<i>Foreword to the Second Edition</i>	page xi
ELSPETH M. MCLACHLAN	
<i>Foreword to the First Edition</i>	xiii
ELSPETH M. MCLACHLAN	
<i>Preface</i>	xvii
<i>List of Abbreviations</i>	xix
Introduction: The Autonomic Nervous System and the Regulation of Body Functions	1
Autonomic Adjustments of the Body and Behavior	1
Autonomic Nervous System and Brain	2
Precision of Autonomic Regulation and its Failure in Disease	4
Organization and Aims of the Book	5
PART I THE AUTONOMIC NERVOUS SYSTEM: FUNCTIONAL ANATOMY AND INTEROCEPTIVE AFFERENTS	7
Chapter 1 Functional Anatomy of the Peripheral Sympathetic and Parasympathetic Systems	9
1.1 Definitions and Limitations	9
1.2 Gross Anatomy of the Peripheral Sympathetic and Parasympathetic Nervous Systems	11
1.3 Reactions of Autonomic Target Organs to Activation of Sympathetic and Parasympathetic Axons	18
1.4 Neuropeptides in Autonomic Neurons and the Idea of “Neurochemical Coding”	22
1.5 The Peripheral Autonomic Nervous System in Submammalian Vertebrates: A Comparative View	25
1.6 The Early Fascination with the Autonomic Nervous System: Little Brains and Sympathies	30
Chapter 2 Interoceptive Afferent Neurons and Autonomic Regulation with Special Emphasis on the Viscera	34
2.1 Visceral Primary Afferent Neurons: General Characteristics	35
2.2 Visceral Primary Afferent Neurons as Interface Between Visceral Organs and Brain	39
2.3 Receptive Functions of Visceral Afferent Neurons	41
2.4 Role of Visceral Afferent Neurons in Visceral Nociception and Pain	48
2.5 Relation Between Functional Types of Visceral Afferent Neurons, Organ Regulation and Sensations	52

2.6	Central Ascending Pathways Associated with Autonomic Regulation and Body Interoception: A Generalization	56
-----	--	----

PART II FUNCTIONAL ORGANIZATION OF THE PERIPHERAL AUTONOMIC NERVOUS SYSTEM

Chapter 3 | The Final Autonomic Pathway and its Analysis

3.1	The Final Autonomic Pathway	73
3.2	Functions of the Autonomic Nervous System and Levels of Integration	74
3.3	Activity in Peripheral Autonomic Neurons Reflects the Central Organization	76
3.4	Reflexes in Autonomic Neurons as Functional Markers	77
3.5	Some Methodological Details About Recording From Peripheral Autonomic Neurons In Vivo	78
3.6	Confounding Effects of Anesthesia in Animal Experiments	84

Chapter 4 | The Peripheral Sympathetic and Parasympathetic Pathways

4.1	Sympathetic Vasoconstrictor Pathways	87
4.2	Sympathetic Non-Vasoconstrictor Pathways Innervating Somatic Tissues	100
4.3	Sympathetic Non-Vasoconstrictor Neurons Innervating Pelvic Viscera and Colon	109
4.4	Other Types of Sympathetic Neuron	112
4.5	Adrenal Medulla	114
4.6	Sympathetic Neurons Innervating Immune Tissues	117
4.7	Proportions of Preganglionic Neurons in Major Sympathetic Nerves	120
4.8	Parasympathetic Systems	122
4.9	Genetic-Molecular Aspects of Functional Differentiation of Autonomic Neurons: A Summary	128

Chapter 5 | The Enteric Nervous System

5.1	Anatomy, Components and Global Functions of the Enteric Nervous System	135
5.2	The Enteric Nervous System is an Autonomic System in its Own Right	141
5.3	Regulation of Motility and Intraluminal Transport in the Small and Large Intestines: The Neural Basis of Peristalsis	143
5.4	Integration of Enteric Neural, Pacemaker and Myogenic Mechanisms in Generation of Motility Patterns	148
5.5	Regulation of Secretion and Transmural Transport	154
5.6	Defense of the Gastrointestinal Tract and Enteric Nervous System	155
5.7	Control of the Enteric Nervous System by Sympathetic and Parasympathetic Pathways	158

PART III TRANSMISSION OF SIGNALS IN THE PERIPHERAL AUTONOMIC NERVOUS SYSTEM 165

Chapter 6 | Impulse Transmission Through Autonomic Ganglia 167

- 6.1 Morphology, Divergence and Convergence in Autonomic Ganglia 169
- 6.2 Strong and Weak Synaptic Inputs From Preganglionic Neurons 172
- 6.3 The Autonomic Neural Unit: Structural and Functional Aspects 179
- 6.4 Electrophysiological Classification, Ion Channels and Relation to Functions of Sympathetic Postganglionic Neurons 181
- 6.5 Different Types of Autonomic Ganglia and Their Functions In Vivo 184
- 6.6 Non-Nicotinic Transmission and Potentiation Resulting From Preganglionic Stimulation in Sympathetic Ganglia 192

Chapter 7 | Mechanisms of Neuroeffector Transmission 200

- 7.1 Transmitter Substances in Postganglionic Neurons 200
- 7.2 Principles of Neuroeffector Transmission in the Autonomic Nervous System 202
- 7.3 Specific Neuroeffector Transmissions 210
- 7.4 Integration of Neural and Non-Neural Signals Influencing Blood Vessels 217
- 7.5 Unconventional Functions of Sympathetic Noradrenergic Neurons 219

PART IV REPRESENTATION OF THE AUTONOMIC NERVOUS SYSTEM IN THE SPINAL CORD AND LOWER BRAIN STEM 227

Chapter 8 | Anatomy of Central Autonomic Systems 231

- 8.1 Tools to Investigate the Anatomy of the Central Autonomic Systems 231
- 8.2 Morphology and Location of Preganglionic Neurons 234
- 8.3 Nucleus Tractus Solitarii 245
- 8.4 Sympathetic and Parasympathetic Premotor Neurons in the Brain Stem and Hypothalamus 249

Chapter 9 | Spinal Autonomic Systems 261

- 9.1 The Spinal Autonomic Reflex Pathway as a Building Block of Central Integration 261
- 9.2 Spinal Reflexes Organized in Sympathetic Systems 264
- 9.3 Sacral Parasympathetic Systems 272
- 9.4 Autonomic Dysreflexia Chronically After Spinal Cord Transection 283
- 9.5 The Spinal Cord as an Integrative Autonomic Organ 285

Chapter 10	Regulation of Organ Systems by the Lower Brain Stem	292
10.1	General Functions of the Lower Brain Stem	293
10.2	Sympathetic Premotor Neurons in the Ventrolateral Medulla Oblongata	294
10.3	Baroreceptor Reflexes and Blood Pressure Control	309
10.4	Arterial Chemoreceptor Reflexes in Sympathetic Cardiovascular Neurons	318
10.5	Sympathetic Premotor Neurons in the Caudal Raphe Nuclei	321
10.6	Coupling Between Regulation of Autonomic Pathways and Regulation of Respiration	324
10.7	Vagal Efferent Pathways and Regulation of Gastrointestinal Functions	339

PART V THE CENTERS OF HOMEOSTASIS IN THE MESENCEPHALON AND HYPOTHALAMUS AND THEIR TELEENCEPHALIC CONTROL 353

Chapter 11	Integration of Autonomic Regulation in the Upper Brain Stem and Limbic–Hypothalamic Centers: A Summary	355
11.1	Functions of the Autonomic Nervous System: Cannon and Hess	355
11.2	General Aspects of Integrated Autonomic Responses	361
11.3	Autonomic Responses Activated Quickly During Distinct Behavioral Patterns	365
11.4	Emotions and Autonomic Reactions	378
11.5	Integrative Responses Organized in the Hypothalamus	384
11.6	Synopsis: The Wisdom of the Body Revisited	391

Epilogue	The Autonomic Nervous System in Future Research: Some Personal Views	397
	WILFRID JÄNIG, ELSPETH M. MCLACHLAN
