Every effort has been made in preparing this book to provide accurate and up-to-date information that is in  
 accord with accepted standards and practice at the time of publication. Although case histories are drawn  
 from actual cases, every effort has been made to disguise the identities of the individuals involved.  
 Nevertheless, the authors, editors, and publishers can make no warranties that the information contained  
 herein is totally free from error, not least because clinical standards are constantly changing through research  
 and regulation. The authors, editors, and publishers therefore disclaim all liability for direct or consequential  
 damages resulting from the use of material contained in this book. Readers are strongly advised to pay careful  
 attention to information provided by the manufacturer of any drugs or equipment that they plan to use.
