INDEX

50-state 100 percent WWS roadmaps (see State roadmaps) 366
100 Percent movement xiii, xv, 347, 360, 366, 369–371
100 Percent network 366–367, 369

Absorption of radiation (see Radiation, Absorption) 348
Aerosol, defined 9
Aerosol particles (see Air pollution, Particles) 1
Agricultural burning 1 (see also Biomass burning) 1
Air conditioning 38, 310
Airfoil (see Wind turbine, Forces acting on airfoil) 1
Air mass coefficient 166
Air pollution xiii, 1, 13
Computer model 350
Cost xiv, 1, 106, 333
Equation for 287
Health (social) cost of air pollution 106, 128, 278
Non-health cost of air pollution 287
Death rate 1, 89, 278, 287, 288, 293–294, 365–366
By country 289–291, 294
Due to ozone, particulate matter, and cancer 294–295
Equation for (see Health effects equation) 287
Natural gas 89
Gases 1–2
Greenhouse gases (see Greenhouse gases) 373–374
Global warming impacts on 11

Health effects 1–2
Asthma (see Asthma) 128
Cancer 1
Bronchus 288
Lung (see Lung cancer) 118
Trachea 288
Chronic obstructive pulmonary disease (COPD) 278, 288
Chronic bronchitis (see Bronchitis, Chronic) 1
Emphysema (see Emphysema) 1

Heart disease (see Heart disease) 1
Lower respiratory tract infection (see Lower respiratory tract infection) 2
Bronchitis (see Bronchitis) 3
Flu (see Flu) 1
Pneumonia (see Pneumonia) 2
Morbidity 287
Stoke (see Stroke) 1
Particles 1
Absorption by 9
Aerosol 9
Anthropogenic 2
Cooling due to 4
Defined 9
Natural 2
Warming due to 4
Solution to 30
Sources 1

Air pressure 206
Standard sea level 206
Belts 1
Equatorial low-pressure belt 227
Subpolar low-pressure belts 229
Subtropical high-pressure belts 229
Systems 1
Aleutian low-pressure system 233
Icelandic low-pressure system 233
Pacific high-pressure system 233
Variation with height 206
Air-source heat pump (see Heat pump, Air source) 141
Alkaline water electrolyzer (see Hydrogen, Electrolyzer, Alkaline water) 147
Amazon 373–374
Amines 128
Ammonia 79, 122, 128
Ampere, Andre-Marie 147
Alternating current (see Electric, Current, Alternating) 141
Alternator 149–150
Aluminum ion batteries (see Battery, Aluminum ion) 118
Amazon 373–374
Amines 128
Ammonia 79, 122, 128
Ampere, Andre-Marie 147
Force law 147
Amperes 140
Anaerobic 78
Ancillary services 320
Load following, 320 (see also Power plant, Load following)
Frequency regulation 321
Regulation 320
Spinning, supplemental, and replacement reserves 321
Voltage control 152, 321
Anderson, Chris 353
Anemometer 259 (see also Wind Turbine, Parts, Anemometer)
Angular frequency 149
Anion 32, 55
Annealing 44
Anode 31–32, 42, 54
Anthropogenic
Defined xiii, 2
Heat (see Emissions, Heat)
Particles (see Air pollution, Particles, Anthropogenic)
Water vapor (see Emissions, Water vapor)
Anticyclone (see Wind, Anticyclonic flow)
Apparent power 152
Apple 373–374
Arakawa, Akio, 351
Arc Furnace, electric 42–43
Component of energy roadmaps 252, 302
Archer, Cristina 352
Aryl group 128
Aspdin, Joseph 47
Asthma 1, 278, 288
Astronomical unit 181
Aurora
Australia 180
Borealis 180
Azimuth angle 182
Band gap energy 160–161
Wavelength (see Wavelength, Band gap)
Band gap materials
Direct 161
Indirect 161
Bands (see Energy bands)
Barth, Jannette 357
Baseload power plant (see Power plant, Baseload)
Basic oxygen furnace 45–46
Battery
Aluminum ion 57
Charging 55
Cost 316, 332
Current collector 54
Defined 54
Discharging Electrode 54
Flow (redox) 57
Vanadium 57
Galvanic cell 54
Graphite dual ion 57
Lead acid 29
Lithium ion 29, 55–57
Nickel cadmium 29
Pack 54
Saltwater 57
Separator 55
Sodium sulfur 57
Stationary 54, 72, 74
Voltaic cell 54
Battery-electric vehicles 28, 56, 252
Aircraft 35, 37
Batteries (see Battery)
Chargers 74
Comparison with hydrogen fuel cell vehicles 28, 34–35, 37, 123, 253, 257
Comparison with internal combustion vehicles 35, 37, 123, 252–253
Component of 100 percent WWS roadmaps 252, 301
Defined 28
Military 37
Passenger vehicles 72
Policies for 384
Regenerative braking 29
Becquerel, Antoine Henri 118
Betz, Albert 208
Betz
Law 208
Limit 200, 208–209
Biden, Joe 368
Biodiesel 122
Algae 122
Soy 122
Bioenergy (see biomass) With carbon capture and storage or use (BECCS/U) 120–121
Issues with BECCS/U 121–122
Negative carbon emissions 121
Biofuel burning 1
Heat emissions (see Emissions, Heat)
Lifecycle emissions (see Emissions, Lifecycle)
Opportunity cost emissions (see Emissions, Opportunity cost)
Water vapor emissions (see Emissions, Water vapor)
Biofuels 120
Gaseous 120
Liquid 120, 122
Air pollution from 123–124
Biodiesel (see Biodiesel)
Butanol (see Butanol)
Carbon dioxide equivalent emissions from 123–124
Competition with food use 123
Ethanol (see Ethanol)
Emissions 123
For transportation 122
Land requirements 123
Water requirements 123
Solid 120
Biomass for electricity production 120
Agricultural residues 120
Index

Biomass for electricity production (cont.)
Contaminated wastes 120
Emissions from 120
Heat 120 (see also Emissions, Heat)
Lifecycle 120 (see also Emissions, Lifecycle)
Opportunity cost (see Emissions, Opportunity cost)
Water vapor (see Emissions, Water vapor)
Energy crops 120
Forestry residues 120
Industry residues 120
Land requirements 121
Park and garden wastes 120
Biomass burning 1, 4–5, 77
Agricultural burning 77
Solution to 78
Wildfires 2, 11
Black carbon 3–4, 9, 351
Absorption by 4, 9
Controlling black carbon may be fastest method of slowing global
warming 351
Global warming contribution 3–4
Second leading cause of global warming 351–352
Black, Joseph 125
Blackbody radiation (see Radiation, Blackbody)
Black lung disease 13
Blast furnace 45
Blyth, Prof. James 194
Boiler 59
Boiling water reactor (see Nuclear reactor, Boiling water
reactor)
Boltzmann, Ludwig 178
Borehole storage (see Storage, Thermal, Underground, Borehole)
Boundary Dam power station 103
Boundary layer 5
Brand, Stewart 353–354
Breeder reactor (see Nuclear, Breeder reactor)
Bridge fuel (see Natural gas, Bridge fuel)
Bronchitis 278
Chronic 278
Brown carbon 4, 9
Absorption by 4
Global warming contribution 3–4
Brown, Jerry 366
Brune, Michael 360
Brush, Charles F. 194
Bush, George W. 352
Reasons pulling the U.S. out of the Kyoto Protocol 352
Business-as-usual (BAU) scenario 41, 249, 272–274, 278–279,
293–294, 296, 314, 328, 332–335, 338, 341, 376
Butanol 122
California energy roadmap 360, 366
Eligible renewables (see Eligible renewables, California)
Impacts of 366
SB 100 (see SB100, California senate bill)
Cancer unit risk estimates (CUREs) 295
Capacitor 146, 152
Capacitance 146
Capacity
Installed 24
Nameplate 18, 24
By generator, needed to power the world 271
Oversizing (see Oversizing nameplate capacity)
Capacity factor
Concentrated solar power (see Concentrated solar power,
Capacity factor)
Range for different energy technologies 274
Wind turbine (see Wind turbine, Capacity factor)
Cap and trade 383
Capital cost, upfront 273–274, 328, 332, 334, 338
Capital recovery factor 273
Carbon arc lamp 42
Carbon capture
Air pollution impacts 91
And Storage 12, 85, 91
Carbon dioxide leaks to air 101
And Use 12, 85, 91
Enhanced oil recovery 91
Bioenergy (see Bioenergy, Carbon capture and storage or use)
Climate impacts 91
Comparison of CO₂ removal with other methods of reducing CO₂
102–104
Projects 103
Boundary Dam power station project 103
Parish coal (Petra Nova) power plant 103–104, 106–109
Carbon dioxide 3–4
Change in atmospheric levels upon conversion to WWS
377–378
Lifetime, e-folding 97, 378
Mixing ratios 377–378
Carbon dioxide equivalent emissions 8, 92, 106–108, 353
Biomass 120
Coal 87–88, 92, 108
With carbon capture 92, 95, 104
Concentrated solar power (CSP) 95
Direct air capture 126, 129
Ethanol 123–124
Geothermal electricity 95
Hydroelectricity 95
Opportunity cost emissions (see Emissions, Opportunity cost)
Natural gas 86–88, 92
With carbon capture 92, 95
Solar PV electricity 95
Tidal electricity 95
Wave electricity 95
Wind electricity 95
With versus without carbon capture 103–104, 106
Carbon monoxide 3, 5
Carbon or pollution tax 383
Revenue-neutral 382
Cation 32, 55
Cathode 31–33, 42, 44, 55–57
Cavendish, Henry 29
Cellulosic ethanol (see Ethanol, Cellulosic)
Centralized power plant (see Power plant, Centralized)
Centrifuge (see Uranium, Enrichment, Centrifuge)
Chain saw, electric 50
Charge carriers (see Electric, Current, Charge carriers)
Chernobyl (see Nuclear Power, Risks, Meltdown, Chernobyl)
Chiller 60, 61, 70
Chloro-fluorocarbons (see Halogens, Halocarbons, Chlorofluorocarbons)
Chronic obstructive pulmonary disease (COPD) (see Air pollution, Health effects, Chronic obstructive pulmonary disease)
Circuit, electric (see Electric, Circuit)
Cities
Legislation requiring 100 percent WWS for electricity 362, 363, 364, 373
Sierra Club campaign (see Sierra Club, Cities campaign)
WWS roadmaps for 360
Climate change (see Global warming) Belief in 371

      Water vapor 99–100, 238–241
   Wind speed 238
   Impacts on hurricanes (see Hurricanes, Wind turbine impacts on)
Materials
   Aluminum 195
   Copper 195
   Concrete 195
   Neodymium (see Neodymium)
   Steel 195
Life Cycle emissions (see Emissions, Lifecycle)
   Opportunity cost emissions (see Emissions, Opportunity cost)
   Water vapor (see Emissions, Water vapor)
Onshore 18, 19, 193
   Lifecycle emissions (see Emissions, Lifecycle)
   Opportunity cost emissions (see Emissions, Opportunity cost)
   Water vapor (see Emissions, Water vapor)
   Output power density 219, 221–222
   Planning-to-operation time 95
   Spacing (see Land requirements, Spacing, Wind farm)
   Wind farm
   Cluster of turbines 220
   Footprint (see Land requirements, Footprint, Wind farm)
   Installed power density 218, 219, 221–222
   Offshore 18, 19, 193
Nameplate capacity 200
Number of turbines to power all U.S. vehicles if they were electric 221–222
Parts
Anemometer 195
Blade 195
Brake 195
Controller 195
Generator 195, 198 (see also Generator) Direct drive 195
Heat exchanger 195
High-speed shaft 195
Nacelle 195
Pitch system 195
Rotor 194
Diameter 201, 203
Efficiency 209
Tip speed ratio 209
Wind vane 195
Yaw control 194
Yaw drive 195
Yaw motor 195
Pitch 193
Control 197
Power curve 200–201
Cut-in wind speed 200
Cut-out wind speed 200
Destruction wind speed 200
Rated power 200
Rated wind speed 200
Power output 209
Annual average 209
Instantaneous 235
Losses
Array 216–217
Curtailment 216
Downtime 216
Overall 217
Transmission and distribution inefficiencies 212
Stall 197
Control
Active 197
Passive 197
Tip height 219
Types
2-Blade 194
3-Blade 194
Darrieus 195
Floating 19
Semi-submersible platform 19
Spar-buoy platform 19
Tension leg platform 19
Gearless 18, 195
High altitude 19
Horizontal axis 193–195
Typhoon-class 201
Upwind 194
Vertical axis 193–195
Window blinds (see Passive heating and cooling in buildings, Window blinds)
Window glazing (see Passive heating and cooling in buildings, Window glazing)
Wind shear 194
Wind speed
Frequency distribution 201, 304
Rayleigh 201–202
Weibull 201–202
Variation with height 203–205
1/7th power law profile 204
Log law profile 204
Surface roughness length for momentum 204
Power law profile 204
Friction coefficient 204
Wind vane 193
WWS (Wind-Water-Solar)
Benefits of transitioning to 100 percent WWS 385
Best technologies for solving pollution and climate problems 353
Grid stability with (see Grid stability)
Mix of WWS energy generators for a region 259, 265–266, 268, 270, 306
Origin of the term 353
Roadmaps for countries/world regions 326, 368–369
Characteristics of storage in some regions 329
History of roadmap development (see Roadmaps for transitioning energy to 100 percent WWS, History of development)
System diagram 302
Technologies xiii, 17, 302
Appliances 48, 302
Building heating and cooling technologies 38, 302
Electricity generation technologies 18, 302
High-temperature Industrial heat technologies 17, 42, 302
Storage technologies 17, 51, 302
Transportation technologies 17, 28, 302
Yellowcake 116
Zonal average 175
Zoning issues (see NIMBYism)
