
Index

- p -Newton, 159
- t -th Hadamard power, 128
- (convex) cone, 162
- (i,j)-path, 157
- (right) Perron eigenvector, 58
- (right) null space, 114
- (strictly) codefinite pair, 172
- (strictly) copositive of order m , 171

- acute cone, 40
- allow **MSP**, 30
- allow **RSP**, 30
- allow **SP**, 25
- almost (strictly) semimonotone, 53
- almost **C**, 177
- almost \mathbf{C}^+ , 177
- almost **SC**, 177
- almost diagonally dominant P-matrices, 88
- almost principal submatrices, 109
- associated quadratic form, 174

- B-matrix, 58
- block graph, 155
- block P-matrices, 88
- buckle, 157

- Cayley transform, 57
- Cholesky factorization, 10
- column (row) deleted submatrix, 16
- column diagonally dominant, 12
- common semipositivity vector, 59
- comparison matrix, 58
- complementary nullities, 114
- completely positive matrix, 11
- completion of a partial matrix, 153
- completion to a P-matrix, 88
- cone, 3, 39
- congruence of A , 168
- conjugate transpose, 1
- contiguous minors, 9
- convex, 3
- convex combination, 3
- convex hull, 4
- Copositive, 164
- copositive, 10
- copositive +, 10
- copositive with respect to a cone K , 167
- Copositive-plus, 164
- CP-rank, 11
- critical exponent, 135
- cycle of length, 59
- cycle product, 120
- cycle product inequalities, 120

- determinantal inequalities, 8
- diagonal Lyapunov solution, 91
- diagonal Lyapunov solutions, 95
- diagonally dominant matrix, 2
- diagonally dominant of its column entries, 94
- diagonally dominant of its columns, 93
- diagonally dominant of its row entries, 94
- diagonally dominant of its rows, 93
- diagonally symmetrizable, 127
- directed graph, 59
- directed graph of A , 121
- dispersion, 75
- doubly nonnegative matrices, 10, 135
- doubly positive matrices, 10

- Drazin inverse, 161
 dual, 4, 39
 dual of the **IM** matrices, 127

 essentially triangular, 157
 Euclidean Jordan Algebras, 88
 eventually inverse M-matrix, 128
 eventually nonnegative (positive), 7
 exceptional (copositive) matrix, 165
 extreme (copositive) matrix, 167
 extreme copositive quadratic form, 165
 extreme point, 3

 Fan product, 8
 Fischer's inequality, 8
 fronted positives, 23

 generalized diagonally dominant matrix, 75
 generalized ultrametric, 163
 generators, 3, 40
 Gershgorin's Theorem, 2
 group inverse, 39

 H^+ -matrix, 12
 H-matrix, 12, 58
 Hadamard (entry-wise) product, 126
 Hadamard power, 126
 Hadamard's inequality, 8
 half-space, 4
 Helly's Theorem, 4
 Hermitian, 1
 Hermitian adjoint, 1
 hidden Minkowski matrices, 58
 hyperplane, 4

 identically signed class, 148
 index of A , 161
 initial minors, 9
 interval from A to B , 147
 into copositivity preserver, 179
 inverse M , 8
 inverse M -matrices, 90
 inverse M -matrix, 58
 irreducible matrices, 7
 irreducible matrix, 59

 Jacobi matrix, 156
 join of the (disjoint) graphs, 157

 k -chordal, 154
 k -path, 157
 Koteljanskii's inequality, 8

 Leading Implies All, 89
 leading principal minor, 2
 leading principal submatrix, 2
 left endpoint matrix, 148
 left Perron eigenvector, 58
 left semipositive, 15
 line in a matrix, 148
 Linear Complementarity Problem, 85
 Linear Differential Inclusion, 87
 linear interpolation problem, 158
 linear preserver, 30
 linear transformation of standard form, 179

 M -matrix, 8, 58, 90
 matrix interval, 45
 measure of irreducibility, 114
 mime, 58
 minimally **SP**, 16
 minimally semipositive, 27
 minor, 2
 MMA-matrix, 58
 monomial matrices, 15
 monotone, 12, 15
 Moore–Penrose, 39

 negative definite, 10
 negative semidefinite, 10
 Newton matrix, 159
 nonnegative matrices, 7
 nonnegative orthant, 7
 normal Jacobi matrix, 156
 normalized inverse M -matrix, 94
 nullity, 114

 obtuse cone, 40
 onto copositivity preserver, 179
 oscillatory, 155

 P_0 -matrices, 84
 P-LCP, 86
 P-LCP*, 86
 P-matrix, 8, 11, 55
 P-matrix interval, 87
 P-problem, 55, 74
 P-tensors, 88
 partial **IM**-matrix, 153
 partial **PP** (**SPP**) matrices, 153
 partial matrix, 153
 path product, 120, 121
 path product equalities, 131
 path product equality triple, 129
 path product inequalities, 120

- path product triple, 126
- Perron complement, 159
- Perron complements, 159
- Perron's Theorem, 2
- Perron–Frobenius eigenvalue, 90
- Perron–Frobenius theory, 6
- polar (dual), 167
- polyhedral, 3
- polyhedral cone, 40, 162
- positive definite, 9
- positive diagonal Lyapunov solutions, 8
- positive front, 23
- positive matrices, 7
- positive semidefinite, 10
- positive stable, 8, 57, 90
- principal minor, 2
- principal pivot transform, 56
- principal submatrix, 2
- proper cone, 39, 162
- proper principal submatrix, 2
- purely strict path product matrix, 123, 130

- Q-matrix, 65
- qualitative P-matrices, 70

- range symmetric, 39
- rank, 114
- reducing block, 106
- redundantly semipositive, 27
- regular interval, 87
- require **RSP**, 30
- require **SP**, 24
- right endpoint matrix, 148
- row diagonally dominant, 12, 57
- row positive, 15
- row-P-property, 88

- Schur complement, 3
- self-dual cone, 40
- self-polar, 167
- seminegative, 14
- seminonnegative, 14
- seminonpositive, 14
- semipositive, 12, 14
- semipositive cone, 39
- semipositive interval, 46
- semizero, 14
- sgn, 93

- sign nonsingular, 59
- sign of a cycle, 59
- sign pattern, 24
- signature matrix, 53, 59
- signature similarity, 59
- signed directed graph, 59
- simplicial cone, 40
- skew-Hermitian, 1
- Soules matrix, 59
- special (symmetric ultrametric matrix), 163
- spectral radius, 1
- spectrum, 1
- strict path product, 120
- strictly copositive, 10, 164
- strictly semimonotone, 48
- strictly ultrametric, 137
- strictly ultrametric matrix, 163
- strongly connected, 59
- strongly monotone, 30
- submatrix, 2
- symmetric **IM**, 154

- Theorems of the Alternative, 5
- totally nonnegative, 9, 155
- totally positive, 9, 155
- totally strict path product, 130
- totally strict path product matrices, 122
- transitive directed graph, 121
- transitive matrix, 121
- transpose, 1

- unipathic, 163
- unipathic graphs, 163
- unit simplex, 164
- univalent, 87
- upper path product bound, 143

- vector of mixed sign, 180
- vertices (vertex matrices), 147
- von Neumann expansion, 96

- weight of a directed path, 158
- weight of an edge, 158

- Z-matrices, 90
- Z-matrix, 7, 58
