
Index

- abstract Cauchy problem, 11
- approximation theorem for semigroups, 24
- birth and death process, 59, 103, 131, 205
- boundary
 - active, 140
 - discrete, 148
 - entrance, 176
 - exit, 148
 - for a Markov chain, 148
 - for an intensity matrix, 148
 - passive, 133, 148
- canonical mapping, 139
- Chapman–Kolmogorov equation, 40
- convergence
 - in norm, 34
 - in coordinates, 34
 - theorem for semigroups, 24
 - weak, 36
- density, 90
- direct sum, 126
- dishonesty function, 66
- distribution, 34
- dual
 - operator, 27
 - semigroup, 27
- entrance law, 81, 179
- equation
 - Chapman–Kolmogorov, 40
 - Hilbert, 14
 - Kolmogorov backward, 67, 208
 - resolvent, 12
- equivalent sets, 163
- example
 - Blackwell’s, 82
 - Kolmogorov–Kendall–Reuter’s, first, 53, 70, 226
 - Kolmogorov–Kendall–Reuter’s, second, 55, 76, 190, 222
 - Speakman’s, 41
 - two infinite ladders, 126, 132
 - modified, 133, 237
- explosion, xvii, 105
- extended limit, 25
- Feller
 - generator, 202
 - property, 196
 - criterion for, 198, 200
 - semigroup, 198
- Feynman–Kac Formula, 216
- flash of P. Lévy, 176
- formula
 - Feynman–Kac, 216
 - Trotter Product, 22
 - Volkonskii, 220
- functional
 - active, 140
 - extremal, 147
 - passive, 140
 - singular, 148
- generator, 4
 - (sub-)Markov, 53
 - Feller, 202
 - Markov, 16

- Hilbert equation, 14
- infinite product, 55
- instantaneous
 return from the boundary, 173
 state, 46
- intensity matrix, 48
- intensity of jump, xvi, 46
- isomorphic image
 of a semigroup, 8
 of an operator, 8
- jump chain, 132, 158
- jump intensity, xvi, 46
- Kantorovič–Banach space, 36
- Kolmogorov
 backward equations, 67, 208
 matrix, 48
- Kolmogorov–Kendall–Reuter semigroup, 53,
 55, 70, 76
- Markov
 chained, iv
 generator, 16
 operator, 15
- Markov chain
 instantaneous return, 173
 elementary return, 172
 honest, 40, 66, 70
 infinitesimal description of, 44
 minimal, 89, 105
 post explosion
 all ways of explosion combined, 125
 all ways of explosion distinguished, 150
 dual perspective, 228, 234
 in an enlarged space, 168, 171
 pure birth chain example, 107, 109, 113,
 122
 some ways of explosion combined, 145
 two infinite ladders example, 126
 stopped, 171
- matrix
 Kolmogorov, 48
 nonexplosive, 96
 of identities, 48
 of transition probabilities, 40
 as an operator, 42
- Neumann series, 52
- operator
 adjoint, 27
 closable, 9
 closed, 9
 contraction, 12
 dual, 27, 29
 Hille–Yosida, 30
 its core, 10
 its graph, 9
 Markov, 15
 part of, 12
 sub-Markov, 15, 91
- P. Lévy’s flash, 176
- part of an operator, 12
- passive
 boundary, 133
 functional, 140
- positive maximum principle, 202
- process
 birth and death, 59, 103, 131, 205
 elementary return, 172, 247
 honest, 40, 66, 70
 instantaneous return, 173
 minimal, 105
 pure birth, 98
 pure death, 99
 stopped, 171
- pun, 82
- pure birth process, 58
- Q -matrix, 48
- regularity space, 25
- resolvent, 14
- resolvent equation, 12
- return from the boundary
 elementary, 172
 instantaneous, 173
- right-continuous paths, 68, 69
- Scheffé’s Theorem, 34
- Schur’s Theorem, 36, 38
- semigroup, 2
 dual, 27
 Feller, 198
 Markov, 86
 property, 2
 strongly continuous, 2, 43
 sun-dual of, 28
- semigroups
 isomorphic, 8
 similar, 8

- series
 - Dyson–Phillips, 21
 - Neumann, 52
- sojourn set, 159
 - representative, 167
- sojourn solution, 160
- Speakman’s example, 41
- state
 - absorbing, 66, 170
 - instantaneous, 46, 70
 - stable, 46
- sub-Markov
 - operator, 15
- subadditive function, 45
- subspace
 - direct sum of, 126
 - invariant, 12, 28, 127, 198
- sun-dual, 28
 - example, 31, 222, 226
- theorem
 - approximation of semigroups, 24
 - convergence of semigroups, 24
 - Hille–Yosida, 13, 14
 - for Feller semigroups in c_0 , 203
 - for Markov semigroups in l^1 , 52
 - Kurtz’s singular perturbation, 26
 - Lebesgue Dominated Convergence, 35
 - Phillips’s perturbation, 21
 - Scheffé, 35
 - Schur, 36, 38
 - Sova–Kurtz, 24, 25
