

## The Cambridge Handbook of Gesture Studies

The study of gesture – movements people make with their hands and other parts of the body, often when talking – has grown into a well-established field and research is still being pushed into exciting new directions. Bringing together a team of leading scholars, this *Handbook* provides a comprehensive overview of gesture studies, combining historical overviews as well as current, concise snapshots of state-of-the-art, multidisciplinary research. Organized into five thematic parts, it considers the roles of both psychological and interactional processes in gesture use, and considers the status of gesture in relation to language. Attention is given to different theoretical and methodological frameworks for studying gesture, including semiotic, linguistic, cognitive, developmental, and phenomenological theories and observational, experimental, corpus linguistic, ethnographic, and computational methods. It also contains practical guidelines for gesture analysis along with surveys of empirical research. Wide-ranging yet accessible, it is essential reading for academic researchers and students in linguistics and the cognitive sciences.

ALAN CIENKI is Professor of Language Use & Cognition and English Linguistics at Vrije Universiteit Amsterdam. He is the author of *Ten Lectures on Spoken Language and Gesture* (2017) and co-editor of *Metaphor and Gesture* (2008) and the two-volume handbook *Body – Language – Communication* (2013, 2014).

## CAMBRIDGE HANDBOOKS IN LANGUAGE AND LINGUISTICS

Genuinely broad in scope, each handbook in this series provides a complete state-of-the-field overview of a major sub-discipline within language study and research. Grouped into broad thematic areas, the chapters in each volume encompass the most important issues and topics within each subject, offering a coherent picture of the latest theories and findings. Together, the volumes will build into an integrated overview of the discipline in its entirety.

**Published titles**

- The Cambridge Handbook of Phonology*, edited by Paul de Lacy  
*The Cambridge Handbook of Linguistic Code-switching*, edited by Barbara E. Bullock and Almeida Jacqueline Toribio  
*The Cambridge Handbook of Child Language*, Second Edition, edited by Edith L. Bavin and Letitia Naigles  
*The Cambridge Handbook of Endangered Languages*, edited by Peter K. Austin and Julia Sallabank  
*The Cambridge Handbook of Sociolinguistics*, edited by Rajend Mesthrie  
*The Cambridge Handbook of Pragmatics*, edited by Keith Allan and Kasia M. Jaszczolt  
*The Cambridge Handbook of Language Policy*, edited by Bernard Spolsky  
*The Cambridge Handbook of Second Language Acquisition*, edited by Julia Herschensohn and Martha Young-Scholten  
*The Cambridge Handbook of Biolinguistics*, edited by Cedric Boeckx and Kleantes K. Grohmann  
*The Cambridge Handbook of Generative Syntax*, edited by Marcel den Dikken  
*The Cambridge Handbook of Communication Disorders*, edited by Louise Cummings  
*The Cambridge Handbook of Stylistics*, edited by Peter Stockwell and Sara Whiteley  
*The Cambridge Handbook of Linguistic Anthropology*, edited by N. J. Enfield, Paul Kockelman and Jack Sidnell  
*The Cambridge Handbook of English Corpus Linguistics*, edited by Douglas Biber and Randi Reppen  
*The Cambridge Handbook of Bilingual Processing*, edited by John W. Schwieter  
*The Cambridge Handbook of Learner Corpus Research*, edited by Sylviane Granger, Gaëtanelle Gilquin and Fanny Meunier  
*The Cambridge Handbook of Linguistic Multicompetence*, edited by Li Wei and Vivian Cook  
*The Cambridge Handbook of English Historical Linguistics*, edited by Merja Kytö and Päivi Pahta  
*The Cambridge Handbook of Formal Semantics*, edited by Maria Aloni and Paul Dekker  
*The Cambridge Handbook of Morphology*, edited by Andrew Hippisley and Greg Stump  
*The Cambridge Handbook of Historical Syntax*, edited by Adam Ledgeway and Ian Roberts  
*The Cambridge Handbook of Linguistic Typology*, edited by Alexandra Y. Aikhenvald and R. M. W. Dixon  
*The Cambridge Handbook of Areal Linguistics*, edited by Raymond Hickey  
*The Cambridge Handbook of Cognitive Linguistics*, edited by Barbara Dancygier  
*The Cambridge Handbook of Japanese Linguistics*, edited by Yoko Hasegawa  
*The Cambridge Handbook of Spanish Linguistics*, edited by Kimberly L. Geeslin

*The Cambridge Handbook of Bilingualism*, edited by Annick De Houwer and Lourdes Ortega

*The Cambridge Handbook of Systemic Functional Linguistics*, edited by Geoff Thompson, Wendy L. Bowcher, Lise Fontaine and David Schönthal

*The Cambridge Handbook of African Linguistics*, edited by H. Ekkehard Wolff

*The Cambridge Handbook of Language Learning*, edited by John W. Schwieter and Alessandro Benati

*The Cambridge Handbook of World Englishes*, edited by Daniel Schreier, Marianne Hundt and Edgar W. Schneider

*The Cambridge Handbook of Intercultural Communication*, edited by Guido Rings and Sebastian Rasinger

*The Cambridge Handbook of Germanic Linguistics*, edited by Michael T. Putnam and B. Richard Page

*The Cambridge Handbook of Discourse Studies*, edited by Anna De Fina and Alexandra Georgakopoulou

*The Cambridge Handbook of Language Standardization*, edited by Wendy Ayres-Bennett and John Bellamy

*The Cambridge Handbook of Korean Linguistics*, edited by Sungdai Cho and John Whitman

*The Cambridge Handbook of Phonetics*, edited by Rachael-Anne Knight and Jane Setter

*The Cambridge Handbook of Corrective Feedback in Second Language Learning and Teaching*, edited by Hossein Nassaji and Eva Kartchava

*The Cambridge Handbook of Experimental Syntax*, edited by Grant Goodall

*The Cambridge Handbook of Heritage Languages and Linguistics*, edited by Silvina Montrul and Maria Polinsky

*The Cambridge Handbook of Arabic Linguistics*, edited by Karin Ryding and David Wilmsen

*The Cambridge Handbook of the Philosophy of Language*, edited by Piotr Stalmaszczyk

*The Cambridge Handbook of Sociopragmatics*, edited by Michael Haugh, Dániel Z. Kádár and Marina Terkourafi

*The Cambridge Handbook of Task-Based Language Teaching*, edited by Mohammed Ahmadian and Michael Long

*The Cambridge Handbook of Language Contact: Population Movement and Language Change, Volume 1*, edited by Salikoko Mufwene and Anna Maria Escobar

*The Cambridge Handbook of Language Contact: Multilingualism in Population Structure, Volume 2*, edited by Salikoko Mufwene and Anna Maria Escobar

*The Cambridge Handbook of Romance Linguistics*, edited by Adam Ledgeway and Martin Maiden

*The Cambridge Handbook of Translation*, edited by Kirsten Malmkjær

*The Cambridge Handbook of Chinese Linguistics*, edited by Chu-Ren Huang, Yen-Hwei Lin, I-Hsuan Chen and Yu-Yin Hsu

*The Cambridge Handbook of Intercultural Pragmatics*, edited by Istvan Kecskes

*The Cambridge Handbook of Role and Reference Grammar*, edited by Delia Bentley, Ricardo Mairal-Usón, Wataru Nakamura and Robert D. Van Valin Jr.

*The Cambridge Handbook of Historical Orthography*, edited by Marco Condorelli and Hanna Rutkowska

*The Cambridge Handbook of Third Language Acquisition*, edited by Jennifer Cabrelli, Adel Chaouch-Orozco, Jorge González Alonso, Eloi Puig-Mayenco, Sergio Miguel Pereira Soares and Jason Rothman

*The Cambridge Handbook of Language in Context*, edited by Jesús Romero-Trillo

*The Cambridge Handbook of Slavic Languages*, edited by Danko Šipka and Wayles Browne

# Figures

1.1	Illustration of the 20 symbolic gestures analyzed by Morris et al. (1979), with their names: (1) The Fingertips Kiss, (2) The Fingers Cross, (3) The Nose Thumb, (4) The Hand Purse, (5) The Cheek Screw, (6) The Eyelid Pull, (7) The Forearm Jerk, (8) The Flat-hand Flick, (9) The Ring, (10) The Vertical Horn-sign, (11) The Horizontal Horn-Sign, (12) The Fig, (13) The Head Toss, (14) The Chin Flick, (15) The Cheek Stroke, (16) The Thumb Up, (17) The Teeth Flick, (18) The Ear Touch, (19) The Nose Tap, and (20) The Palm-back V-sign	<i>page</i> 19
2.1	Continuum of stabilization from gestures to sign	42
2.2	Continuum of stabilization in the Cyclic gesture (based on Ladewig, 2014a, p. 1614)	43
2.3	Repertoire of recurrent gestures based on Bressemer and Müller (2014b, pp. 1580–1584)	45
3.1	Sign for TREE in British Sign Language (Fenlon et al., 2014)	57
3.2	Gesture motivated by MORE IS UP conceptual metaphor in “jackpot keeps getting higher and higher” (Hinnell, 2018)	62
3.3	Metaphor iconicity in Holding Away gestures with “but anyways”	63
4.1	Two types of pointing gestures in German: G-form and PLOH (Fricke, 2007, p. 109; Fricke, 2014b, p. 1623)	89
4.2	Blending of G-Form and PLOH (Fricke, 2012, p. 112; Fricke 2014b, p. 1624)	89
4.3	Space as a <i>relatum</i> in a Peircean triadic sign	91
4.4	Deixis at signs in example (1) (Fricke, 2007, p. 208)	93
4.5	Deixis at signs in example (1) (Fricke, 2007, p. 211)	93
4.6	Deixis at non-signs in example (2) (Fricke, 2007, p. 291)	94

4.7	Deixis at non-signs as a Peircean sign configuration (Fricke, 2007, p. 209)	94
4.8	The origo-allocating act according to Fricke (2002, 2007, 2014a)	96
4.9	Sphere-like space in example 5 (Fricke, 2007, p. 265)	97
4.10	Sphere-like space in example 6 (Fricke, 2007, p. 266)	98
4.11	Map-like deictic space in example 7 (Fricke, 2007, p. 267)	98
4.12	Map-like space in example 8 (Fricke, 2007, p. 287)	99
4.13	Screen-like space in example 9 (Fricke, 2007, p. 268)	100
4.14	Shared and simultaneous space in example (10) (Fricke, 2007, p. 272)	101
4.15	Shared and successive space in example (11) (Fricke, 2007, p. 271)	101
4.16	Separated and successive space in example (12) (Fricke, 2007, p. 269)	102
4.17	Separated and simultaneous space in example (13) (Fricke, 2007, p. 270)	103
4.18	Forms of gesture space and their correlation to increasing emotional distance in face-to-face-interaction	103
8.1	Baseline of MGA: Microlevel analysis	183
8.2	Different kinds of macrolevel analyses	183
8.3	Gestures performed alongside the story-telling	187
8.4	Extract 1: Transcription and translation (retaining syntactic order of the original Spanish)	188
8.5	Extract 2: Gestures with speech as multimodal temporal form (transcription and translation with simplified McNeill-style gesture notation)	189
8.6	Set of tools for gesture form analysis	190
8.7	G1 as temporal unit	191
8.8	A Kendonian gesture unit with two gesture phrases	192
8.9	As-if actions as modes of gestural mimesis	194
8.10	Aspects of kinesic form that are simultaneously articulated	197
8.11	Possible frameworks for context-analysis	201
9.1	The gestural sign is always an analogical sign	221
9.2	A continuous analogical sign	221
9.3	Identifying gestural units	222
9.4	Gestural components	222
9.5	Relations between gestures (g/G) and notions (n/N)	225
9.6.1	Recent past	226
9.6.2	Distant past	226
9.7	The plural motivation of a polysemous gesture	227
9.8	A complex polysign gesture	229
9.9.1	Polysemy	230
9.9.2	Variation	230
9.10	The analogical link	231

9.11	Interactive construction of meaning by the two types of sign	234
9.12	Tension–relaxation in the bimodal information progressively communicated	237
9.13.1	On part d’un monde “One departs from a world”	238
9.13.2	<i>d’hier</i> “of yesterday”	238
9.13.3	dans lequel on entassait les connaissances “in which one accumulated knowledge”	238
9.14	Temporal perception of the gestural–verbal flow	238
9.15	Gesture at the interface between matter and mind	239
9.16	Opening a hand configuration to explain something	240
10.1	Full (tense) versus reduced (more relaxed) hand configurations (from Grishina, 2017, p. 55)	254
10.2	Types of deixis indicated with the head (adapted from Grishina, 2017, pp. 137–140)	258
11.1	The three axes of the arm and the flexion/extension. First image: the three axes. Second and third images: the flexion of the arm. Fourth image: the extension	281
11.2	Axis 2 and abduction/adduction of the arm. First image: axis 2. Second image: abduction. Third image: adduction	281
11.3	Axis 3 and exterior/interior rotation. First image: axis 3. Second image: exterior rotation. Third and fourth images: interior rotation	282
11.4	Axis 1 and flexion of the forearm. First image: axis 1. Second image: flexion of the forearm	282
11.5	Axis 3 and supination/pronation of the forearm. First image: pronation. Second image: axis 3. Third image: supination	283
11.6	Axis 2 and abduction/adduction of the hand (two views of each). First vertical pair of images: adduction. Second vertical pair: axis 2. Third vertical pair: abduction	283
11.7	Axis 1 and extension/flexion of the hand. First image: extension. Second image: axis 1. Third image: flexion	284
11.8	Pseudo paradox of Codman	285
11.9	Codman’s paradox. First image: the initial position. Second image: flexion of the arm. Third image: adduction. Fourth image: final position; notice the position of the thumb. (Adapted from Boutet, Morgenstern, & Cienki, 2018, p. 150, Figure 5.4)	285
11.10	Gimbal lock on the hand. The alignment is sensitive to the pole maintained. In extension, abduction and pronation are linked, whereas in flexion, abduction and supination are aligned	287
11.11	Examples of gestures with manual alignments. First image: “goodbye” gesture. Second image: “beware of spanking.” Third image: negation gesture. Fourth image: “ <i>Oh là là</i> ” gesture	287

- 
- 11.12 Gesture of presentation while the speaker says, and seems to notice, “they have returned” (*“Ils sont revenus”*). This small clip corresponds to a decomposition of each image. There is a movement of extension, supination, and adduction of the right hand from image 1 to image 6 289
- 11.13 Gestures expressing incapacity. In the first image, Vladimir Putin’s hands are in an intermediate position (neither pronation nor supination), the forearms in an external rotating position and the arm in an abduction position due to the highly visible shrugging of the shoulders. In the second image, Nicolas Sarkozy’s hands are in a position of supination, the forearms in a position of exterior rotation, while the arms stuck to the side are in an adduction position. Kobe Bryant, the basketball player in third image, has his hands in a marked supination position with a strong flexion position of the forearms and with his upper arms at his sides. It seems that the supination position does not condition the positions of the forearm and arm 289
- 11.14 Sequencing of two signs in LSF. [LOCATION] (or *place* in spoken French) in the upper image and [GRASP] (*saisir*) in the lower image. The distinction between these two handshapes is based on the flow of movement 292
- 11.15 Political speech of Nicolas Sarkozy, April 5, 2012. While he says “There is nothing we can do about it” (*“On n’y peut rien”*), we notice a movement of extension of the hand and a slight supination between frames 2 and 4 and an abduction of the hand for frames 4 and 5, finally an exterior rotation of the forearm and an abduction of the arm. Here it is a form of epistemic negation whose flow is inverted (distal–proximal) which is similar to that expected for a gesture of presentation 293
- 11.16 “So there was blood everywhere” (*“donc y avait du sang partout”*). The gesture begins with a movement of the forearm (exterior rotation of frames 1 to 3), then this movement affects the hand (frames 3 and 4) in the same direction, toward the outside. This gesture corresponds to the expression of totality. Note that the speed of it is important here (seen in the fuzzy image of the hand), remaining relatively constant and high. (From Boutet et al., 2018, p. 147, Figure 5.2) 294
- 11.17 “Finally, there were not many of us” (*“Enfin, on n’était pas nombreux”*). This gesture begins with a movement of the hand (outward). This movement spreads to the forearm (frames 4 and 5) with the same external direction. This gesture corresponds to a negation. During the first three frames, when the hand is moving, the upper part of the right wrist remains in the same place (as can be seen in these frames, given the position of the left elbow in the

	background). In the sweeping movement to the outside of the hand, one can also see the expression of totality, the hand then covering the supposed extent that the people occupied. (From Boutet et al., 2018, p. 147, Figure 5.3)	295
11.18	Action schema of the gestural unit “Refusal.” The flow is distal–proximal and it comes from the two voluntary movements – adduction and extension – on the hand	297
11.19	Action schema of the Gestural Unit <i>je m’en fiche</i> “I don’t care about that.” The flow is proximal–distal and it comes from the two voluntary movements – abduction and flexion – on the arm	298
12.1	A flowchart providing some suggestions for method selection. Note that this is a simplified version of the arguments, and researchers should also carefully read the subsections devoted to their method of choice	315
12.2	Three-dimensional coordinates of the right hand visualized in ELAN as individual time series. From bottom to top, the three lines in this figure depict X, Y, and Z coordinate time series of the right hand. Peaks in the time series can be used to find maximum extension or final position of a movement, while changes in the values (i.e. when the time series begins to peak) can be used to find movement onsets	316
14.1	Are you finished + palm down lateral movement (turn 4)	374
14.2	Ellie’s resonance with her mother’s recurrent gesture (turn 7)	375
14.3	Ellie’s preparation for avoidance	379
14.4	Avoidance and refusal	379
14.5	Request to get out of the chair	379
14.6	Smacking lips	379
14.7	Smiling, lifting shoulders, and opening arms	382
14.8	“I think it was this big”	385
14.9	Size readjustment: “this big?”	385
14.10	“the Mum is this big”	386
14.11	Narrative space	389
14.12	Discourse space (reported speech inside narration)	389
14.13	[ <i>régler</i> + recurrent gesture]	389
16.1	Depart gesture	431
16.2	LSF sign IL FAUT and ASL modal sign MUST	432
16.3	Pointing construction	436
17.1	Geographical coverage of the attested relation between gesture and negation in spoken languages	450
17.2	Plural motivation of the “Level Hand” gesture (Calbris, 2011, p. 183)	453
17.3	Invariant feature in different orientations of the palm: a. pronation/palm down, b. pronation/palm forward, c. pronation/palm sideways (Boutet, 2015, p. 118)	457

17.4	Three Horizontal Palm gestures based on different underlying actions: PDAcross ('sweeping away'), 2PDmid ('clearing aside'), and 2PDAcross ('cutting through') (Harrison, 2018)	458
17.5	Functional explanation: "sharing the load" (Wegener & Bressemer, 2019)	461
18.1	Box 1	478
18.2	Speech-synchronized gesture	481
18.3	"Rising hollowness" with "he goes up through the pipe this time"	484
18.4	Catchment view of the "it down" growth point (Panel 2). Transcription by S. Duncan. Based on McNeill (2016, Figure 4.2)	489
18.5	Box 2	491
18.6	Box 3	493
19.1	Child explaining her solution to a Piagetian conservation of liquid quantity problem (see text). The child's verbal utterance was: "Um, because this ... (long pause) water is up to here, and this water is up to here." (A) as she said, "Um," she highlighted the height of the water in the taller glass, by placing her thumb at the base of the glass and her fingers at the water level; (B) during the pause in her speech, she highlighted the narrow width of the glass by using her index finger to trace the circumference of the glass; (C) as she said, "water is up to here," she placed her flat palm, facing down, at the side of the taller glass at the water level; and (D) as she said, "and this water is up to here," she moved her hand to the side of the shorter glass and produced a pointing gesture at its water level	508
20.1a	Neurotypical motor control of the right and left hands	526
20.1b	Left hemisphere damage: paresis of the contralateral right hand	526
20.1c	Right hemisphere damage: paresis of the contralateral left hand	526
20.1d	Callosal disconnection: exclusive contralateral control of the right and left hands	526
20.2	Visuo-motor processing of lateralized presented stimuli	530
25.1	The robot's perception and reaction as counterparts of human perception and reaction in interactive situations	646
25.2	A robot gesture library from WikiTalk (modified from Csapo et al., 2012)	649
25.3	Visualization of cospeech gesturing (Vels & Jokinen, 2015). From left to right: left person's torso back, head, and torso front, the right person's torso front, head and torso back. Time is shown on the y-axis running from top to bottom, and the x-axis depicts the magnitude of the person's horizontal movement in pixels in the video frame	651
25.4	Visualization of cospeech gesturing (Vels & Jokinen, 2015)	651
26.1	Schematic of a typical Wizard of Oz design for investigating gestural interaction in the home	674

# Tables

1.1	Position of emblems in four continua, according to McNeill (2000, pp. 2–5)	<i>page</i> 10
1.2	Basic and additional optional features to characterize emblematic gestures as a prototypical (physical/morphological) and a pragmatic category	11
4.1	Schema of four semiotic subfields of space	91
4.2	Forms of deictic space: mode of creation and temporal structure (Fricke, 2007, p. 272)	100
9.1	Classification of gestures according to pertinent physical criteria	223
9.2	Overview of substitutions between the head, hand, index finger, and thumb	224
9.3	The polysign gesture	228
9.4	The multifunctionality of each communication channel	232
9.5	Relation between the gestural anticipation of speech and the type of mental imagery	236
9.6	Interplay of tension–relaxation between gestural and verbal information	237
9.7	Physical motivation of notions spatialized on the left and on the right	241
10.1	Summary of deictic forms and functions for the head and hand (adapted from Grishina, 2017, p. 169, Table 4.23)	259
11.1	Summary table of the four rules that affect movement of the upper limb segments	291
12.1	Some open resources for motion tracking and gesture research	327
14.1	Example 1. Video 1. Ellie, 10 months	373
14.2	Example 2. Video 2. Ellie one year and two months. Between action and gesture: headshakes	378
14.3	Example 3. Video 3. Ellie, one year and six months. Refusal	381

14.4	Example 4. Video 4. Ellie one year and 11 months. Echoing speech with gesture	381
14.5	Example 5. Video 5. Ellie one year and nine months. Pointing + adjective	383
14.6	Example 6. Video 6. Ellie, four years and two months. Big. Ellie is co-narrating for her grandmother, with her mother's help, her visit to a zoo	384
14.7	Example 7. Video 7. Madeleine six years and 11 months	388
17.1	Widespread observations of gestures associated with negation, classified by language family	448
18.1	Dual semiosis (McNeill, 2012, p. 20, Table 2.1)	483
18.2	Catchment themes of the "it down" growth point (from McNeill, 2012)	488
20.1	Comparison of gesture coding systems employed in neuropsychological research	533
22.1	Two levels of gesture functions, corresponding to Clark's (1996) Track 1 and Track 2	591
