

Index

- Abramovitz, Moses, 244–45, 251–52, 257, 273–74
- agricultural economists
 applications of Cobb–Douglas regression,
 compared to Douglas’s, 177–78, 210–13
 criticisms of production function estimation,
 193–94
 farm management research and, 171–74, 181
- Alford, L.P., 224–25, 227
- Allen, R.D.G., 95, 157, 166, 180
- “Are There Laws of Production?”, 105, 129–42
- Arrow, Kenneth, 5, 157–59
- Aukrust, Odd, 256, 262
- Banzhaf, Spencer, 171–72
- Barro, Robert, 279
- Berglas, Eitan, 274–75
- Bohm-Bawerk, Eugene, 45–46
- Boulding, Kenneth, 179, 253, 316, 329
- Bronfenbrenner, Martin, 67
 Bronfenbrenner and Douglas (1939), 69–78,
 119, 122–25
 interfirm/intrafirm distinction, 111–14,
 122–25
- Brown, Murray, 156, 276, 278
- Brownlee, O.H., 176
- bunch map. *See* confluence analysis
- Bureau of Labor Statistics
 price indexes, 28–29, 220, 235
 productivity indexes, 222–23, 225–27
- Calgue, Ewan, 223
- capital fundamentalism, 256, 273
- capital, measures of
 in “Theory of Production”, 25–26, 28, 30, 60,
 234
 in Douglas’s cross-section studies, 67, 70,
 103
 in Handsaker and Douglas study, 53–54
 of Goldsmith, 236–37
 of Klein, 236
 of Kuznets, 234–36
 of Terborgh, 235
- CES production function. *See* constant
 elasticity of substitution production
 function
- Chenery, Hollis, 5, 158, 160–61
- Christ, Carl, 254
- Clark, John B., 36, 49, 120, 131, 304
- Clark, John M., 31–32, 41, 43, 57, 103, 129, 230
- classical theories of production and
 distribution, 15–16
- Cobb, Charles
 coauthor, “A Theory of Production”, 1, 14,
 27–28
 mathematical background, 34–35
 study of Massachusetts manufacturing,
 33–34, 38
- confluence analysis, 61–63, 85, 91
 in Gunn and Douglas studies, 79, 87
 in Mendershausen’s critiques, 63–65, 95
- Constant Elasticity of Substitution (CES)
 production function, 2, 155
 Griliches’s use of, 286, 289, 292
 introduction of, 155–65
 reactions to, 165–68
- constant returns to scale, assumption of
 competitive equilibrium and, 46, 77, 100,
 102–3, 122–24, 131
 Douglas’s justification of, 36, 102–3, 229
 questioned, 47, 61, 229, 244
- Copeland, Morris, 44, 221–22, 232, 254–55

- Copeland-Martin technique, 216, 232–33, 242–43, 245, 251, 258
- Cowles Commission
 approach to econometric research, 114–16, 145, 167, 198–99, 213, 280–81
 missionary aspect, 115–16, 122
- cross section approach, Douglas's
 advantages of, 68–69
 criticized, 107–9, 150–53, 263–64
 explained, 59, 67–68
- Daly, Patricia, 102–4
- Denison, Edward, 258, 273, 277
- direction of minimization, choice of, 33, 62, 67, 69, 71–74, 80, 83–84, 87, 91, 94, 97, 107, 111–12, 150
- Douglas, Paul
 as a statistician, 22–27, 50–52
 autobiography, 3
 candidate for Senate, 5, 105
 education and early research, 13
 explanations of productivity growth, 223
 Marine Corps service, 101, 129
 recollections of work with Cobb–Douglas regression, 14, 31, 60, 132
 relationship with coauthors, 4–5, 52, 69, 83–84, 129–30
 rhetorical style, 8, 58, 100–1, 306–8
- Durand, David, 46–48, 75, 247
- economic growth, measurement/explanation of. *See* productivity growth, measurement/explanation of
- Eisner, Robert, 265
- elasticity of substitution, 156–58, 160, 289, 292
- embodiment hypothesis, 272–74, 282, 291
 Berglas study, 274–75
 Intriligator study, 275
 Solow and, 267–72
- Fabricant, Solomon, 140, 235–36, 239–42, 250
- farm management. *See* agricultural economists and farm management research
- Fisher, Irving, 22, 45, 57, 253
- Fisher, R.A., 78, 176, 178, 182, 208, 213
- Frisch, Ragnar, 7, 66, 126
 diagonal mean regression, 33–34
 Koopmans, T. and, 80
 Mendershausen, H. and, 60, 93
- Gilfillan, S.C., 43, 229
- Goldsmith, Raymond, 236, 249, 266
- Griliches, Zvi, 9, 213–14, 217, 294–95
 background and education, 281
 Discovery of the Residual, The, 216, 242–43, 251
 framework for empirical growth research, 215, 278, 282
 manufacturing sector, analysis of, 290–94
 panel data, use of, 289–90, 294
 production functions, uses for growth research, 282–84, 286–87, 289
 productivity growth in agriculture, 284–90
 specification errors, analysis of, 194–96, 206
- Griliches-type ally, 309–11
- growth accounting, 216, 257
 Griliches's framework for, 281–82, 289, 293–94
 production function concept and, 257–58
 production function regressions and, 258–62, 279–84, 286–87
- Gunn, Grace, 78
 contrast with Bronfenbrenner, 83–86
 reply to Mendershausen, 92–93
 study of 1940, 78–82
 study of 1941, Australian data, 95–100
 study of 1941, US data, 86–89
 study of 1942, 100–1
- Haavelmo, Trygve, 50, 52, 117
 probability approach, 114–16
- Hall, Robert, 277
- Handsaker, Marjorie, 51–58
- Heady, Earl, 9
 advocate for production function estimation, 181, 209–10
 background and early career, 174, 179
 experimental production function studies, 181–86
 first production function study (1946), 176–77
 hybridity problem and simultaneous equations, 190–92
 normative neoclassicism of, 174, 179–81
 production functions with farm level data, 187–92
- Hicks, John R., 77, 114, 166, 246
 analysis of technical change, 230–31
 elasticity of substitution, 156–57

- Hoch, Irving
 econometric model, 198–99
 panel data estimation, 207–8
 presentation of 1954, 196–97
 production function estimates (1962), 199–203
- imperfect competition, 54–56, 131, 138
 and interpretation of Cobb–Douglas
 regression estimates, 71, 75, 95–96,
 99–100, 110, 113, 117, 121, 126, 141
- index of production, physical, 218–22, 231
- instability problem. *See* multicollinearity
