Japan’s Ocean Borderlands

Desert islands are the focus of intense geopolitical tensions in East Asia today, but they are also sites of nature conservation. In this global environmental history, Paul Kreitman shows how the politics of conservation have entangled with the politics of sovereignty since the emergence of the modern Japanese state in the mid-nineteenth century. Using case studies ranging from Hawai’i to the Bonin Islands to the Senkaku (Ch: Diaoyu) Isles to the South China Sea, he explores how bird islands on the distant margins of the Japanese archipelago and beyond transformed from sites of resource extraction to outposts of empire and from wartime battlegrounds to nature reserves. This study examines how interactions between birds, bird products, bureaucrats, speculators, sailors, soldiers, scientists and conservationists shaped ongoing claims to sovereignty over oceanic spaces. It considers what the history of desert islands shows us about imperial and post-imperial power, the web of political, economic and ecological connections between islands and oceans, and about the relationship between sovereignty, territory and environment in the modern world.

Paul Kreitman teaches modern Japanese history at Columbia University.
Cambridge Oceanic Histories

Edited by

David Armitage
Alison Bashford
Sujit Sivasundaram

Across the world, historians have taken an oceanic turn. New maritime histories offer fresh approaches to the study of global regions, and to long-distance and long-term connections. Cambridge Oceanic Histories includes studies across whole oceans (the Pacific, the Indian, the Atlantic) and particular seas (among them, the Mediterranean, the Caribbean, the North Sea, the Black Sea). The series is global in geography, ecumenical in historical method, and wide in temporal coverage, intended as a key repository for the most innovative transnational and world histories over the longue durée. It brings maritime history into productive conversation with other strands of historical research, including environmental history, legal history, intellectual history, labour history, cultural history, economic history and the history of science and technology. The editors invite studies that analyse the human and natural history of the world’s oceans and seas from anywhere on the globe and from any and all historical periods.

6.2a Oliver L. Austin Jr. during a hunting trip in Hokkaidō (c.1946–1950) 179
6.2b Prominent ornithologists and their wives gather at the home of Kuroda Nagahisa (c.1946–1950) 179
6.3 Yamashina Yoshimaro helps children install bird boxes in the gardens of the National Diet Building 182
6.4 ‘The fools who dance and the fools who don’t dance’ 192
6.5 ‘Albatrosses – all year round the same chirping: “Normalization!”’ 197
7.1 Stamps issued to commemorate distinctly ‘Ryukyuan’ cultural and natural heritage 205
7.2 Takara Tetsuo by the ruins of Koga Tatsushiro’s bonito processing plant on Uotsuri-shima (1950) 212
7.3 Taiwanese fishermen collecting eggs on the Senkaku Islands (c.1963–1968) 218
7.4 Ishigaki police officers erect a sign forbidding unauthorised landings on the Senkaku Islands (1968) 220
7.5 Ryukyu Post Office stamp portraying Steller’s albatrosses (issued 14 April 1972) 222
8.1 Map published by Japan Coast Guard to show Japan’s oceanic territorial rights 235
8.2 Map of Papahānaumokūkea Marine National Monument 239
Acknowledgements

This book would not be possible without financial, intellectual and emotional support from a great many institutions and individuals. I began this project as a doctoral student at Princeton University and completed it at Columbia University. Along the way I was supported by research fellowships from the Japan Foundation, the Institute for Historical Research and the Japan Society for the Promotion of Science, and by a teaching fellowship at SOAS University of London. I am keenly aware that few other scholars have had access to the resources that enable this kind of multi-archival research across several continents, and I am grateful for the privilege.

As for individuals, it would surely be impossible to name every person who has helped guide this book to completion, amongst whom I must count not only teachers, colleagues and friends but also librarians, archivists and the support staff who keep the cogs of academia turning. Sponsors at several other universities have also invited me to present my research findings at conferences and lectures, providing opportunities for valuable feedback. Nevertheless, and in the sure knowledge I have overlooked someone crucial, I would like to single out the following people for special mention.

At Princeton I benefited from a wise and patient adviser in the form of Shel Garon, but also indispensable guidance from David Howell, Emmanuel Kreike, Federico Marcon, Stephen Kotkin, Janet Chen and Su Naquin. I was also blessed by an unusually supportive graduate student cohort, among whom honourable mention goes to Erin Brightwell, Kjell Ericson, Yulia Frumer, Scott Moskowitz, Seiji Shirane, Wayne Soon, Megan Steffen, Jolyon Thomas, Kimberly Thomas and Ray Thornton. Beyond Princeton, Angus Lockyer and Taka Yamamoto provided crucial feedback and companionship during an interlude spent writing up the dissertation in London.

Among my colleagues at Columbia I would like to especially thank my academic mentors, David Lurie and Eugenia Lean, and also Greg
Acknowledgements

Pflugfelder, Haruo Shirane, Tomi Suzuki, Michael Como, Max Moerman, Carol Gluck, Takako Hikotani, Lien-Hang Nguyen, Matti Zelin, Hannah Farber, Karl Jacoby, Adam Tooze, Susan Pedersen, Rebecca Kobrin, Ria Koopmans-Debruïjn, Sachie Noguchi and Laura Schlein. Plus of course my students, who have been a joy to teach even during the darkest days of COVID-19. Special thanks go to Peter Moody, Jenn Strange and Juzhi Zheng for their help with supplementary research. I must also thank Ross Yelsey at the Weatherhead East Asia Institute, who provided invaluable help crafting the book proposal.

In Japan, Yasutomi Ayumu kindly hosted me as a visiting researcher at the University of Tokyo’s Institute for Advanced Studies on Asia. Fukao Yoko did likewise at Osaka University several years later, not only guiding me through the complexities of the JSPS application process but providing myself and my family sanctuary during the worst of the pandemic. Sakaguchi Makoto and Ikeda Ryō were good enough to invite me to join the Fertilizer History Research Group and the Informal Empire Research Project respectively. Hasegawa Hiroshi and Yokohata Yasushi both generously shared their time and expertise with me, a non-scientist, as did the staff of the Yamashina Institute for Ornithology. Kuniyoshi Masafuru shared valuable documentary and visual material related to the history of the Senkaku Isles. And Takara Tetsumi enlightened me on his father’s human side and the taste of dugong meat.

Countless others have also provided support, intellectual stimulation and friendship over the years, including (but not limited to) Araragi Shinzō, Dani Botsman, Ted Boyle, Sakura Christmas, Fabian Drixler, David Fedman, Gal Gvili, Toshi Higuchi, Nadin Heé, Stefan Hübner, Mariko Iijima, Tatiana Linkhoeva, Aike Rots, Jonas Rüegg, Jordan Sand, Sujit Sivasundaram, Tehila Sasson, Ariel Stilerman, Bill Tsutsui, plus of course my late undergraduate adviser, Ann Waswo. Ian Jared Miller, Alexis Dudden, Greg Cushman and Martin Dusinberre all provided crucial feedback on draft versions of this manuscript at various stages. And Lucy Rhymer and Laheba Alam at Cambridge University Press and Reshma Xavier at Integra have been unusually patient and understanding editors throughout the long slog to completion.

Finally, renewed thanks and love to my family – to Jojo, Monty, Tricia, Roger, Oliver, Eliza, Arthur and Richard, but also to the Iwase family in Tokyo and among them Noriko, who passed long before her time was due. I dedicate this book to her memory.
Naming Conventions

Many of the islands discussed in this book have been known by various names in different languages, and the choice of one name over others risks being construed as politically loaded. So I should say at the outset that this book does not seek to adjudicate territorial sovereignty claims. Instead, when choosing which names to use for islands or island groups I have generally tried to prioritise clarity over politics where possible. This means I have not been entirely systematic. In some cases I have opted for names that sound more familiar to readers in English: so Iwo Jima over Iōtō, Marcus Island over Minami-torishima, Rasa Island over Okidaitōjima, Sakhalin over Karafuto, Guam over Guåhan, Sea of Japan over East Sea. In other cases I have echoed the names used by my sources, particularly when I am interested in recovering the particular historical perspectives of those sources. In Chapter 7, for instance, which is told largely from Okinawan and Japanese perspectives, I refer to the Senkaku Islands rather than the Diaoyu-tai, Diaoyu-dao or Pinnacle Islands. This by no means connotes support for the Japanese government’s territorial claim to the islands. To avoid confusion I have generally tried to refer to islands by the same names throughout, even though their ‘official’ names may have changed multiple times. So I have stuck with Bonin over Ogasawara Islands even when discussing their time under Japanese rule.

Though sensitive to the cause of Indigenous rights, I have also avoided using anachronistic names where possible. So in referring to the Indigenous lands of the Ainu I use the settler colonial name Hokkaidō over the more recent coinage Ainu Mosir. Conversely in Chapter 7, I refer to Okinawans rather than Ryūkyūans because, notwithstanding the historical existence of an independent Ryūkyū Kingdom, I detected little evidence of sustained Ryūkyūan nationalist sentiment during the period of US colonial rule over the islands. Finally, when writing about the Northwest Hawaiian Islands I have used
Laysan, Lisianski and Midway rather than the Hawaiian-language names proposed by Kekuewa Kikiloi. Though the names recovered by Kikiloi effectively articulate traditional Indigenous claims to the islands (and may well have been used prior to the nineteenth century), by the early twentieth century they appear to have fallen out of use even amongst Native Hawaiians (Kānaka Maoli or Kānaka ‘Ōiwi. I have, however, listed Indigenous names for Hawaiian and other Pacific islands where they first appear in the text.

Japanese and Chinese names are written in the East Asian fashion – surname before given name – except when citing works published in English. I have added macrons to Japanese vowels where appropriate, but not for places such as Tokyo or Osaka that are well known to English-language readers. Chinese words and names are mainly written in pinyin. I have included ‘okina and kahakō¯ in Hawaiian terms and names unless quoting primary sources that do not include them.
