	<i>Preface</i>	page xi
	<i>List of Symbols</i>	xii
1	Background	1
	1.1 Purpose	1
	1.2 Matrices	1
	1.3 Convexity	3
	1.4 Theorem of the Alternative	5
2	Positivity Classes	6
	2.1 Introduction	6
	2.2 (Entry-wise) Positive Matrices (EP)	6
	2.3 M-Matrices (M)	7
	2.4 Totally Positive Matrices (TP)	9
	2.5 Positive Definite Matrices (PD)	9
	2.6 Strictly Copositive Matrices (SC)	10
	2.7 Doubly Nonnegative Matrices (DN)	10
	2.8 Completely Positive Matrices (CP)	11
	2.9 P-Matrices (P)	11
	2.10 H^+ -Matrices (H⁺)	12
	2.11 Monotone Matrices (Mon)	12
	2.12 Semipositive Matrices (SP)	12
	2.13 Relationships among the Classes	12
3	Semipositive Matrices	14
	3.1 Definitions and Elementary Properties	14
	3.2 Sums and Products of SP Matrices	18
	3.3 Further Structure and Sign Patterns of SP Matrices	21

3.4	Spectral Theory of SP Matrices	25
3.5	Minimally Semipositive Matrices	27
3.6	Linear Preservers	30
3.7	Geometric Mapping Properties of SP Matrices	38
3.8	Strictly Semimonotone Matrices	48
4	P-Matrices	55
4.1	Introduction	55
4.2	Notation, Definitions, and Preliminaries	56
4.3	Basic Properties of P-Matrices	60
4.4	The Eigenvalues of P-Matrices	64
4.5	Special Classes of P-Matrices	66
4.6	The P-Problem: Detection of P-Matrices	74
4.7	The Recursive Construction of All P-Matrices	78
4.8	On Matrices with Nonnegative Principal Minors	84
4.9	Some Applications of P-Matrices	85
4.10	Miscellaneous Related Facts and References	87
5	Inverse M-Matrices	90
5.1	Introduction	90
5.2	Preliminary Facts	91
5.3	Diagonal Closure	93
5.4	Diagonal Lyapunov Solutions	95
5.5	Additive Diagonal Closure	96
5.6	Power Invariant Zero Pattern	98
5.7	Sufficient Conditions for a Positive Matrix to Be IM	100
5.8	Inverse M-Matrices Have Roots in IM	101
5.9	Partitioned IM Matrices	102
5.10	Submatrices	108
5.11	Vanishing Almost Principal Minors	112
5.12	The Path Product Property	119
5.13	Triangular Factorizations	123
5.14	Sums, Products, and Closure	124
5.15	Spectral Structure of IM Matrices	125
5.16	Hadamard Products and Powers, Eventually IM Matrices	126
5.17	Perturbation of IM Matrices	136
5.18	Determinantal Inequalities	151
5.19	Completion Theory	153
5.20	Connections with Other Matrix Classes	155
5.21	Graph Theoretic Characterizations of IM Matrices	157
5.22	Linear Interpolation Problems	158

	<i>Contents</i>	ix
5.23	Newton Matrices	158
5.24	Perron Complements of IM Matrices	159
5.25	Products of IM Matrices	160
5.26	Topological Closure of IM Matrices	160
5.27	Tridiagonal, Triangular, and Reducible IM Matrices	161
5.28	Ultrametric Matrices	163
6	Copositive Matrices	164
6.1	Introduction	164
6.2	Basic Properties of Copositive Matrices in $M_n(\mathbb{R})$	167
6.3	Characterizations of C , SC , and \mathbf{C}^+ Matrices	170
6.4	History	176
6.5	Spectral Properties	178
6.6	Linear Preservers	178
	<i>References</i>	189
	<i>Index</i>	206
