AN ANTHROPOLOGY OF DEEP TIME

In the face of debates about the Anthropocene – a geological epoch of our own making – and contemporary concerns about ecological crisis and the sixth mass extinction, it is more important than ever to locate the time frame of human activity within the deep time of planetary history. This path-breaking book is a timely critical review of the anthropology of time, exploring our human relationship with the timescale of geological formation. Richard D. G. Irvine shows how the time horizons of social life are a matter of crucial concern and lays bare the ways in which human activity becomes severed from the long-term geological and ecological rhythms on which it depends.

RICHARD D. G. IRVINE is a lecturer in social anthropology at the University of St. Andrews.

NEW DEPARTURES IN ANTHROPOLOGY

New Departures in Anthropology is a book series that focuses on emerging themes in social and cultural anthropology. With original perspectives and syntheses, authors introduce new areas of inquiry in anthropology, explore developments that cross disciplinary boundaries, and weigh in on current debates. Every book illustrates theoretical issues with ethnographic material drawn from current research or classic studies, as well as from literature, memoirs, and other genres of reportage. The aim of the series is to produce books that are accessible enough to be used by college students and instructors, but will also stimulate, provoke and inform anthropologists at all stages of their careers. Written clearly and concisely, books in the series are designed equally for advanced students and a broader range of readers, inside and outside academic anthropology, who want to be brought up to date on the most exciting developments in the discipline.

The underpinning research and inspiration for this book emerge in large part from two Arts and Humanities Research Council (AHRC)–funded research projects. My research in East Anglia was supported by the AHRC project ‘Pathways to understanding the changing climate: Time and place in cultural learning about the environment’ (grant number AH/K006282/1). A key part of this research involved collaboration with local schools, and I am especially grateful to teachers and children at the following schools in Cambridgeshire, from whom I learned a great deal that directly informed the development of this book: Petersfield Primary School; Barrington Primary School; The Weatheralls Primary School, Soham; Little Thetford Primary School; and Wilburton Primary School. The ‘Pathways Project’ research would have been impossible without numerous collaborators who continue to shape my thinking, and I would like to thank in particular Barbara Bodenhorn, Elsa Lee, Jonathan Woolley, D. Amarbayasgalan, Hildegard Diemberger, Bruce Huett, Miranda Strubel, David Whitley, and David Sneath.

Research in Orkney was supported by the AHRC project ‘Orkney: “Beside the Ocean of Time”’ (grant number AH/N007182/1), and I am grateful to my fellow project team members Carina Fearnley, Niamh Downing, Lourdes López-Merino, Tony Krus, and Anne Bevan, as

Acknowledgements

well as the indispensable support of John Flett Brown, Carol Dunbar, Alistair Peebles, and the Pier Arts Centre, Stromness.

Libby Peachey, the administrator at the Mongolia and Inner Asia Studies Unit at the University of Cambridge, was instrumental in spearheading the research in East Anglia and Orkney, as well as in Mongolia, that led to this book.

My parents, Jim and Kath, have always been a source of care and inspiration and never more so than when I was writing this book. My partner Clea Paine has not only supported me enormously but also, as a geologist and archaeologist, informed and shaped my thinking on deep time over countless conversations. Finally, a thank you to my son James: it has been amazing to share all the adventures of fieldwork with him.
