SL(2, ℂ)-vacuum, 73

affine curve parameter, 6
almost complex manifold, 204

background independence, 151
Baker–Campbell–Hausdorff formula, 59
beta-functions, 64
Bianchi identities, 93
boundary conditions, 21
BPS bound, 223
BPS extension, 222
BPS representations, 223
BRST quantisation, 116

Casimir effect, 89
Casmir operator, 99
central charge, 71
central extension, 71
Chan–Paton factors, 189
charge conjugation matrix, 220
Chevalley generators, 166
chiral current, 30
chiral supersymmetry algebras, 222
coherent states, 13, 17
complex manifold, 203
condensate, 96
conformal compactification, 64
conformal family, 74
conformal field, 58
conformal gauge, 27
conformal isometry, 63
conformal Killing equation, 63
conformal Killing vector field, 51
conformal structure, 25
conformal transformation, 63
conformal transformations, 30
conformal weights, 65
conserved charge, 29
conserved current, 29
consistent string backgrounds, 149
constraint, 14
contraction, 56
critical dimension, 124
critical radius, 164
current algebra, 162

Dehn twist, 80
descendants, 74
dilaton, 105
Dirac spinors, 220
discrete torsion, 181
dual amplitudes, 142
dual lattice, 175
dual resonance models, 142

Einstein frame, 145
electric-magnetic duality, 110
enhanced symmetry point, 165
ESP, 165
Euclidean formulation, 23
Euler number, 26, 138
even lattice, 175
extended chiral algebra, 77
extended supersymmetry algebra, 222
extra species point, 165

fermion number operator, 217
field quantisation, 41
fixed points, 178
flux compactifications, 211
Fock space, 39, 87

genus, 138
geodesic, 17
gravitino, 233
Green–Schwarz superstring, 215
ground state, 39
GSO projection, 231

Hardy–Ramanujan formula, 129
harmonic gauge, 107
helicity, 95
Hermitian manifold, 204
heterotic strings, 236

infrared divergence, 58
integrability conditions, 93
integrable highest weight representation, 168
integral lattice, 175

Kähler manifold, 205
Kac determinant, 76
Kaluza–Klein scalar, 159
Kaluza–Klein tower, 160

landscape, xvii
lattice partition function, 174
level, 74

More Information

level matching, 34
Lie algebras, 17
Lie derivative, 66, 67
Lie groups, 17
light-cone coordinates, 28, 117
little group, 99

Majorana spinors, 220
Majorana–Weyl spinors, 221
Mandelstam variables, 141
mass, 5
mass shell condition, 34
Maxwell equations, 93
Minkowski space, 3
modular group, 80
modular invariance, 78
modular parameter, 80
moduli stabilisation, 114
Moebius group, 52
momentum lattice, 174

Nambu–Goto action, 19
Narain latttice, 174
new covariant quantisation, 116
no ghost theorem, 45, 87
Noether theorem, 29
non-perturbative effects, 23
normal ordered product, 54, 56
normal ordering, 89
null coordinates, 28
null vectors, 76

old covariant quantisation, 116
operator product expansions, 53
orbicircle, 178
orbifold, 178
ordering ambiguity, 89

particle, 5
partition functions, 78
physical states, 88
Planck scale, 113
Poincaré Lie superalgebra, 221
Poisson brackets, 38
Poisson resummation, 82
poly-vector extension, 222
primary states, 73
Proca Lagrangian, 170
proper length, 10
proper time, 6
pullback, 19

quantisation, 38

Rademacher exapnsion, 129
radial ordering, 50
rational conformal field theory, 76
Regge slope, 91, 122
Regge trajectory, 122
reparametrisation, 10
rest frame, 100
Riemann surface, 139
RNS approach, 215

scale invariance, 64
Schur's lemma, 99
self-dual lattice, 175
self-dual radius, 164
sigma model, 16
solitons, 22
space-time perspective, 26
special conformal transformations, 63
spectrum generating algebra, 163
spin-statistics theorem, 215
state-operator correspondence, 59
string field theory, 43, 96, 98
string frame, 145
string length, 33
string phenomenology, 215
string scale, 113
string units, 91
Sugawara construction, 167, 200
supercharge, 217
superconformal gauge, 227
superstring theories, xiv, 215
supersymmetry, 217
supersymmetry algebra, 217, 221
supersymmetry generator, 217
swampland, xvii
symplectic Majorana spinors, 221

T-duality, 182
tachyon, 5, 92
tachyon condensation, 96, 98
target space, 26
trace anomaly, 64
twist operators, 180
twisted sector, 178

unimodular lattice, 175
unitarity, 45
unitary minimal series, 76

vacuum, 39
vacuum expectation value, 96
Verma module, 73
vertex operator, 60
Virasoro algebra, 57, 71

Weyl transformation, 24
Wick rotation, 23
Wick's Theorem, 56
winding number, 156
Witt algebra, 52
Witten index, 218
world-line, 5
world-line formalism, 17, 43
world-sheet, 18
world-sheet instantons, 149
world-sheet parity, 36
world-sheet perspective, 26
world-sheet supersymmetry, 215
