

Indirect Speech Acts

To achieve successful communication, it is crucial to say clearly what we mean, but, at the same time, we need to pay attention to the form of our utterances, to avoid misunderstandings and the risk of offending our interlocutors. To avoid these pitfalls, we use a special category of utterances called ‘indirect speech acts’ (ISAs) that enable an optimal balance between clarity and politeness. But how do interpreters identify the meaning of these ISAs? And how does the social context influence the use of ISAs? This book attempts to answer these questions. It deals with the main theoretical and empirical questions surrounding the meaning and usage of ISAs, drawing on the latest research and neuroimaging data. Adopting a truly interdisciplinary perspective, it will appeal to students and scholars from diverse backgrounds, and anyone interested in exploring this phenomenon, which is so pervasive in our daily lives.

NICOLAS RUYTENBEEK specializes in experimental approaches to speech acts and politeness, using a combination of corpus data and psychophysiological methods. He is a postdoctoral researcher at the Faculty of Arts and Philosophy, Department of Translation, Interpreting and Communication, Ghent University.

KEY TOPICS IN SEMANTICS AND PRAGMATICS

'Key Topics in Semantics and Pragmatics' focuses on the main topics of study in semantics and pragmatics today. It consists of accessible yet challenging accounts of the most important issues, concepts and phenomena to consider when examining meaning in language. Some topics have been the subject of semantic and pragmatic study for many years, and are re-examined in this series in light of new developments in the field; others are issues of growing importance that have not so far been given a sustained treatment. Written by leading experts and designed to bridge the gap between textbooks and primary literature, the books in this series can either be used on courses and seminars, or as one-stop, succinct guides to a particular topic for individual students and researchers. Each book includes useful suggestions for further reading, discussion questions and a helpful glossary.

Already published in the series:

Meaning and Humour by Andrew Goatly

Metaphor by L. David Ritchie

Imperatives by Mark Jary and Mikhail Kissine

Modification by Marcin Morzycki

Semantics for Counting and Measuring by Susan Rothstein

Irony by Joana Garmendia

Implicatures by Sandrine Zufferey, Jacques Moeschler and Anne Reboul

The Semantics of Case by Olga Kagan

Attitude Reports by Thomas Grano

Forthcoming titles:

Frame Semantics by Hans C. Boas

Proper Names and Direct Reference by Gregory Bochner

Semantics and Pragmatics in Sign Languages by Kathryn Davidson Zaremba

Propositional Logic by Allen Hazen and Jeffrey Pelletier

Acknowledgements

This book is the output of a successful collaboration with Helen Barton as editor and Izzie Collins as editorial assistant, whom I thank for their availability and responsiveness. It goes without saying that writing it would not have been possible without the help of the universities and, more specifically, the research labs where I have been working the last few years. I have also a sense of indebtedness to all the students who agreed to participate in my experiments in Brussels, Lille and Ghent. I thank my PhD supervisor, Mikhail Kissine, for giving me a taste for linguistic research, and my colleagues at the time, in particular, Gregory Bochner, Philippe de Brabanter, Philippe Kreutz, Philippine Geelhand de Merxem, Ekaterina Ostashchenko and Bob van Tiel, whom I worked with at the research centre in linguistics (LaDisco) of the Université libre de Bruxelles, for their helpful comments and suggestions. I am particularly grateful to the F.R.S.–FNRS for funding my PhD research for four years. I thank the Wiener Anspach Foundation for granting me a graduate visiting fellowship at the University of Cambridge, and Napoleon Katsos, who kindly agreed to supervise my work during my fellowship in 2013–14. This research has also benefitted from the coaching in experimental linguistics and advice offered by Benjamin Spector and Emmanuel Chemla during my Cogmaster program at the ENS in Paris in 2012–13, and by Steven Verheyen afterwards. These two international experiences determined to a strong extent the experimental orientation of my own work, which I pursued in 2018 as a visiting researcher at the LUCL in Leiden, stimulated by Marina Terkourafi’s insightful ideas about speech acts and politeness research. I thank my current employer, Ghent University, for enabling me to complete the writing of this monograph in optimal conditions. I owe a special debt to

Herbert Clark, Sofie Decock, Ilse Depraetere, Thomas Holtgraves, Mathieu Lafourcade and Magali Norré, who provided constructive feedback on this manuscript. Last but not least, I thank my wife for her permanent support and her sharp, insightful remarks that helped me a lot when I had to clarify the content of this book.

Tables

- 1.1 Conventions of means for the performance of directives
(with examples) *page* 34
- 2.1 Syntactic, semantic and pragmatic notions of question 52
- 3.1 Predicted relevance of a *Can you VP?* IR in comparison
with an imperative request 93
- 4.1 Prosodic cues for the interpretation of IR constructions
in English 138
- 5.1 Frequency of one-, two-, three-, four-component
combinations 175

Figures

- 2.1 Partition of the logical space corresponding to the meaning of the interrogative in example (43) *page* 59
- 2.2 Partition of the logical space corresponding to the meaning of the interrogatives in examples (44)–(45) 59
- 2.3 Continuum of informativeness/inquisitiveness for conceptualizing declarative and interrogative sentence-types (event: John's coming) 64
- 2.4 Continuum of informativeness/inquisitiveness for conceptualizing declarative and interrogative sentence-types (event: the closing of the door by the addressee) 66
- 3.1 Metonymic illocutionary scenario for requests (elaborated version, based on Panther and Thornburg 1998: 760) 82
- 4.1 Grid with geometrical coloured shapes and response buttons 133
