A_∞-algebra, 37
A_∞-category, 49
A_∞-enhancement, 61
A_∞-extension, 347
A_∞-functor, 49
A_∞-isomorphism, 38
A_∞-morphism, 38
A_∞-precategory, 67
A_∞-quasi-isomorphism, 38
action, 105
additive completion, 10
affine maps, 176
affine open subsets, 176
affine ring, 175
affine space, 176
affine varieties, 176
almost-complex structure, 134
amoeba, 224
ample, 200
angle-like path, 253
anti-Fano variety, 201
antiequivalence, 5
arc, 252
arcs that split a surface, 252
Auslander–Reiten translate, 96

band object, 82, 262
basic projectives, 71
basic simples, 71
Beilinson quiver, 185
bounded complex, 15
bounded derived category, 54
bounded derived category of coherent sheaves, 189
branes, 118
Bridgeland stability condition, 324
bubbling, 138

Calabi–Yau manifold, 143
Calabi–Yau variety, 201
canonical sheaf, 190
Cartesian product, 202
categorical quotient, 194
categorification of a precategory, 68
category, 3
category enriched in sheaves, 184
category graded of matrix factorizations, 198
category of matrix factorizations, 64, 196
category of perfect complexes of vector bundles, 184
category of singularities, 93, 197
central charge, 322
chain complex, 15
classical generator, 60
closed polygon, 252
cobordism category, 115
cochain complex, 15
coherent sheaf, 178
cohomology, 15
cohomology ring, 23
collection of cuts, 272
complex structures, 134
complex torus, 218
cone of a morphism, 55
conical ends, 134
consistency conditions, 290
contractible A_∞-algebra, 43
contractible complex, 17
contravariant functor, 5
core of the quadratic differential, 332

More Information

cosupport of a representation, 316
cotangent sheaf, 189
covariant functor, 4
covering map of marked surfaces, 282
crepant resolution, 228
critical point, 125, 155
critical value, 155
cup product, 23
curved A_∞-algebra, 62
curved A_∞-category, 62
curved twisted complex, 63, 65
cyclic path, 70

de Rham cohomology, 25
de Rham complex, 25
deformation of an A_∞-algebra, 340
delta set, 21
derived A_∞-category, 54
derived category, 54
derived equivalent, 54
dg-category, 19
differential, 15
dimension vector, 73
dimer duality, 286
dimer model, 286
directed Fukaya category, 157
disk bubbles, 138
distinguished triangle, 60
dual cone, 219
dual numbers, 30
dual quiver algebra, 72
dual torus, 218

elementary triangles, 226
enough projectives, 60
equivalence of categories, 5
essentially surjective, 6
Euler form, 314
exact Fukaya category, 146
exact Lagrangian submanifold, 134
exact symplectic manifold, 133
exceptional collection, 167
exponential pole, 333
Ext-group, 29
extension, 29
exterior algebra, 32

face map, 20
face-like path, 253
faces of a cone, 219
fan, 219

Fano variety, 201
fat point, 191
filtered A_∞-algebra, 64
flat surface with conical singularities, 333
forgetful functors, 4
Fourier–Mukai transform, 203
free resolution, 27
free sheaf of rank 1, 178
Frobenius algebra, 116
fully faithful, 5
fundamental groupoid, 4

generating collection of arcs, 252
generator, 60
generator of an A_∞-category, 57
generic, 226
generic stability condition, 207, 316
generic tropical function, 225
gentle A_∞-algebra, 253
geometrical realization, 21
Gerstenhaber bracket, 340
GIT-quotient, 206
global dimension, 192
gradable curve, 296
graded arc, 296
graded curves, 80
graded Lagrangian, 143
graded Landau–Ginzburg model, 198
graded line segment, 76
graded marked surface, 295
graded matrix factorization, 198
gradient, 125
Gromov–Witten invariants, 117
Grothendieck group, 312
group of characters, 218
group of one-parameter subgroups, 218

Hamiltonian flow, 128
Harder–Narasimhan filtration, 322
heart of a stability condition, 325
hereditary algebra, 74
higher-order pole, 333
Hochschild cochain complex, 340
Hochschild cohomology, 340
Hochschild homology, 170
Hochschild–Kostant–Rosenberg theorem, 345
Hodge diamond, 119
homological mirror symmetry, 120
homological perturbation lemma, 46
homotopic maps, 16
homotopy colimit, 271
homotopy limit, 274
