	<i>Introduction to the Second Edition</i>	<i>page</i> 1
	<i>From the Introduction to the First Edition</i>	2
<b>1</b>	<b>Basic Results on Algebraic Groups</b>	5
	1.1 Basic Results on Algebraic Groups	5
	1.2 Diagonalisable Groups, Tori, $X(\mathbf{T})$ , $Y(\mathbf{T})$	8
	1.3 Solvable Groups, Borel Subgroups	11
	1.4 Unipotent Groups, Radical, Reductive and Semi-Simple Groups	13
	1.5 Examples of Reductive Groups	15
<b>2</b>	<b>Structure Theorems for Reductive Groups</b>	19
	2.1 Coxeter Groups	19
	2.2 Finite Root Systems	24
	2.3 Structure of Reductive Groups	29
	2.4 Root Data, Isogenies, Presentation of $\mathbf{G}$	35
<b>3</b>	<b><math>(B, N)</math>-Pairs; Parabolic, Levi, and Reductive Subgroups; Centralisers of Semi-Simple Elements</b>	39
	3.1 $(B, N)$ -Pairs	39
	3.2 Parabolic Subgroups of Coxeter Groups and of $(B, N)$ -Pairs	42
	3.3 Closed Subsets of a Crystallographic Root System	45
	3.4 Parabolic Subgroups and Levi Subgroups	51
	3.5 Centralisers of Semi-Simple Elements	56

<b>4</b>	<b>Rationality, the Frobenius Endomorphism, the Lang–Steinberg Theorem</b>	59
4.1	$k_0$ -Varieties, Frobenius Endomorphisms	59
4.2	The Lang–Steinberg Theorem; Galois Cohomology	63
4.3	Classification of Finite Groups of Lie Type	70
4.4	The Relative $(B, N)$ -Pair	75
<b>5</b>	<b>Harish-Chandra Theory</b>	79
5.1	Harish-Chandra Induction and Restriction	79
5.2	The Mackey Formula	83
5.3	Harish-Chandra Theory	86
<b>6</b>	<b>Iwahori–Hecke Algebras</b>	91
6.1	Endomorphism Algebras	91
6.2	Iwahori–Hecke Algebras	97
6.3	Schur Elements and Generic Degrees	104
6.4	The Example of $G_2$	108
<b>7</b>	<b>The Duality Functor and the Steinberg Character</b>	113
7.1	$F$ -rank	113
7.2	The Duality Functor	116
7.3	Restriction to Centralisers of Semi-Simple Elements	123
7.4	The Steinberg Character	126
<b>8</b>	<b><math>\ell</math>-Adic Cohomology</b>	130
8.1	$\ell$ -Adic Cohomology	130
<b>9</b>	<b>Deligne–Lusztig Induction: The Mackey Formula</b>	137
9.1	Deligne–Lusztig Induction	137
9.2	Mackey Formula for Lusztig Functors	140
9.3	Consequences: Scalar Products	146
<b>10</b>	<b>The Character Formula and Other Results on Deligne–Lusztig Induction</b>	148
10.1	The Character Formula	148
10.2	Uniform Functions	153
10.3	The Characteristic Function of a Semi-Simple Class	157
<b>11</b>	<b>Geometric Conjugacy and the Lusztig Series</b>	161
11.1	Geometric Conjugacy	161
11.2	More on Centralisers of Semi-Simple Elements	167
11.3	The Lusztig Series	170

*Contents*

vii

11.4	Lusztig’s Jordan Decomposition of Characters: The Levi Case	175
11.5	Lusztig’s Jordan Decomposition of Characters: The General Case	183
11.6	More about Unipotent Characters	188
11.7	The Irreducible Characters of $\mathbf{GL}_n^F$ and $\mathbf{U}_n^F$	191
<b>12</b>	<b>Regular Elements; Gelfand–Graev Representations; Regular and Semi-Simple Characters</b>	196
12.1	Regular Elements	196
12.2	Regular Unipotent Elements	201
12.3	Gelfand–Graev Representations	207
12.4	Regular and Semi-Simple Characters	214
12.5	The Character Table of $\mathbf{SL}_2(\mathbb{F}_q)$	220
<b>13</b>	<b>Green Functions</b>	225
13.1	Invariants	225
13.2	Green Functions and the Springer Correspondence	231
13.3	The Lusztig–Shoji Algorithm	236
<b>14</b>	<b>The Decomposition of Deligne–Lusztig Characters</b>	242
14.1	Lusztig Families and Special Unipotent Classes	242
14.2	Split Groups	244
14.3	Twisted Groups	247
	<i>References</i>	249
	<i>Index</i>	255
