- Brownian motion, 50–52, 73, 99, 111, 124, 126, 130, 145, 150, 162–164, 178
 - and Gauss–Weierstrass function, 51
 - as martingale, 203
 - definition of, 50
 - rescaled, 71
 - transience, 82
 - with drift, 52, 63, 72
- bump function, 185
- C_0 -group, 43, 91
 - isometries, 154
- C_0 -semigroup
 - definition of, 11
 - resolvent of, 25–29
 - self-adjoint, 169
- Caputo derivative, 167
- Cauchy distribution, 52, 71, 76
 - as stable law, 69
- Cauchy process, 54, 73
 - rescaled, 71
- Cauchy, Augustin-Louis, 166
- Cayley transform, 100
- Chapman–Kolmogorov equations, 130
- characteristic function, 49, 57
- Chernoff’s product formula, 122, 127
- closed graph theorem, 20
- coarse graining, 164
- compact operator, 102
- complete positivity, 97
- compound Poisson process, 72
- compound Poisson semigroup, 62
- conditional expectation, 200–202
 - definition of, 201
- conservativity, 97
- contraction semigroup, 86, 117
 - adjoint, 83
 - definition of, 11
 - for convolution semigroup, 60
 - for heat equation, 50
 - self-adjoint, 29, 85, 86
- convolution, 186
 - of functions, 47, 186
 - of measures, 55–57
- convolution group, 93
- convolution semigroup, 46–81, 129, 140, 147, 149
 - definition of, 60
 - generator, 73
 - of Lévy process, 72
 - on circle, 109–112
 - self-adjoint, 89–91
 - stable, 69
- Coulombic potential, 95

- Courrège theorem, 134, 136–142
 proof of, 137
 cylinder sets, 124, 195
- density, *see* probability density function
 density matrix, *see* density operator
 density operator, 112
 derivation, 96
 inner, 96
 differential equation
 (solution) flow, 157
 of C^k -diffeomorphisms, 158
 differential equations in Banach space, 18–20
 differential operator, 76
 diffusion operator
 uniformly elliptic, 175
 dilation, 164
 Dirac, Paul, 161
 Dirichlet boundary conditions, 178
 Dirichlet form, 174
 Dirichlet problem, 53, 54
 dissipative, 117, 133
 dissipativity, 29
 distribution, 135–136
 of order N , 135
 support, 135
 distribution tempered, 187
 divergence, 159
 divergence form, 38
 Doeblin, Wolfgang, 205
 dynamical system, 151, 160, 165
 consistency property, 154
 continuously quasi-invariant, 153, 159
 definition of, 152
 differentially quasi-invariant, 153, 159, 160
 ergodic theory, 156
 quasi-invariant, 153
- elliptic PDE, 25, 77
 energy estimates, 40
 entropy, 151–152
 ergodic, 151
 ergodic theorem, 181
 ergodic theory, 164
 essentially skew-adjoint, 159, 160
- Feller process, 126, 131, 144, 146, 164
 Feller semigroup, 126, 133, 140–142, 144,
 145, 151, 179
 Feller, William, 179
 Feller–Miyadera–Phillips theorem, 33, 44
- Feller’s pseudo-Poisson process, 131
 Feynman, Richard, 123
 Feynman–Kac formula, 123–126, 147
 filtration
 continuous-time, 203
 discrete-time, 203
 flow, 160
 Fock space, 100
 Fourier inversion, 188
 Fourier transform, 49, 186–189
 definition of, 186
 Fourier transformation, 186
 Fréchet space, 187
 fractional calculus, 166–167
 fractional derivative, 166
