental introspection, 492
  - role in decision making, 180–181
- tabula rasa* view of the mind at birth, 2, 44
- talking cure, 317
  - case of Bertha Pappenheim (Anna O.), 321–322
- task fractionation, 179–180, 492
- Thematic Apperception Test (TAT), 257, 338, 492
- three-dimensional theory of feeling, 105–106, 492
- threshold of consciousness (Leibniz), 42–43
- token economy, 341, 492
- tone psychology
  - work of Stumpf, 171
- topological psychology, 205, 208–211, 492
- TOTE (Test-Operate-Test-Exit) unit, 464, 492
- transference, 322
- trepanation, 493
  - in prehistoric times, 55
- tropisms, 401, 442, 493
- Turing Test, 459–460
- twin-study method, 493
  - dizygotic (fraternal) twins, 243
  - Galton's study of nature versus nurture, 243
  - monozygotic (identical) twins, 243
  - twins raised apart or together, 243–245
- two-point threshold, 157–158, 493
- unconscious
  - access through Freudian slips (parapraxes), 324–325
  - access through interpretation of dreams, 324
- utilitarianism, 493
  - John Stuart Mill, 49
- Vail model, 339, 493
- variability hypothesis, 309–310, 493
- visual perception
  - depth perception, 170–171
  - positive afterimages, 156–157
  - studies of, 101
  - Young-Helmholtz Trichromatic Theory of color vision, 60
- vocational counseling, 336
- Völkerpsychologie* (Wundt), 109, 110–111, 493
- voluntarism, 101, 493
- Weber's Law, 158, 493
- Wechsler Adult Intelligence Scale (WAIS), 475–476
- Wechsler-Bellevue Intelligence Scales, 257
- Wernicke's aphasia, 78
- Whig history of psychology, 7–8
- women in psychology
  - Anna Freud, 328
  - Bluma Zeigarnik, 190–191
  - discrimination and prejudice faced by, 255, 336
  - Elizabeth Loftus, 467–468
  - erroneous views about female IQ, 11
  - erroneous views about women's brains, 10
  - Gestalt psychology and Tamara Dembo, 206–208
  - historical exclusion from psychology, 11
  - Karen Horney, 328
  - Letta Stetter Hollingworth, 309–310
  - Margaret Floy Washburn, 121–122
  - Mary Whiton Calkins, 282–285
  - membership of the APA, 275
  - neglected contributions in the history of psychology, 15–18
  - problems of sexism and male chauvinism, 132–133
  - Psyche Cattell, 255
  - psychoanalysts, 295–296
  - status in psychologist couples, 16–18
- women's rights
  - activism of John Stuart Mill, 45–47
  - movement for voting rights for women, 46–47
  - prevailing Victorian views on the nature of women, 46
  - vision of Mary Wollstonecraft, 45–46
- World War I
  - anti-German feeling in the United States, 151–152
  - Army Testing Project (United States), 311, 373–378
  - clinical psychiatry, 181
  - controversial views of Wilhelm Wundt, 113–114
  - difficulties in post-war Germany, 175
  - impact of war experience on Kurt Lewin, 205
  - impact on Külpe in Germany, 182
  - impact on Stumpf in Germany, 175–176
  - loss of influence of German psychologists, 183
  - loss of the work of German psychologists, 175–176

## 574 SUBJECT INDEX

- World War I (cont.)  
opposing views on American participation in,  
256–257  
psychological tests for risk of shell shock,  
300–301  
screening of applicants for pilot training, 410
- World War II  
influence of eugenics in Nazi Germany, 247  
Lewin's involvement in the American war  
effort, 214–216  
loss of influence of German psychologists, 183  
psychological treatment of returning  
servicemen, 338  
Würzburg school, 178–182
- Young-Helmholtz Trichromatic Theory of color  
vision, 60, 493
- Zeigarnik effect, 190–191, 493  
zeitgeist, 493  
influence on the development of ideas,  
9–10
