

Index

- Accuracy checks in WH methods, 103
- Adams, Störmer and Cowell integrators, 58
- Air drag, 232
- Algorithmic regularization, 177, 189
- Alternatives for WH, 119
- Angular elements, 21
- Artificial satellites, 228
- AZ method, 153
- AZ method coordinates, 154

- Behaviour at event horizon, 215
- Binary as a harmonic oscillator, 150
- Black hole spins, 217

- c -function routine, 33
- c -functions, 31, 32, 124
- Canonical transformations, 37, 38, 83, 85
- Chain, 161
- Chain derivatives evaluation, 165
- Chain formation, 160
- Chain method, 158, 171, 190
- Chain updating, 161, 164
- Chaos in the Solar System, 102
- Comet perturbations, 53
- Composite integration, 87
- Composite integration methods, 73

- Difference methods, linear operators, 55
- Different regularized vectors, 147

- Earth's atmosphere effect, 232
- Earth's potential, 228
- Earth's potential gradient, 228
- Ellipse with leapfrog, 76
- Elliptic two-body motion, 27
- Elliptical element perturbations, 51
- Energy errors (three-body), 209
- Energy errors in leapfrog integration, 76
- Equation solution by bracketing, 30
- Error Hamiltonian, 88

- Error in warm-up, 113
- Exact Kepler leapfrog, 132
- Extended phase space, 143
- External forces, 140, 187, 189, 192
- External forces (chain), 162, 166
- Extrapolation method, 72

- First-order equations by extrapolation, 72
- Five-body interaction, 185
- Five-body orbit, 6
- Fourth-order code, 90
- Functional time transformation, 135

- Gauss' f - g functions, 27
- Generating function, 38, 85
- Geocentric Solar System, 8
- Geometry of ellipse, 20
- Global regularization, 154
- Global regularization algorithm, 156
- Global regularization coordinates, 157

- Hamiltonian, 36, 39
- Hamiltonian equations, 37
- Heliocentric coordinate system, 82
- Heliocentric coordinates, 8
- Herrick's variation, 46
- History, 10

- Implicit Runge–Kutta–Gaussian integrators, 63
- In-spiralling due to GR radiation, 215
- Infinitesimal transformations, 83
- Initial values as elements, 47
- Inner Solar System, 7
- Integrals of motion, 5

- Jacobian coordinate system, 82
- Jacobian coordinates, 9, 95, 99

- Kepler's equation, 19, 23, 145
- Kepler's equation (N -body), 168
- Kepler's equation (universal), 28

- Kerr hole spins, 217
 KS-transformation versus physical, 150
 KS-transformation, 124, 144, 146
- Lagrange and Poisson equations, 49
 Lagrange equations, 35, 43
 Lagrangian, 35
 Leapfrog, 74, 88, 173
 Leapfrog (exact for binary), 223
 Leapfrog (generalized), 92, 175
 Leapfrog (higher-order), 78, 89, 225
 Leapfrog (quasi-Keplerian), 198
 Leapfrog (three-body problem), 207
 Leapfrog (time-transformed), 185
 Leapfrog (two-body), 181
 Leapfrog (velocity-dependent force), 194
 Leapfrogs (higher-order), 234
 Levi-Civita regularization, 145
 Lie series, 84
 Logarithmic Hamiltonian, 131, 178, 205, 221, 224
 Logarithmic leapfrog (two-body), 182
 Lyapunov exponents, 94
- Modified potential (WH method), 118
 Motion and variations, 100
- N -body Hamiltonian in KS-formulation, 160
 N -body problem, 5
- Perturbations of Delaunay variables, 52
 Perturbative variation, 46
 Picard's iteration, 86
 Planetary dynamics, 8
 PN-corrected orbital elements, 217
 PN-corrected semi-major axis versus stepnumber, 216
 PN-corrected semi-major axis versus time, 216
 Point transformation, 38
 Poisson equations, 45
 Polar coordinates, 38
 Post-Newtonian terms, 211
 Pythagorean three-body orbit, 155
- Quasi-Keplerian motion, 199
 Quasi-satellite of Venus, 93
- Radius of convergence, 69–71
 Regions for methods, 12
 Relative coordinates (three-body), 206
- Satellite dynamics, 9
 Satellite orbits, 222
 Second-order equations by extrapolation, 73
 Sixth-order code, 91
- Slow-down of binaries, 170
 Solving perturbed harmonic oscillator equations, 151
 Spin-orbit terms, 213
 Stars in a Kerr hole field, 219
 State transition matrix, 226
 Steffensen's power series method, 65
 Stellar rotation, 204
 Stepsize control, 167
 Symplectic corrector, 115, 117, 127
 Symplectic Euler method, 88
 Symplectic integration, 81, 87
 Symplectic interpolator, 116
 Symplectic tangent map, 96
- Taylor series, 17, 56, 65, 84, 152, 176
 Taylor series for N -body system, 68
 Three-body geometry, 126
 Three-body problem, 126, 128, 139, 153, 204
 Three-body problem (relative coordinates), 206
 Three-body problem with WH, 126
 Tidal friction, 203
 Time transformation, 17, 41, 125, 128, 131, 135, 143, 167, 178, 193
 Time transformation (WH method), 122
 Time-transformed Hamiltonian, 122
 Time-transformed leapfrog, 185
 Transformation to physical variables (KS chain), 163
 Transformation to regularized variables (KS chain), 163
 Triple collision orbit, 209
 Two fixed centres, 137
 Two-body (perturbed), 224
 Two-body orbit, 5
 Two-body power series, 66
 Two-body problem, 4, 15
 Two-body problem (perturbed), 122, 196
 Two-body problem (solution), 16
- Units, 3
 Universal Kepler's equation, 28, 29
 Universal two-body motion, 27
- Variation of elements, 50
 Variational equations, 77, 97, 99
 Variational equations (WH method), 98
 Velocity-dependent perturbations, 194
- Wisdom–Holman method, 93, 94, 225
 Wisdom–Holman with δ -functions, 93
- Yoshida's high-order methods, 90
 Yoshida's sixth-order method, 90
