<i>Foreword</i>	xiii
<i>Preface to the Second Edition</i>	xv
<i>Preface to the First Edition</i>	xvii
<i>Acknowledgements</i>	xxi
<i>Some Common Abbreviations used in the Text</i>	xxiii
<i>Abbreviations for Units</i>	xxvii

Unit I: Water and Mineral Translocation in Plants

1. Plant–Water Relations	3
1.1 Water – A Universal Solvent	3
1.2 Permeability	16
1.3 Diffusion, Imbibition, Osmosis and the Water Potential Concept	29
<i>Review Questions</i>	42
2. Absorption and Translocation of Water	51
2.1 Absorption of Water	51
2.2 Translocation of Water	60
<i>Review Questions</i>	68
3. Transpiration	75
3.1 Foliar Transpiration	75
3.2 Guttation	76
3.3 Bleeding	76
3.4 Stomata	77
3.5 Blue Light Responses	80
3.6 Transpiration: A Two-Stage Process	82
3.7 Plant Antitranspirants	89
3.8 Factors Affecting Transpiration	90
3.9 Significance of Transpiration	92

vi Contents

3.10	Transpiration Ratio and Water Use Efficiency	92
	<i>Review Questions</i>	95
4.	Mineral Nutrition and Absorption	100
4.1	Techniques Used in Nutritional Studies	101
4.2	Criteria of Essentiality	103
4.3	Essential Elements	105
4.4	Iron Stress	116
4.5	Mycorrhizae	118
4.6	Mechanism of Mineral Absorption	120
4.7	Transmembrane Potential	131
4.8	Ion Antagonism	131
4.9	Radial Path of Ion Movement through Roots	132
4.10	Mineral Toxicity	133
	<i>Review Questions</i>	134
Unit II: Metabolism and Bioenergetics		
5.	Concepts of Metabolism	153
5.1	Metabolism	153
5.2	Concepts of Thermodynamics	159
5.3	Laws of Thermodynamics	161
5.4	Redox Reactions	163
5.5	ATP: The Energy Currency of the Cell	164
5.6	Coupled Reactions	165
	<i>Review Questions</i>	165
6.	Enzymes	168
6.1	Historical Background	168
6.2	Characteristics of Enzyme-catalyzed Reactions	169
6.3	Cofactors	170
6.4	Enzyme Classification	173
6.5	Mechanism of Enzyme Action	174
6.6	Isozymes (Isoenzymes)	180
6.7	Multienzyme Complex	181
6.8	Enzyme Regulation	183
6.9	Michaelis Constant (K_m)	186
6.10	Enzyme Inhibition	190
6.11	Factors Affecting Enzymatic Reactions	193
6.12	Uses of Enzymes	195
	<i>Review Questions</i>	197
7.	Photosynthesis	201
7.1	Historical Perspective	202
7.2	Chloroplast as Solar Harvesting Enterprise	203
7.3	Absorption and Action Spectrum	209

7.4	The Light Reaction (Photochemical Phase)	212
7.5	The Dark Reactions	227
7.6	Photorespiration	234
7.7	Hatch–Slack Pathway (C ₄ Syndrome)	236
7.8	CAM Pathway (Crassulacean Acid Metabolism)	240
7.9	Factors Affecting Photosynthesis	241
	<i>Review Questions</i>	245
8.	Carbohydrate Metabolism	253
8.1	Sucrose and Starch Metabolism	253
8.2	Cellulose Synthesis	259
8.3	Fructans	260
8.4	Carbohydrate Metabolism in Plants and Animals	263
	<i>Review Questions</i>	264
9.	Respiration	267
9.1	Glycolysis	268
9.2	Oxidative Decarboxylation of Pyruvate to Acetyl CoA	271
9.3	Citric Acid Cycle (Krebs Cycle)	272
9.4	Electron Transport System and Oxidative Phosphorylation	275
9.5	Regulation of Respiratory Pathways	283
9.6	The Krebs Cycle as a Second Crossroad of Metabolic Pathways	286
9.7	Alternative Electron Transport Pathways in Plant Mitochondria	287
9.8	Gluconeogenesis	291
9.9	Pentose Phosphate Pathway (or Oxidative Pentose Phosphate Pathway)	291
9.10	Anaerobic Respiration	295
9.11	Alcoholic Fermentation	295
9.12	Lactic Acid Fermentation	296
9.13	A Summarized Overview of the Various Sites of Cellular Respiration alongside Diagrammatic Representation	297
9.14	Other Substrates for Respiration	298
9.15	Respiratory Quotient	298
9.16	Factors Affecting Respiration	300
	<i>Review Questions</i>	303
10.	Nitrogen Metabolism	313
10.1	Nitrate Assimilation	313
10.2	Ammonium Assimilation	316
10.3	Amino Acids and Their Structure	321
10.4	Proteins	323
10.5	Nucleic Acids	329
10.6	Molecular (Biological) Nitrogen Fixation	332
10.7	Nitrogen Cycle	339
10.8	Nitrogen Use Efficiency (NUE)	341
10.9	Carnivorous Plants	343
	<i>Review Questions</i>	345

viii Contents

11. Lipid Metabolism	352
11.1 Fatty Acids: Structure and Properties	353
11.2 Fatty Acid Oxidation	356
11.3 Fatty Acid Synthesis	362
11.4 Lipid–Sugar Conversion: The Glyoxylate Pathway	364
11.5 Genetic Engineering of Lipids	367
<i>Review Questions</i>	368
12. Sulphur, Phosphorus and Iron Assimilation in Plants	374
12.1 Sulphur Metabolism	374
12.2 Phosphorus Metabolism	380
12.3 Iron Metabolism	383
<i>Review Questions</i>	385
13. Phloem Transport	388
13.1 Evidences in Support of Phloem Transport	388
13.2 Composition of the Photoassimilates Translocated in the Phloem	390
13.3 Anatomy of Phloem Tissue	390
13.4 Mechanism of Phloem Transport	391
13.5 Phloem Loading and Unloading	395
13.6 Photoassimilate Distribution: Allocation and Partitioning	400
<i>Review Questions</i>	402
Unit III: Growth and Development	
14. Dormancy, Germination and Flowering	411
14.1 Growth Curve	412
14.2 Seed Germination	413
14.3 Dormancy	416
14.4 Photoperiodism	423
14.5 Vernalization	433
14.6 Biological Clock and Circadian Rhythms	436
14.7 Photomorphogenesis	439
<i>Review Questions</i>	450
15. Plant Photoreceptors	453
15.1 Phytochrome	454
15.2 Cryptochromes	462
15.3 Phototropins	464
15.4 UV Resistance Locus 8 (UVR8)	466
<i>Review Questions</i>	467
16. Plant Hormones and Signal Transduction	468
16.1 Auxin: The Growth Hormone	468
16.2 Gibberellins: Regulators of Plant Height	480
16.3 Cytokinins: Regulators of Cell Division	485
16.4 Abscisic Acid: A Seed Maturation and Anti-stress Signal	491

16.5	Ethylene: The Gaseous Hormone	496
16.6	Polyamines	500
16.7	Salicylic Acid	502
16.8	Nitric Oxide	502
16.9	Strigolactones	504
16.10	Jasmonates	505
16.11	Brassinosteroids	506
16.12	Signal Perception and Transduction	509
	<i>Review Questions</i>	516
17.	Ripening, Senescence and Cell Death	526
17.1	Fruit Ripening	526
17.2	Plant Senescence	530
	<i>Review Questions</i>	540
Unit IV: Physiological Stress and Secondary Metabolites – Their Role in Metabolism		
18.	Abiotic and Biotic Stress	545
18.1	Abiotic Stress	546
18.2	Biotic Stress	580
	<i>Review Questions</i>	585
19.	Secondary Plant Metabolites	590
19.1	Terpenes (Terpenoids)	591
19.2	Phenolic Compounds	595
19.3	Alkaloids	602
19.4	Glycosides	604
19.5	Role of Secondary Metabolites in Plant Defences	607
	<i>Review Questions</i>	608
Unit V: Crop Physiology – An Innovative Approach		
20.	Agricultural Implications of Plant Physiology	613
20.1	Role of Plant Hormones	614
20.2	Photoperiodism, Vernalization and Dormancy	615
20.3	Phloem Transport	616
20.4	Mineral Nutrition	616
20.5	Reproductive Development	618
20.6	Fruit Preservation	618
20.7	Nitrate Assimilation	618
20.8	Plant Secondary Metabolites (Natural Products)	618
20.9	Strategies Employed by Plant Breeders to Eradicate Weeds in Crop Fields	619
20.10	Genetic Engineering of Crops	620
20.11	Developing Crops with Increased Tolerance to Stress (Biotic and Abiotic)	621
20.12	Biofortification for Selecting and Developing Crop Cultivars Denser in Micronutrients	621

x Contents

20.13	Genetic Engineering of Lipids	623
20.14	Engineering Cell Wall-degrading Enzymes into Growing Plants to Deliver Cost-effective Bioethanol Technology	623

Unit VI: Breakthroughs in Plant Physiology

21.	Seminal Contributions of Plant Physiologists	627
	Thomas Graham	627
	Ernst Münch	627
	Paul J. Kramer	628
	H. F. Thut	628
	Dennis R. Hoagland	629
	A. Hemantaranjan	629
	Emanuel Epstein	630
	J. D. Sayre	631
	G. W. Scarth	631
	F. C. Steward	631
	Jacob Levitt	632
	Franz Knoop	633
	Hugo De Vries	633
	J. C. Bose	633
	Stephen Hales	634
	Otto Renner	634
	Frederick Sanger	634
	Emil Fischer	634
	D. Koshland	635
	C. B. van Niel	635
	Otto Warburg	636
	F. F. Blackman	636
	Daniel I. Arnon	637
	Bessel Kok	637
	N. E. Tolbert	638
	André Jagendorf	638
	Robert Emerson	639
	R. G. Govindjee	639
	Fay Bendall	640
	Louis Duysens	641
	Melvin Calvin	641
	Albert Szent-Györgyi	641
	Hans A. Krebs	642
	Harry Beevers	642
	Frits W. Went	642
	F. Kögl	643
	R. Gane	643
	K. V. Thimann	643
	Gottlieb Haberlandt	644

Johannes van Overbeek	644
Folke Skoog	644
D. S. Letham	645
F. T. Addicott	645
P. F. Wareing	645
J. E. Varner	645
L. G. Paleg	646
L. H. Flint	646
Michael H. Chailakhyan	648
H. A. Borthwick	648
W. W. Garner and H. A. Allard	649
Hans Möhr	649
22. The Status and Development of Plant Physiology in India	651
Unit VII: Some Experimental Exercises	
23. Experimental Exercises	663
<i>Glossary</i>	823
<i>References</i>	851
<i>Index</i>	856
<i>Colour Plates</i>	863
