Foreword	<i>page</i> xiii
Preface: There is More to Resistance to Evolution than Religion	xv
Acknowledgments	xxi
1 The Public Acceptance of Evolution	1
Evolution in the Polls	1
Evolution Polls in Europe	4
Evolution Polls in the USA	7
Evolution Polls at the Global Level	17
2 Religious Resistance to Accepting Evolution	23
Purpose and Design in Nature	23
Evolution and Worldviews: Perceived Conflicts	27
Evolution and Religion: Scientists' Views	31
Distinguishing Between Knowing and Believing	36
3 Conceptual Obstacles to Understanding Evolution	42
Concepts and Conceptual Change	42
Design Teleology as a Conceptual Obstacle to Understanding Evolution	45
Psychological Essentialism as a Conceptual Obstacle to Understanding Evolution	53
Conceptual Change in Evolution	62
4 Charles Darwin's Conceptual Change	70
The Development of Darwin's Theory	70
From Natural Theology to Natural Selection	75

xii CONTENTS

The Publication of the <i>Origin of Species</i>	81
Science and Religion in the Reviews of the <i>Origin of Species</i>	85
5 Common Ancestry	90
The Evolutionary Network of Life	90
Homology and Common Descent	98
Homoplasy and Convergence	107
Evolutionary Developmental Biology	115
6 Evolutionary Processes	121
Adaptation and Natural Selection	121
Stochastic Events and Processes in Evolution	127
Speciation, Extinction, and Macroevolution	133
Evolutionary Explanations and the Historicity of Nature	142
7 Evolutionary Theory and the Nature of Science	149
Understanding the Nature of Science	149
The Virtues of Evolutionary Theory	153
Scientism and the Limits of Science	158
Questions Not Answered by Evolutionary Theory	164
Concluding Remarks: The Implications of Evolutionary Theory for Human Life	169
Summary of Common Misunderstandings	173
References	176
Figure Credits	185
Index	188
