PART I POLITICAL ECONOMY AND COMPLEX SYSTEMS

1 Great Transitions in Economic History
   1.1 Networks in Economic Transitions
   1.2 A Complexity Transition that May Reshape the World

2 Growth, Form, and Self-Organization in the Economy
   2.1 The Economy Has the Global Properties of a Complex System
   2.2 Change Processes in Complex Systems
   2.3 Network Representations of Complex Systems
   2.4 Differences in the Network Structure of China and the West
   2.5 Change Thresholds and Phase Transitions
   2.6 Transformative Change and Networks in World History
3 Human Evolutionary Behavior and Political Economy
  3.1 Later Is Different 58
  3.2 Evolving Properties of Global Connectivity 59
  3.3 Evolutionary Social Psychology Applied to Agent Behavior 65
  3.4 Preventative Chaos: Economic Opportunities Hide in Global Fractures 72

PART II AN ANALYSIS OF HISTORICAL REGIMES 77

4 Network Assemblage of Regime Stability and Resilience in Europe and China 79
  4.1 Identifying Hypernetworks in Europe and China 81
  4.2 Resilience and Stability Trade-Offs in China and Europe 87
  4.3 The Endurance of Dynastic Lordship in Europe 89
  4.4 Decay and Renewal of Chinese Dynasties 98
  4.5 Technological Progress and Network Resilience 104
  4.6 Social Systems As Multilevel Systems 105

5 Network Formation and the Emergence of Law: From Feudalism to Small-World Connectivity 112
  WITH CAMERON HARWICK
  5.1 Increasing Returns and the West’s Legal System 113
  5.2 The Origins of Strong but Limited Government 114
  5.3 Communitarian and Rationalist Law: Four Reconciliations 115
  5.4 What the West Still Has to Offer 132
  5.5 China’s Legal Tradition: Legalist versus Confucian 138
# Table of Contents

## Part I The Birth of the Network Economy

6 The Network Foundations of the Great Divergence

**WITH QING TIAN**

6.1 Network Structure and Innovation in Europe

6.2 The Confucian State and the Stifling of Innovation

6.3 Disruptive Innovation, Network Structure, and the Great Divergence

6.4 A Modern Role Reversal in Global Innovation

## Part II The Network Foundations of Power

7 Has the Baton Passed to China?

**WITH LIU BAOCHENG**

7.1 China’s Unique Development Path

7.2 A Great Lesson of Economic History, Not Learned

## Part III The Coming Instability

8 China’s Ambitions and the Future of the Global Economy

**WITH LIU BAOCHENG**

8.1 China’s Search for Soft Power

8.2 The Hub-and-Spoke Resurfaces, As It Has for Millennia

8.3 Different Outlooks on Markets, and Why It Matters for Globalization

8.4 Possible Scenarios of China’s Role in the Global Economy

9 Global Networks over Time

**WITH KEVIN COMER, JACK GOLDSTONE, AND DAVID MASAD**

9.1 Network Structure in International Relations

9.2 End-of-Power Measures in the International Network Structure
9.3 Network Properties and Power in International Relations 249
9.4 A Tangled Web in the Global Economy 251
9.5 A Post-Hegemonic Transition Unfolds 252

10 A Future of Diminishing Returns or Massive Transformation? 256
10.1 Death by Diminishing Returns Is Not Without Precedent 256
10.3 An Age of Uncertainty Calls for Revised Expectations 261

11 Network Structure and Economic Change: East vs. West 266
11.1 Flow and Structure: Communication and Connection 267
11.2 Network Resilience and Revolution in the West 268
11.3 Network Structure and Stability in Europe and China 269
11.4 Network Analysis of Global Systems in Economic History 276
