## Contents

Preface	page xiii
Acknowledgements	xiv
List of Abbreviations	xv
I Structural Organisation of the Nervous System	1
1.1 Nervous Systems	1
1.2 The Anatomy of a Neuron	2
1.3 Unmyelinated Nerve Fibres	2
1.4 Myelinated Nerve Fibres	4
1.5 Nerve Fibre Responses to Injury	8
2 Resting and Action Potentials	10
2.1 Electrophysiological Recording Methods	10
2.2 Intracellular Recording of the Membrane Potential	13
2.3 Extracellular Recording of the Nervous Impulse	14
2.4 Excitation	17
3 Background Ionic Homeostasis of Excitable Cells	22
3.1 Structure of the Cell Membrane	22
3.2 Ion Distributions in Nerve and Muscle	25
3.3 The Genesis of Resting Potentials	26
3.4 The Donnan Equilibrium System in Muscle	28
3.5 Direct Tests of the Donnan Hypothesis	31
3.6 The Active Transport of Ions	32
3.7 Quantitative Reconstruction of Resting Cellular Ionic	
Homeostasis	38
4 Membrane Permeability Changes During Excitation	41
4.1 Impedance Changes During the Spike	41
4.2 The Sodium Hypothesis	41
4.3 Predictions of the Sodium Hypothesis	43
4.4 Voltage Clamp Experiments	46
4.5 Equivalent Electrical Circuit Description of the Nerve	
Membrane	47
4.6 Separation of Ionic Current Components in Response to	
Voltage Change	49
4.7 Mathematical Reconstruction of Ionic Current Properties	52
5 Voltage-Gated Ion Channels	55
5.1 cDNA Sequencing Studies	55
5.2 The Structure of Voltage-Gated Ion Channels	55

CONTENTS

viii

Cambridge University Press 978-1-108-49505-9 — Keynes & Aidley's Nerve and Muscle Christopher L.-H. Huang Table of Contents <u>More Information</u>

5.3	Biophysical Measurements of Channel Protein	
	Conformational Changes	60
5.4	Charge Movements in Excitable Cell Membranes	62
5.5	The Sodium Channel Gating Mechanism	66
5.6	The Ionic Selectivity of Voltage-Gated Channels	68
5.7	Effect of Ion Occupancy on Channel Permeation:	
	The Independence Principle	69
6	Cable Theory and Saltatory Conduction	73
6.1	The Spread of Voltage Changes in a Cable System	73
62	Passive Spread of Voltage Changes Along an	, .
0	Unmvelinated Nerve	75
6.3	Spread of Excitation in an Unmyelinated Nerve	76
6.4	Action Potential Conduction Velocity and Direction	79
6.5	Saltatory Conduction in Myelinated Nerves	70
6.6	Factors Affecting Conduction Velocity	84
6.7	Factors Affecting the Threshold for Excitation	85
6.8	After-potentials	87
0.0	The potentials	07
7	Neuromuscular Transmission	88
7.1	The Motor Unit	88
7.2	Presynaptic Transmitter Release	89
7.3	Graded and Regenerative Components of	
	the Postsynaptic Response	91
7.4	The Quantal Nature of Presynaptic Events	94
7.5	Ionic Current Flows Underlying the End-Plate	
	Potential	97
7.6	Patch Clamp Studies	99
7.7	The Nicotinic Acetylcholine Receptor	101
7.8	Specific Pharmacological Properties of the	
	Neuromuscular Junction	103
8	Synaptic Transmission in the Nervous System	104
<b>Q</b> 1	Synaptic Excitation in Motor Neurops	100
0.1 Q 7	Excitatory Postsynantic Potentials	100
0.4 8 3	Inhibition in Motor Neurops	10/
84	Interaction of IPSPs with EPSPs	105
85	Presynantic Inhibition	111
0.J 8.6	Slow Synaptic Potentials	111
8.0 8.7	C.Protein-Linked Recentors	111
0./ 8 8	Flectrical Synances	114
0.0 8 0	Long-Term Potentiation and Depression	110
0.9 8 10	Clial Ruffering of the Interstitial Space	11/
0.10	Following Neuronal Activity	11(
	ronowing neuronal Activity	117

CONTENTS

9	The Mechanism of Contraction in Skeletal Muscle	121
9.1	Anatomy	121
9.2	The Structure of the Myofibril	123
9.3	The Sliding-Filament Theory	124
9.4	The Lengths of the Filaments	125
9.5	The Relation Between Sarcomere Length and Isometric	
	Tension	125
9.6	The Molecular Basis of Contraction	127
9.7	Myosin	127
9.8	Actin	129
9.9	Interactions Between Actin, Myosin and ATP	130
9.10	The Molecular Basis of Activation	131
9.11	Maintenance of Structural Integrity in Contracting	400
	Sarcomeres	132
10	The Activation of Skeletal Muscle	135
10 1	Background Conductances in Skeletal Muscle	
10.1	Membranes	135
10.2	Ionic Currents Mediating Skeletal Muscle Membrane	100
10	Activation	137
10.3	The Surface and Transverse Tubular Membrane Systems in	10,
	Skeletal Muscle	141
10.4	Surface and Transverse Tubular Components of the Muscle	
	Action Potential	143
10.5	Partial Separation of Surface and Transverse Tubular	
	Electrophysiological Activity	145
10.6	Electrophysiological Relationships Between Surface and	
	Transverse Tubular Propagation of Excitation	147
10.7	Physiological Modulation of Surface and Transverse Tubular	
	Membrane Function	150
10.8	Reconstruction of Transverse Tubular Functional Changes	
	During Exercise	152
10.9	Functional and Clinical Implications of Altered Transverse	
	Tubular Membrane Properties	153
	Excitation-Contraction Coupling in Skalatal Muscle	154
••	Excitation-Contraction Coupling in Skeletar Huscle	154
11.1	Dependence of Excitation–Contraction Coupling on	
	Membrane Potential	154
11.2	Involvement of Intracellular Ca <sup>2+</sup> in Excitation–Contraction	
	Coupling	155
11.3	The Measurement of Intracellular Ca <sup>2+</sup>	156
11.4	Voltage-Dependent Release of Intracellularly Stored	
	Ca <sup>2+</sup> in Excitation–Contraction Coupling	158
11.5	Triad Complexes Between the Transverse Tubular and	
	Sarcoplasmic Reticular Membranes	160
