

## Contents

	<i>Preface</i>	page xi
	<i>Acknowledgments</i>	xii
	<i>How to Use This Textbook</i>	xiii
<b>1</b>	<b>Introduction</b>	1
	1.1 Advances in Water Resources Engineering	1
	1.2 Hydrology and Hydraulics in Water Resources Engineering Problems	7 9
<b>2</b>	<b>Overview of Hydromechanics</b>	10
	2.1 Engineering Properties of Water	10
	2.2 Hydrostatic Pressure and Force	12
	2.2.1 Pressure	12
	2.2.2 Force	14
	2.3 Energy in Still and Flowing Water	18
	2.4 Governing Laws of Flowing Water	20
	2.4.1 Continuity Equation	20
	2.4.2 Energy Equation	21
	2.4.3 Momentum Equation	30
	2.5 Flow Regime	33
	2.5.1 Steady Versus Unsteady Flow	33
	2.5.2 Uniform Versus Nonuniform Flow	34
	2.5.3 Laminar Versus Turbulent Flow	34
	2.5.4 Subcritical Versus Supercritical Flow	35
	2.6 Dimensional Analysis and Similitude	41
	2.6.1 Dimensional Analysis	41
	2.6.2 Similitude	42
	Problems	43
<b>3</b>	<b>Watershed and Hydrologic Processes</b>	50
	3.1 Watershed and Water Balance	50
	3.1.1 Watershed Concepts and Characteristics	50
	3.1.2 Estimation of Time Concentration	56
	3.1.3 Analysis of Water Balance	63
	3.1.4 Analysis of Water Supply and Demand	65
	3.1.5 Sustainable Development of Water Resources	68
	3.2 Basic Hydrologic Processes	71

<b>vi</b>	<b>Contents</b>	
	3.2.1 Precipitation	72
	3.2.2 Infiltration	77
	3.2.3 Evapotranspiration	88
	3.2.4 Surface Runoff	94
	3.2.5 Streamflow	102
	Problems	114
<b>4</b>	<b>Synthetic Storm and Design Discharge</b>	122
	4.1 Design Storm Formulation	122
	4.1.1 Historical Event	122
	4.1.2 Intensity–Duration–Frequency Curves	124
	4.1.3 Synthetic Storm	136
	4.1.4 Probable Maximum Storm	142
	4.2 Estimating the Design Peak Discharge	143
	4.2.1 Maximum Historical Value	143
	4.2.2 Modeled Value	147
	4.2.3 Flood Frequency Analysis	153
	4.3 Formulating a Design Flow Hydrograph	159
	4.3.1 Historical Flow Hydrograph	159
	4.3.2 Unit Flow Hydrograph	159
	4.3.3 Modeled Flow Hydrograph	168
	4.3.4 Hydrologic Simulation Models	171
	Problems	172
<b>5</b>	<b>Hydraulic Machinery</b>	178
	5.1 Overview of Pumps and Turbines	178
	5.2 Pumps	180
	5.2.1 Design Considerations	180
	5.2.2 Characteristics and Classifications	184
	5.2.3 Performance Curves	187
	5.2.4 Affinity Laws of Pumps	196
	5.2.5 Selection of Pumps	203
	5.2.6 Operation Point and Cavitation	206
	5.2.7 Pumps in Parallel and Series	210
	5.3 Turbines	214
	5.3.1 Types	214
	5.3.2 Power by a Pelton Turbine	215
	5.3.3 Power by a Francis Turbine	221
	5.3.4 Synchronization with an Electrical Generator	227
	5.3.5 Turbine Selection and Cavitation	227
	5.3.6 Affinity Laws of Turbines	231
	Problems	233

<b>6</b>	<b>Open Channel Flow and Channel Design</b>	239
6.1	Hydraulic and Energy Grade Lines	239
6.2	Normal Depth and Critical Depth	242
6.3	Gradually Varied Flow	245
6.3.1	Classification of Water Surface Profiles	245
6.3.2	Computation of Water Surface Profiles	250
6.4	Rapidly Varied Flow	257
6.4.1	Hydraulic Jump	257
6.4.2	Choking	261
6.4.3	Supercritical Contraction and Expansion	267
6.5	Flow Measurement	270
6.5.1	Sharp-Crested Rectangular Weir	271
6.5.2	Sharp-Crested Triangular Weir	273
6.5.3	Broad-Crested Weir	274
6.5.4	Parshall Flume	275
6.5.5	Ultrasonic Open Channel Flow Meter	276
6.6	Channel Design and Analysis	279
6.6.1	Overall Guidelines	279
6.6.2	Concrete-Lined Channel	280
6.6.3	Earth Channel	289
6.6.4	Grass-Lined Channel	295
6.6.5	Riprap-Lined Channel	299
	Problems	302
<b>7</b>	<b>Pressurized Pipe Flow</b>	308
7.1	Hydraulic and Energy Grade Lines	308
7.2	Smooth Versus Rough Pipes	311
7.3	Pipes and Pipelines	320
7.4	Pipe Networks	329
7.5	Orifices	351
7.6	Discharge Measurements	355
7.6.1	Obstruction Meters	355
7.6.2	Non-Intrusive Ultrasonic Flowmeters	356
7.6.3	Area–Velocity Flowmeters	357
	Problems	358
<b>8</b>	<b>Hydraulic Structures</b>	367
8.1	Culverts	367
8.1.1	Culvert Components	367
8.1.2	Inlet-Control Conditions	370
8.1.3	Outlet-Control Conditions	378
8.1.4	Design and Operation of Culverts	383

<b>viii</b>	<b>Contents</b>	
	8.2	Bridges 387
	8.3	Risers 395
	8.4	Storm Sewers 406
	8.4.1	Gutter Flows 407
	8.4.2	Drain Inlets 414
	8.5	Spillways and Stilling Basins 421
	8.5.1	USBR Ogee Spillways 421
	8.5.2	Stilling Basins 424
		Problems 429
<b>9</b>	<b>Groundwater Hydraulics</b>	437
	9.1	Groundwater in the Hydrologic Cycle 437
	9.2	Aquifer Properties 439
	9.2.1	Types of Aquifers 439
	9.2.2	Properties of aquifers 441
	9.2.3	Variability of Saturated Hydraulic Conductivity 444
	9.3	Flow in an Aquifer 446
	9.3.1	Darcy's Law and Governing Equation 446
	9.3.2	Flow Across a Boundary 454
	9.3.3	Steady Water Tables Between Two Waterbodies 457
	9.4	Well Hydraulics 462
	9.4.1	Steady Radial Flow in a Confined Aquifer 462
	9.4.2	Steady Radial Flow in an Unconfined Aquifer 465
	9.4.3	Unsteady Radial Flow in a Confined Aquifer 470
	9.4.4	Unsteady Radial Flow in an Unconfined Aquifer 473
	9.4.5	Radial Flow in a Semiconfined Aquifer 479
	9.4.6	Multiple Pumping Rates and Well Flow in an Aquifer with Boundaries 486
	9.4.7	Flows in a Partially Penetrating Well 499
	9.5	Well Engineering 501
		Problems 505
<b>10</b>	<b>Unsteady-State Flow</b>	517
	10.1	Stormwater Rising and Falling in a Manhole 517
	10.2	Transient Flow in a Pressurized Pipe or Open Channel 524
	10.2.1	Pressurized Circular Pipes 526
	10.2.2	Open Channels 552
	10.3	Transient Water Table between Two Waterbodies 575
		Problems 585
	<b>Appendix I: Notation</b>	589
	<b>Appendix II: Constants and Units Conversion Factors</b>	591

<b>Appendix III: Microsoft Excel Solver</b>	593
<b>Appendix IV: Derivatives and Integrals</b>	597
<b>Appendix V: Hydrologic and Hydraulic Models</b>	601
<i>References</i>	603
<i>Index</i>	612
