Cambridge University Press 978-1-108-49008-5 — Introduction to Computable General Equilibrium Models Mary E. Burfisher Table of Contents <u>More Information</u>

## Contents

List of Figures	<i>page</i> xii
List of Tables	XV
List of Text Boxes	xxi
Acknowledgments	xxiii
About This Book	1
Objectives	1
What's New in the Third Edition	3
Organization	4
Resources for New CGE Modelers	6
For the Instructor	7
1 Introduction to Computable General Equilibrium Models	9
Economic Models, Economists' Toys	9
What Is a Computable General Equilibrium Model?	11
A Standard CGE Model	16
CGE Model Structure	17
CGE Model Database	17
CGE Model Applications	19
Summary	20
Key Terms	21
Practice and Review	21
2 Elements of a Computable General Equilibrium Model	25
Sets	26
Endogenous Variables	27
Exogenous Variables	29
Model Closure	29
Exogenous Parameters	29
Equations	42
Macroclosure	43

Contents	ix
5 Supply in a CGE Model	145
Production Data in a SAM	146
Input–Output Coefficients	147
Producer Behavior in a CGE Model	149
Technology Tree and Nested Production Functions	150
Intermediate Input Demand	152
Factor (Value-Added) Demand	155
Combining Intermediate Inputs and Factors	159
Input Prices and Level of Output	159
Export Supply	163
Supply with a Non-diagonal Make Matrix	166
Summary	168
Key Terms	169
Practice and Review	169
Technical Appendix 5.1: Inputs as Substitutes or	
Complements – Energy Nesting in CGE Models of	
Climate Change Mitigation	171
6 Factors of Production in a CGE Model	174
Factors of Production Data in a SAM	175
Factor Mobility	176
Factor Endowment Change	179
Factors as Complements and Substitutes	180
Factor Productivity Change	183
Factor Unemployment	187
Factors and Structural Change	189
Summary	191
Key Terms	192
Practice and Review	192
7 Trade in a CGE Model	194
Trade Data in a SAM	195
Exchange Rates	196
Terms of Trade	200
Trade Theory in CGE Models	203
Factor Endowment Changes, Trade, and Terms of Trade	204
World Price Changes and Factor Income Distribution	209
Booming Sector, Dutch Disease	210
Trade Margins in International Trade	214
Summary	216
Key Terms	216
Practice and Review	217

X	Contents	
8	Taxes in a CGE Model	219
	Trade Taxes	222
	Production Taxes	230
	Sales Taxes	234
	Factor Use Taxes	238
	Income Taxes	241
	Second-Best Efficiency Effects	247
	Marginal Welfare Burden of a Tax	249
	Preferential Tariffs	253
	Summary	259
	Key Terms	259
	Practice and Review	260
9	Regulations in a CGE Model	262
	Types of Regulations	262
	Nontariff Measures in International Trade	263
	Regulations to Correct Negative Production Externalities	277
	Summary	285
	Key Terms	286
	Practice and Review	286
10	Conclusion: Frontiers in CGE Modeling	287
Ma	odel Exercises	296
	Introduction	296
	Model Exercise 1: Set Up the GTAP Model	300
	Model Exercise 2: Explore the GTAP Model and Database	306
	Model Exercise 3: Skill-building in Using the Model	313
	Model Exercise 4: Climate Shocks and Food Price Spikes	331
	Model Exercise 5: Food Fight: Agricultural Production Subsidies	337
	Model Exercise 6: How Immigration Can Raise Wages	344
	Model Exercise 7: Anatomy of a Trade War	350
	Model Exercise 8: The Marginal Welfare Burden of the US Tax	• • •
	System	361
	Model Exercise 9: Climate Change – the World in 2050	369
	Model Exercise 10: Successful Quitters – "MPOWER"	270
	Changing Attitudes toward Tobacco Use	3/8
	Model Exercise 11: Deep Integration in a Japan–US Preferential	200
ת	I rade Agreement	390
