

Index of Subjects

- \hat{A} genus, 135, 291
- Abel's theorem, 210, 211
- algebra, 258
- almost symmetric algebra, 231
- Arens–Royden, 58
- Artin–Wedderburn theorem, 11, 160
- Atkinson, 69
- augmented, 258
- augmented algebra, 46, 47, 273

- b operator, 175, 252
- b' operator, 38
- B -operator, 165, 181
- Banach algebra, 55
- Banach limits, 59, 97
- bar construction, 259
- Bernoulli numbers, 135
- Beurling's theorem, 73
- Bott periodicity, 66, 75, 85

- C^* -algebra, 64, 88
- calculus, 81, 291
- Calkin algebra, 67, 69, 82
- canonical equations, 22
- Cartan's criterion, 19
- chain complex, 30
- characteristic classes, 209
- Chern character, 48, 208, 221, 285, 291
- Chern class, 208, 210, 221
- Chern polynomial, 134
- Chern–Simons theory, 210
- Chernoff, 110
- Chernoff's generator formula, 235
- Chernoff's product formula, 240
- Christoffel symbols, 109, 113

- circulant identity, 21
- Clifford algebra, 13, 122
- coalgebra, 254
- cochain complex, 32
- commutators, 9
 - commutators quotient space, 9, 245
 - commutators subspace, 251
- compact operators, 59, 61, 67, 126
- compact Riemann surface, 210
- completely positive, 92
- completions, 169
- complex, 176, 190, 268
- complex torus, 54
- connecting homomorphisms, 31
- connection, 142, 217
- connection on manifold, 201
- Connes, 268
 - Connes' B -operator, 181
 - Connes' S operator, 190, 264, 270
 - Connes' double cochain complex, 269
 - Connes' exact sequence, 191, 192
 - Connes' lemma, 194
 - Connes' long exact sequence, 272
- contractible, 184
- Cuntz, 76
- Cuntz algebra, 104, 295
- cup product, 38, 217
- current, 35
- curvature, 26, 42, 203, 221
- cyclic cochain, 164
- cyclic cocycle, 24, 34, 125, 248, 283
- cyclic cohomology, 196, 199, 253
- cyclic complex, 261
- cyclic homology, 190, 191, 196

- d'Alembert operator, 120
 de Rham, 32, 153, 187, 208
 de Rham cohomology, 206
 de Rham differentials, 147
 deformations of Fredholm modules, 278
 derivation, 7, 215
 differential graded algebra, 41, 151, 261
 Dirac operator, 120, 125, 202
 Dirichlet space, 67
 disc algebra, 59, 74, 100, 223
 divisors, 210
 double complex, 37, 38, 196, 197
 dual space, 56
 Duhamel's formula, 128, 225, 287, 290
- elliptic curve, 140
 elliptic theta function, 283
 essential spectrum, 82, 121
 essentially normal, 84
 étale, 155
 Euler characteristic, 53, 140
 exactness, 31
 extension, 25, 40, 82, 157, 167, 168
- Fedosov product, 162, 166, 168, 232, 295
 finitely generated, 43
 formal power series, 5, 33, 169
 Fourier coefficients, 60
 Fourier transform, 81, 244
 Fredholm module, 105, 125, 275
 Fredholm operator, 69
 free group, 102
 free module, 43, 155
- GAGA principle, 205
 Galois theory of linear differential equations, 118
 gauge groups, 204
 Gaussian integrals, 136
 Gelfand, 57
 Gelfand transform, 57
 Gelfand–Mazur, 57
 Gelfand–Naimark, 64, 89
 genus, 54, 173, 212
 Getzler, 291
 Goodwillie, 306
 graded algebra, 160
 Grassmann algebra, 14, 15
 Green's operator, 108, 172, 185
 Grothendieck groups, 46
 group algebra, 52, 156, 255
- Hamiltonian, 22, 239
 Hankel operator, 73, 86
 harmonic forms, 187, 188
 heat semigroup, 111
 Heisenberg's group, 237
 Helton and Howe, 85, 250
 Hermite, 130
 Hermite polynomials, 130, 223
 Hilbert basis theorem, 138
 Hilbert module, 96
 Hilbert space, 60
 Hilbert transform, 74, 107
 Hilbert–Schmidt, 68
 Hilbert–Schmidt operator, 61, 243
 Hille–Yoshida theory, 222
 Hochschild cohomology, 39
 reduced, 195
 Hochschild homology, 176, 190
 Hochschild–Konstant–Rosenberg theorem, 178, 194
 Hodge approximation to cyclic theory, 301
 Hodge decomposition, 171, 184, 187, 195
 holomorphic calculus, 106
 homomorphism modulo an ideal, 26, 41
 Hopf, 114
 Hopf algebra, 255
 Hopf lemma, 115
 Hörmander's symbol classes, 244
 hyperelliptic, 212
 hyperelliptic curves, 143
- ideal, 5
 index of a Fredholm operator, 69
 inner derivation, 25, 39, 101, 215
 inverse limit, 169, 299
 isometry, 72
- Jacobi identity, 18, 230
 Jacobi theta function, 108
 Jacobian matrix of partial derivatives, 143
 Jaffe, Lesniewski and Osterwalder, 289
 joint essential spectrum, 79
- K_0 , 45, 85
 K_1 , 94
 Kähler differentials, 145, 153, 160, 250
 Karoubi operator, 178, 179, 297
 Killing form, 18
 Koszul complex, 178

- λ , 178
 Laplace transform, 127
 Laplace–Beltrami operator, 109
 lattice, 143, 174, 212
 Lefschetz number, 70
 Lefschetz, Atiyah–Hodge and Grothendieck theorem, 294
 Lefschetz, Atiyah–Hodge and Grothendieck, 149
 Leibniz’s rule, 151
 Levi-Civita, 202
 Lie algebra, 18
 Lie bracket, 18
 lifting, 168, 170, 218
 Liouville’s theorem, 115, 210
 long exact sequence, 31, 195, 272, 302

 Maschke’s theorem, 52, 156
 maximal ideal space, 193
 maximal ideals, 57
 Maxwell’s equation, 116, 202
 Mehler’s formula, 131
 Mehler’s kernel, 246
 mixed complex, 189
 monodromy, 119, 175
 multiplicative linear functional, 57

 N operator, 38
 normal operators, 65
 normalization, 207
 Nullstellensatz, 138

 Ornstein–Uhlenbeck semigroup, 132

 parametrix, 69, 111
 partial isometry, 72
 partition function, 23, 239
 Pauli matrices, 9, 16, 120, 289
 periodic cyclic homology, 294, 303
 Picard group, 51, 58, 211
 Pincus, 85
 Pincus form, 80
 Poincaré’s inequality, 115, 116
 Poincaré’s lemma, 33
 Poisson brackets, 21, 229, 244
 Poisson structure, 230
 Poisson summation formula, 111
 polynomial algebra, 5, 33, 146
 positive maximum principle, 112
 principal ideal domain, 5, 44, 183
 projective, 43, 155
 projective Hilbert module, 96
 projective modules, 44
 proof of Bott periodicity, 76
 pseudo-differential operator, 8, 242, 249

 QA , 104, 161
 quantum harmonic oscillator, 130, 239
 quasi-free, 158, 168, 170, 178, 191, 217, 224, 227, 294, 298, 302, 306
 quaternion, 9, 120

 RA , 165, 196
 reduced Hochschild homology, 195
 Riemann sphere, 53, 172, 175, 207
 Riemann surface, 139, 172, 173, 205
 Riemannian manifold, 107
 Riemannian metric, 109

 Schrödinger representation, 235
 Schur’s lemma on integral operators, 243
 Schwartz class, 235
 semigroup of automorphisms, 221
 separable, 155, 157
 separable algebras, 161
 shift operator, 72
 simplicial homology, 30
 singular homology, 52
 smooth, 148, 178, 193, 297
 smooth algebras, 150
 spectral theorem for self-adjoint operators, 111
 spectrum, 57, 82
 sphere S^2 , 146
 spin, 17, 123
 splitting map, 84
 state, 88
 Stinespring’s dilation, 92
 Stone, 233
 Stone–von Neumann, 235
 Stone–Weierstrass, 65
 superalgebra, 104
 supertrace, 123, 280
 suspension, 65
 Swan, 50
 Sylvester’s equation, 101
 Sylvester’s law of inertia, 19
 symbol, 79, 243
 symmetric algebra, 13, 230
 Sz. Nagy, 97

- tensor algebra, 12, 165, 261
 theta function, 114
 theta summable Fredholm modules,
 123
 Toeplitz algebra, 75, 85, 102
 Toeplitz operators, 73, 250
 torsion free, 44
 trace class operators, 61
 traces, 9, 59, 62
 triangulation, 53, 140
 twisted Dirac operators, 289

 unitary, 72
 unitary operators, 233
 universal n -cocycle, 218
 universal property, 12, 14, 91, 141, 145, 159,
 161, 165, 166, 215, 257, 276

 vector trace, 41
 von Neumann, 99

 Wallach's formula, 78
 Watson's lemma, 127
 Wedderburn, 66
 Weierstrass's function \wp , 140
 Weil, 206
 Weyl algebra, 231
 Weyl calculus, 244
 Weyl's asymptotic formula, 241
 Weyl, von Neumann and Berg, 84
 Wick, 81
 Wiener–Hopf, 86
 Wintner and Wielandt's theorem, 233

 X complex, 293, 299

 Yoshida, 112

 Zariski–Grothendieck, 149
 Zariski–Grothendieck theorem, 193
 zeta functions, 129
