Subject Index

This is a selective subject index. In order to save space, in each chapter we have not indexed those subjects that are explicitly mentioned in the title of that chapter. Hence, for example, significant instances of *pneuma* will be found at the locations cited here and also throughout chapters 3 and 6, whose instances are not cited in the index. Similarly, throughout the book we have not indexed all instances of ‘body’ and ‘soul’, which are in one way or another the constant theme of all chapters.
