

## Index

- Ab, 9  
 abelian category, 146, 214, 348  
 abelianization, 19  
 absolute coequalizer, 57  
 Adams' cobar construction, 223  
 additive category, 145  
 additive functor, 141, 183  
 adjoint pair of functors, 38, 46, 51, 67, 77, 88,  
     97, 110, 113, 122, 125, 138, 221, 359  
 adjunction between categories, 38  
 $A_\infty$ -algebra, 299  
 algebra over a monad, 112, 294  
 algebra over an operad, 290  
 amalgamated product of groups, 55  
 As, 288  
 associahedra, 299  
 associative algebras, 356  
 associative H-space, 304  
 associative operad, 288  
 augmentation of a unital operad, 289  
  
 bar construction, 221, 227, 243, 293, 331, 343  
 bar construction, homological algebra, 221  
 Barratt–Eccles operad, 297  
 Barratt–Eccles operad, 294, 306, 328  
 base-change functor, 270  
 $BC$ , 254, 256–260, 262, 266, 274, 276, 277,  
     304–306, 315, 364  
 bicategory, 196  
 bicomplete category, 63  
 bimonoid in a symmetric monoidal  
     category, 160  
 biproduct, 145  
 bisimplicial set, 233  
 $B(N, C, M)$ , 221  
 Borel construction, 264  
  
 boundary of a disk, 340  
 $\partial\Delta_n$ , 239  
 Bousfield Kan homotopy colimit, 261, 262,  
     264, 328, 331, 365, 371  
 braid groups, 177, 179, 329  
 braid relation, 177  
 braided bialgebras, 179  
 braided injection, 329  
 braided monoidal category, 175  
 braiding, 176  
 $Br_n$ , 179, 329  
 $\mathfrak{B}$ -spaces, 330  
  
 cartesian closed symmetric monoidal  
     category, 168  
 cat, 24, 30, 106, 194, 195, 255, 260, 294  
 Catalan number, 302  
 cat as a strict 2-category, 195  
 category, 7  
 category [0], 10  
 category [1], 11  
 category associated with a group, 13, 22, 28,  
     32, 76, 78, 98, 255, 259, 263, 278, 364  
 category associated with a monoid, 11, 12,  
     150, 255, 259, 278, 306  
 category associated with a poset, 10  
 category of abelian groups, 9  
 category of braided injections, 329  
 category of  $\mathcal{C}$ -functors, 202  
 category of chain complexes, 9, 153, 156, 158,  
     167, 184, 208, 238, 264, 303  
 category of compactly generated spaces, 172,  
     174, 222, 229, 231, 256, 304, 306, 342  
 category of correspondences, 10  
 category of CW-complexes, 9  
 category of elements of a simplicial set, 215

- category of factorizations, 366
- category of finite associative sets, 356
- category of finite pointed associative sets, 351
- category of finite pointed sets, 201, 208, 281, 284, 317, 320–322, 324, 327, 358, 370
- category of finite sets, 47, 153, 158, 318
- category of finite sets and bijections, 13, 75, 159, 200, 204, 255, 306, 312, 315, 327
- category of finite sets and injections, 12, 159, 200, 205, 208, 250, 312, 328
- category of finite sets and surjections, 13
- category of finitely generated free groups, 318
- category of finitely generated free modules, 307, 312, 315
- category of finitely generated projective modules, 312, 327
- category of functors, 30
- category of groups, 9
- category of intervals, 220
- category of isomorphisms of  $\mathcal{C}$ , 13
- category of  $K$ -vector spaces, 9
- category of morphisms, 92
- category of objects over  $C$ , 93
- category of objects under  $C_1$  and under  $C_2$ , 94
- category of objects under  $C$ , 93
- category of open finite combinatorial  $n$ -disks, 341
- category of open subsets, 11
- category of operators for an operad, 317
- category of order preserving injections, 329
- category of proper intervals, 216
- category of  $R$ -modules, 9
- category of sets, 9
- category of simplicial objects, 214
- category of small categories, 24, 30, 106, 194, 195, 255, 260, 294
- category of topological spaces, 9
- category of topological spaces with a basepoint, 9
- category of twisted morphisms under  $F$ , 273
- category of  $G$ -sets, 114
- category of  $k$ -spaces, 170
- center of a category, 31
- cg, 172, 174, 222, 229, 231, 256, 304, 306, 342
- $C_G$ , 13, 22, 28, 31, 76, 78, 98, 255, 259, 263, 278, 364
- Ch, 9, 153, 156, 158, 167, 184, 208, 238, 264, 303
- chain complex associated with a simplicial object, 238
- $\mathcal{C} \int F$ , 106–108
- classifying space of a small category, 254, 256–260, 262, 266, 274, 276, 277, 304–306, 315, 364
- closed symmetric monoidal category, 167, 181, 192
- $C_M$ , 11, 12, 150, 255, 259, 278, 306

- totalization of a cosimplicial space, 237
- translation category of a group, 13, 26, 165
- tree (for categories), 259
- triple, 109
- tripleable functor, 137
- two-sided cobar construction, 221
- 2-morphism, 195
- $U(M)$ , 309
- underlying category of an enriched category, 185
- underlying set functor, 154
- underlying space of a simplicial topological space, 320
- unit morphism in an operad, 286
- unit of an adjunction, 40
- unital algebra over an operad, 291
- unital operad, 289

- universal cone, 51
- universal group generated by a monoid, 309
- upper slice of  $\mathcal{C}$  by  $H$ , 97
  
- $\mathcal{V}_{\mathbb{C}}$ , 181, 327
- $\mathcal{V}$ -category, 180
- $\mathcal{V}$ -dinatural family, 189
- $\mathcal{V}$ -end, 190
- vertical composition of two natural transformations, 29
- very special  $\Gamma$ -space, 324
- $\mathcal{V}$ -functor, 182
- $\mathcal{V}$ -natural transformation, 183
- $\mathcal{V}_{\mathbb{R}}$ , 327
  
- wandering isomorphism, 20
- weak Hausdorff space, 171
- wreath construction, 334
  
- Yang–Baxter equation, 178
- Yoneda Embedding, 36
- Yoneda Lemma, 32, 87, 105, 188, 190, 215
- Yoneda Lemma, enriched, 190
- Yoneda Lemma, linear version, 39
- Yoneda Lemma, multilinear, 191
  
- zero morphism, 25, 142
- zero object, 25, 142
- $Z/g$ , 283
- $Z_{f|}$ , 283
